U.S. Customs and Border Protection

# *Coastal Enforcement Class 30-Foot Intrepid*

FACT SHEET

The Coastal Enforcement Class vessels serve as a multi-purpose law enforcement vessel. The 30-foot Intrepid best fulfills this multi-mission requirement. The hull design makes it ideal for enforcement operations in shallow, inland and near coastal waters.

The typical open fisherman-type configuration allows the law enforcement crew to covertly survey illegal activity. The vessel's shallow draft allows its 3-member (minimum) crew to pursue smugglers who offload contraband in remote and shallow regions. The starboard-side dive door allows for easy pick-up of floating contraband. The Intrepid meets the demands for a small, fast, highly maneuverable vessel that can be used for interdiction, patrol, surveillance and port security activities, all of which are Office of Air and Marine (OAM) missions.

Its versatility allows OAM to provide the Department of Homeland Security, Department of Defense and other law enforcement agencies viable and effective maritime law enforcement support.

**Performance and Weights:**

- **Maximum Speed**
  46 knots (52 mph)
- **Range**
  200 nautical miles (230 miles)
- **Endurance**
  4 to 6 hours
- **Length**
  30 feet
- **Maximum Gross Weight**
  9,500 pounds

**Features:**

- Marine Surface Radar
- Global Positioning Satellite
- 2 X 275 hp Mercury Outboard Engines
