1.4 Vehicles & Engines (V&E) Sample 4

Certified Kubota Engines that have been installed in tractors are imported into the United States. Vehicles and Engines Sample 4 is depicted below, in

Exhibit 1-4.

When creating a PGA Message Set which requires reporting of an engine and the equipment it is installed in, groupings will be used. This grouping of the tractor (Equipment) and the installed engine are considered the product and are reported at the product level under the “PG02P” record. This is completed using a series of PG07 records bookended by the PG50/51 records, which denote grouping. All additional records which pertain to the Product (the combined engine and equipment) will also fall under the PG02P product level. This will include, but is not limited to, the Certification Statement/Form Number, Importer information, Certifying Individual, and equipment characteristics.

As the engine is being certified by EPA, it will additionally be reported as a component of the product and may include Test Group Family Name/Number, exemptions, and any/all applicable records and required data.

Note – Only a single engine (w/Serial Number) must be provide at the Component level, all other similar Engines can be reported via groupings with their equipment at the Product level.

If the Electronic Image Submitted code is provided, at least one image must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

Vehicles and Engines Sample 4 - Import Certified Kubota Engines in Tractors	
PG Record	**Description**
OI	This is a generic invoice description record. The commercial description of this shipment is "CERTIFIED KUBOTA ENGINES IN TRACTORS".
PG01	• PGA Line number [5-7]: 001 • Government Agency Code [8-10]: EPA = Environmental Protection Agency (EPA) • Government Agency Program Code [11-13]: VNE = Vehicles & Engines (V&E) • Electronic Image Submitted [17]: Y = Electronic image is transmitted The shipment is regulated by the V&E program office within EPA, and at least one image has been submitted to DIS along with the Entry.
PG02	• Product/Component Indicator [5]: P = Product This Product/Component Indicator states that the following information relates to the product.
PG24	• Remarks Type Code [5-7]: EP2 = EPA Vehicles and Engines Import Code • Remarks Code [8-12]: 1 = US Certified Engine or Engine Installed in Certified Vehicle The Import Code for this shipment is "1", requiring the Engine Family Name/Number for the Certified Engine or Engine installed in a Certified Vehicle.
PG24	• Remarks Type Code [5-7]: EP3 = Industry Code • Remarks Code [8-12]: H = Other non-road spark-ignition engines above 19kW The Industry Code "H" indicates engines are other non-road spark-ignition engines above 19kW.
PG50	The PG50 record indicates that a group has been initiated and the data immediately following this record, and before the PG51 record, should be associated together.
PG07	• Model [40-54]: TRACTOR 3000 = Model of tractor with engine • Manufacture Month and Year [55-60]: 012014 = January, 2014 (01/2014) • Item Identity Number Qualifier [61-63]: SE = Serial Number • Item Identity Number [64-80]: MH0-123-457 = Equipment (tractor) Serial Number The Model Name of the tractor is Tractor 3000, the Manufacture Date is 01/2014 and the tractor Serial Number is MH0-123-457. Serial Numbers should include dashes, periods, or other separators within the Serial Number when present in the number format.
PG07	• Model [40-54]: EM1002 = Model Name of the engine • Manufacture Month and Year [55-60]: 122013 = December, 2013 (12/2013) • Item Identity Number Qualifier [61-63]: ENN = Engine Serial Number • Item Identity Number [64-80]: MH0-874201 = The Engine Serial Number The Model Name of the engine is EM1002, the Manufacture Date is 12/2013 and the Engine Serial Number is MH0-874201. Serial Numbers should include dashes, periods, or other separators within the Serial Number when present in the number format.
PG51	Indicates that the grouping initiated by the previous PG50 record is closed.

