Compared to other major airports ...

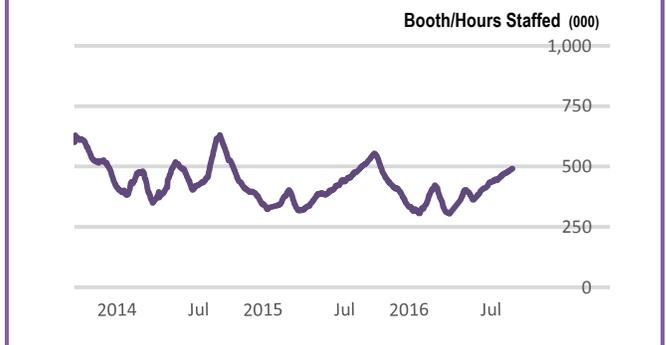

More booths during off peak hours could reduce waits

- **Travel is slightly up at Chicago O'Hare Main Terminal.** Traveler volume at Chicago O'Hare (year to date) has increased 1% compared to last year. About 51% of O'Hare's passengers are confirmed with automated solutions like Global Entry and APC, up from 42% last year.
- **Slightly fewer booth hours.** Booth hours at O'Hare have decreased 1% compared to a year ago. Booth hours have not kept pace with traveler volume, as reflected by longer waits.
- **Wait times increased.** Year to date, O'Hare's average wait is up 19%, from 16.1 minutes last year to 19.1 minutes this year. Waits in off peak may be reduced with just a few more booths.
- **Cycle time and throughput slightly increased.** Average cycle time decreased 2%, while max hourly throughput increased by 1.2 passengers per booth, per hour. The growth of MPC usage may improve cycle time.

