**COAC**

COMMERCIAL CUSTOMS OPERATIONS  
ADVISORY COMMITTEE

**Commercial Customs Operations Advisory Committee (COAC)  
Export Modernization Working Group**

**June 2022**

**Recommendation:**

- Electronic Export Manifest is one of many critical projects that requires completion in order to achieve the full vision of export modernization. As this program continues to gain momentum, COAC recommends that CBP publish a collaborative DRAFT communication for the EEM pilot. The communication document will introduce EEM, outline benefits for participation, and will provide critical information on why pilot participation is beneficial in advance of regulation. While we expect the draft to have further socialization internally with CBP, the COAC, the Export Modernization Working Group (EMWG), the Trade Support Network (TSN), and the Customs Electronic Systems Action Committee (CESAC), will be available to support CBP's finalization of the document. Additional participation in the EEM pilot prior to the release of regulations impacting the Ocean, Air and Rail communities is critical, and a targeted, informative communication is required to achieve this collective goal.