PG26	• Packaging Qualifier [5]: 1 = Largest unit of packaging • Quantity [6-17]: 000000100000 =1,000.00 units in shipment • Unit of Measure (packing level) [18-22]: BO = Bottle, No protected, Cylindrical There are 1,000 units (non-protected cylindrical bottles) in the shipment. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 1,000 bottles are represented as 000000100000, with the six leading zeroes as “fill”. The quantity of 1,000 has two implied decimal places, so it is actually 1,000.00, represented by the 100000 value in the field.
PG26	• Packaging Qualifier [5]: 2 = Second largest unit of packaging • Quantity [6-17]: 000000000285 = 2.85 measurement of smallest units in shipment. • Unit of Measure (packing level) [18-22]: OZ = Unit of Measure of individual units is ounces The bottles in this shipment are 10 ounces each. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 2.84 oz. is represented as 000000000284, with the eight leading zeroes as “fill”. The quantity of 284 oz. has two implied decimal places, so it is actually 2.84 oz.
PG29	• Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line - net) [8-19]: 000000008079 = Net weight is 80.79 kg The total net weight is 80.79 kg. For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 80.79 kg is represented as 000000008079, with the eight leading zeroes as “fill”. The quantity of 80.79 kg has two implied decimal places, so it is represented by the 8079 value in the field.

PG02	• Item Type [5]: C = Indicates this is a component of the pesticide • Product Code Qualifier [6-9]: CAS = Chemical Abstract Service Number • Product Code Number [10-28]: 94271-03-1 = CAS Number The component's CAS Number is 94271-03-1.
PG04	• Constituent Active Ingredient Qualifier [5]: Y = Active Ingredient • Name of the Constituent Element [6-56]: DEET = Active Ingredient name • Percent of Constituent Element [74-80]: 0153757 = Active Ingredient is 15.3757% of product The component with CAS Number 94271-03-1 is Deet and is 15.3757% of the product. There are four implied decimal points when writing the Percent of Constituent Element. As in this example, 15.3757% is represented as 0153757, with the one leading zero as "fill".
PG02	• Item Type [5]: C = Indicates this is a component of the pesticide • Product Code Qualifier [6-9]: CAS = Chemical Abstract Service Number • Product Code Number [10-28]: 52304-36-6 = CAS Number The component's CAS Number is 52304-36-6.
PG04	• Constituent Active Ingredient Qualifier [5]: Y = Active Ingredient • Name of the Constituent Element [6-56]: IR3535 = Active Ingredient name • Percent of Constituent Element [74-80]: 0350000 = Active Ingredient is 35% of product The component with CAS Number is 52304-36-6 is IR3535 and is 35% of the product. There are four implied decimal points when writing the Percent of Constituent Element. As in this example, 35% is represented as 0350000, with the one leading zero as "fill".
PG02	• Item Type [5]: C = Indicates this is a component of the pesticide • Product Code Qualifier [6-9]: CAS = Chemical Abstract Service Number • Product Code Number [10-28]: 119515-38-7 = CAS Number The component's CAS Number is 119515-38-7.
PG04	• Constituent Active Ingredient Qualifier [5]: Y = Active Ingredient • Name of the Constituent Element [6-56]: Picaridin = Active Ingredient name • Percent of Constituent Element [74-80]: 0055000 = Active Ingredient is 5.5% of product The component with CAS Number 119515-38-7 is Picaridin and is 5.5% of the product. There are four implied decimal points when writing the Percent of Constituent Element. As in this example, 5.5% is represented as 0055000, with the two leading zeroes as "fill".
PG02	• Item Type [5]: C = Indicates this is a component of the pesticide • Product Code Qualifier [6-9]: PC = PC Code of chemical • Product Code Number [10-28]: 006491= PC Code

Supplemental Distribution of Registered Pesticides Message Set Sample	
	The component's PC Code is 006491.
PG04	• Constituent Active Ingredient Qualifier [5]: Y = Active Ingredient • Name of the Constituent Element [6-56]: BT MOCRY 1F = Active Ingredient name • Percent of Constituent Element [74-80]: 0021000 = Active Ingredient is 2.1% of product The component with PC Code 006491 is Bt moCry 1F and is 2.1% of the product. There are four implied decimal points when writing the Percent of Constituent Element. As in this example, 2.1% is represented as 0021000, with the two leading zeroes as "fill".