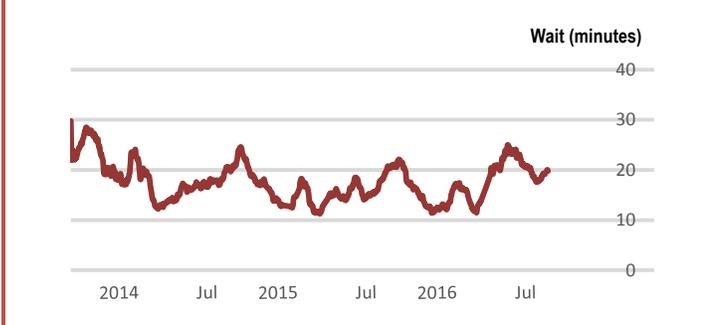

Traveler Volume ... upward trend

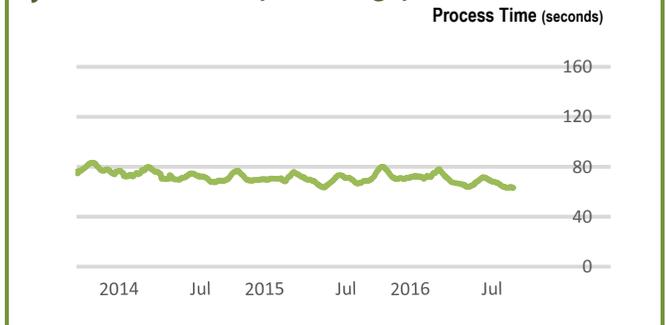

Booth Hours ... 1% less booths compared to last year

Wait Time ... recent increase in wait time

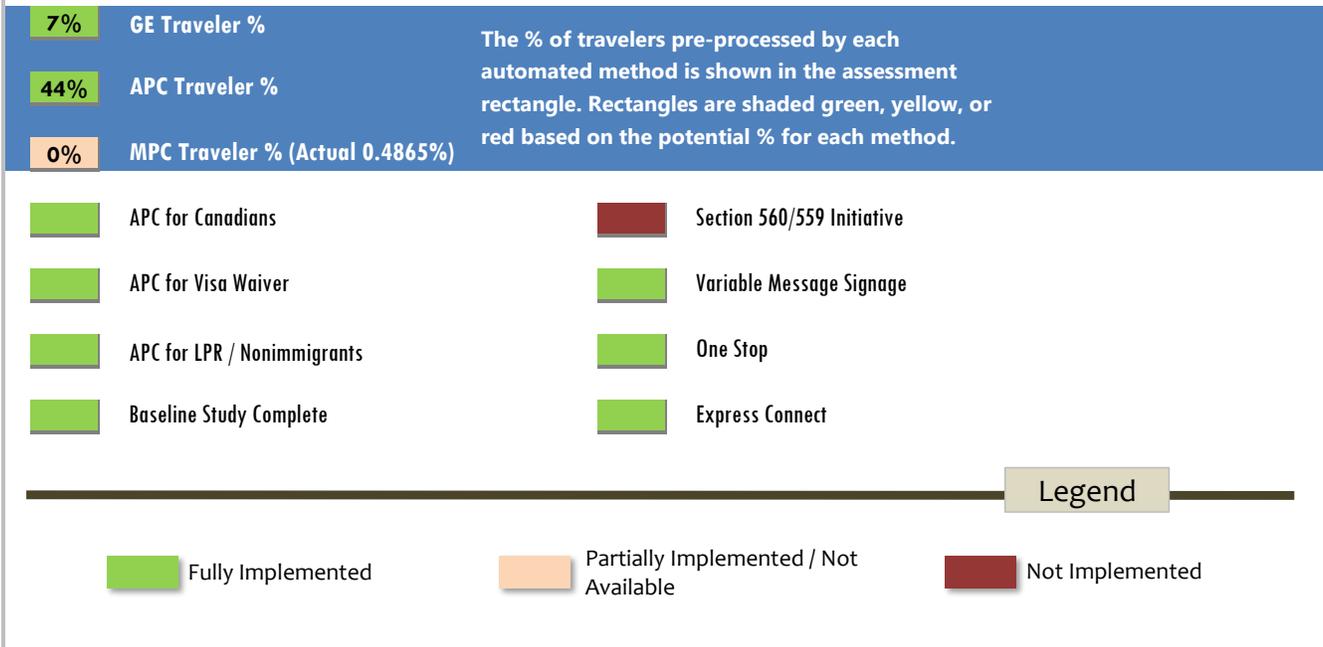

Cycle Time ... steadily decreasing cycle times

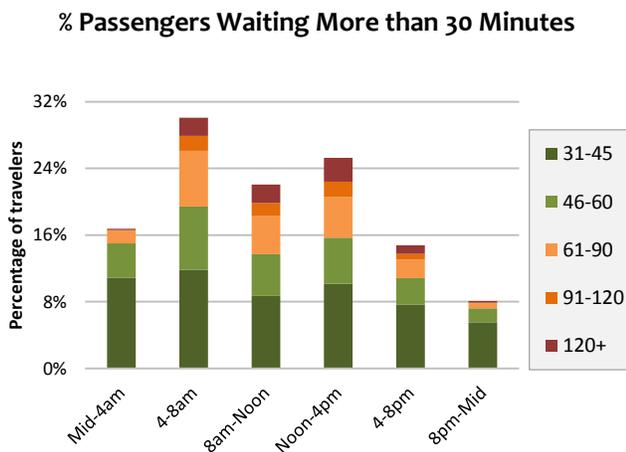

Best Practice Inventory

Chicago O'Hare Main Terminal Best Practice Assessment: O'Hare's Main Terminal has implemented most of the available best practices. Most notably, 51% of passengers are now processed by automated technologies like Global Entry and APC. MPC has recently been implemented. APC is available not only to US Citizens, but also Canadians, Visa Waiver country travelers, and LPRs.

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

20% of passengers wait more than 30 minutes
 Year to date, approximately 7% of O'Hare passengers wait more than 1 hour, approximately 20% of passengers wait more than 30 minutes. Between the hours of 4am to 8am, 30% of passengers wait more than 30 minutes.

More booths needed in off-peak hours
 Over 1,300 passengers (on average) arrive at O'Hare's Main Terminal every hour between Noon and 8pm. But waits are higher from 4am-8am when only 194 passengers arrive per hour.
