# REALIZING THE SINGLE WINDOW

The **Automated Commercial Environment (ACE)** is the system through which the United States government has implemented the "single window," the primary system for processing trade-related import and export data required by government agencies. This transition away from paper-based procedures results in faster, more streamlined processes for both government and industry.

Trade Partners

U.S. Customs and Border Protection

Partner Government Agencies

U.S Single Window for trade unifies border coordination, fosters government and industry collaboration, and yields prosperous and secure trade.

FASTER DATA

Built on a modernized platform, ACE expedites transaction processing.

33 PERCENT REDUCTION

in wait times at land border truck processing ports

68 TIMES FASTER

processing of single and continuous bonds

PAPER REDUCTION

ACE has streamlined manual intensive processes by automating paper forms. This makes it easier to comply with U.S. laws and regulations, while enhancing transparency and increasing predictability in the movement of goods.

269 FORMS AUTOMATED

across U.S. Customs and Border Protection and more than 47 partner government agencies

REDUCED COSTS

ACE reduces costs by digitizing manual processes, and reducing wait times.

9 MILLION DOLLARS SAVED

annually through participation in the Periodic Monthly Statement program

1.5 MILLION DOLLARS SAVED

annually by digitally submitting export licenses