2.3 Registered Pesticide (Other) – 24c Sample

A shipment of L-Glutathione is imported into the United States by a State Exemption (24c). An Intended Use Code is provided to clarify the intended use of the product. Exhibit 2-3: Registered Pesticides (Other) -24c Sample shows the PGA Message Set format for importing a Registered Pesticide as a 24c State Exemption.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

Note that the PG22 record, which describes the certification data related to the Certifying Individual, should follow immediately after the data that identifies the individual.
PG26	• Packaging Qualifier [5]: 1 = Largest unit of packaging • Quantity [6-17]: 000000000200 = 2 units in shipment. • Unit of Measure (packing level) [18-22]: BO = Bottle There are two units (Bottles) in the shipment. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 2 bottles are represented as 000000000200, with the nine leading zeroes as “fill”. The quantity of 2 has two implied decimal places, so it is actually 2.00, represented by the 200 value in the field.
PG26	• Packaging Qualifier [5]: 2 = Second largest unit of packaging • Quantity [6-17]: 0000010000= 100 ounces per unit. • Unit of Measure (packing level) [18-22]: OZ = Ounces For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 100 oz. is represented as 000000010000, with the seven leading zeroes as “fill”. The quantity of 100oz has two implied decimal places, so it is actually 100.00 oz., represented by the 10000 value in the field.
PG29	• Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line) [8-19]: 000000005000 = 50 (kg) The net weight is 50 kg. For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 50 kg is represented as 000000005000, with the eight leading zeroes as “fill”. The quantity of 50 kg has two implied decimal places, so it is actually 50.00 kg, represented by the 5000 value in the field.

2.4 Registered Pesticide (Other) – Experimental Use Permit

A shipment of Amitrole is imported into the United States by a pesticide producer. The pesticide producer is intending to research new uses for the Amitrole pesticide, and has already applied for and received an Experimental Use Permit. Exhibit 2-4 shows the PGA Message Set format for importing a Registered Pesticide with an Experimental Use Permit.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

As in this example, 2 bottles are represented as 000000000200, with the nine leading zeroes as “fill”. The quantity of 2 has two implied decimal places, so it is actually 2.00, represented by the 200 value in the field.
PG26	• Packaging Qualifier [5]: 2 = Second Largest unit of packaging • Quantity [6-17]: 000000000075 = .75 unit in shipment. • Unit of Measure (packing level) [18-22]: KG = Kilograms For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, .75 kg is represented as 000000000075, with the ten leading zeroes as “fill”. The quantity of 75 kg has two implied decimal places, so it is actually .75 kg, represented by the 75 value in the field.
PG29	• Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line) [8-19]: 000000000150 = 1.5 (kg) The net weight is 1.5 kg. For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 1.5 kg is represented as 000000000150, with the nine leading zeroes as “fill”. The quantity of 1.5 kg has two implied decimal places, so it is actually 1.50 kg, represented by the 150 value in the field.

2.7 Pesticide – Other Sample 2 (Emergency Exemption)

EPA has not yet approved Amitrole for use, but there is a dire need to save the Ashe trees in the mid-Atlantic region of the United States. The importer received an Emergency Exemption from EPA due to the extenuating circumstances. Exhibit 2-7 shows the PGA Message Set format for importing a Pesticide under an Emergency Exemption.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

	• Commodity Net Quantity (PGA line) [8-19]: 000000005000 = 50 (kg) The net weight is 50 kg. For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 50 kg is represented as 000000005000, with the eight leading zeroes as “fill”. The quantity of 50 kg has two implied decimal places, so it is actually 50.00 kg, represented by the 5000 value in the field.

2.11 Pesticide – Other Sample 6 (Transfer with different producer)

A shipment of ammonia trichloroethylene is imported into the United States for transferal between registered establishments not operated by the same producer. Both the domestic Producer Establishment Number and Foreign Producer Establishment Number have been provided, as well as the EPA Registration Number of the product being formulated. Exhibit 2-11 shows the PGA Message Set format for importing a Pesticide for transfer between registered establishments not operated by the same producer.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.
