More booths help reduce wait times

- **Travel is up slightly at Newark (Terminal B).** Traveler volume increased 3% compared to last year. 9% of all passengers use Global Entry, compared to 8% last year. APC has not yet been implemented at EWR-B.
- **More booths being staffed to meet demand.** Booth hours increased 11% compared to a year ago, from 254 booth hours a year ago to 282 booth hours this year.
- **Waits decreased by 27%.** Year to date, average wait time is 15.1 minutes, compared to 20.8 minutes last year. More booth hours have helped reduce wait times by 27%.
- **Cycle time 5.9 seconds slower.** Average cycle time (81.1 seconds) is up from 75.2 seconds a year ago. APC/MPC technology could be a solution to reduce average cycle time at EWR-B.

Best Practice Inventory

EWR Terminal B Best Practice Assessment: EWR Terminal B has not implemented many of the available best practices. Most notably, 9% of passengers were processed by Global Entry. APC has been implemented at EWR-B that should be able to reduce its cycle time and wait times as more passengers utilized APC.

9%	GE Traveler %	The % of travelers pre-processed by each automated method is shown in the assessment rectangle. Rectangles are shaded green, yellow, or red based on the potential % for each method.
0%	APC Traveler %	
0%	MPC Traveler %

	APC for Visa Waiver		Variable Message Signage
	APC for LPR / Nonimmigrants		One Stop
	Baseline Study Complete		Express Connect

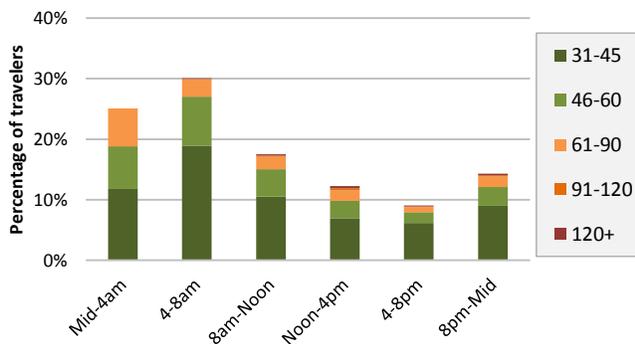

Legend

	Fully Implemented		Partially Implemented / Not Available		Not Implemented
--	-------------------	--	---------------------------------------	--	-----------------

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

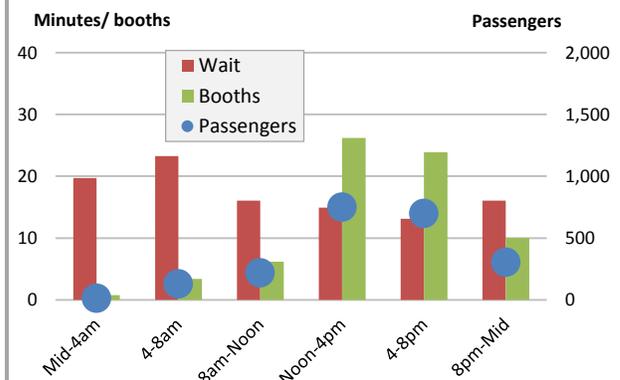

13% of passengers wait more than 30 minutes
 While very few EWR Terminal B passengers wait more than 1 hour (about 2%), approximately 13% wait more than 30 minutes. Between the hours of 4am to 8am, 30% of passengers wait more than 30 minutes.

% Passengers Waiting More than 30 Minutes

Waits are higher off peak from 4am to 8am
 Nearly 750 passengers (on average) arrive every hour between Noon and 4pm, accounting for about 35% of all daily traffic. Meanwhile, fewer than 150 passengers arrive per hour from 4am to 8am, but wait times are highest during this period. Opening extra booths from 4am to 8am may help reduce overall wait times leading into peak hours.

Compared to other major airports ...

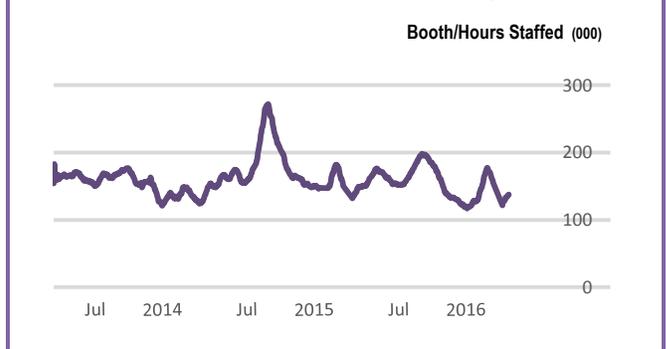

Decreased traffic, booths, and efficiency

- Fewer travelers using APC.** Traveler volume (year to date) has decreased by 6% compared to last year. Today, 48% of passengers are confirmed with Global Entry and APC, down from 50% a year ago.
- Wait times decreased by 2%.** Wait time has decreased by 0.3 minutes, from 13.6 minutes last year to 13.3 minutes today. 99% of passengers are being processed in under 60 minutes.
- Slower processing and less throughput.** Average cycle time is up to 70.1 seconds from 65.6 seconds last year, while max hourly throughput decreased by 3.6 passengers per booth, per hour. The increase is partially due to lower APC usage.
- Booth hours decreased.** Average daily booth hours have decreased 5% from 147 hours last year to 140 hours this year. The reduction in booth hours is due to the decrease in traffic share.

Traveler Volume ... down compared to last year

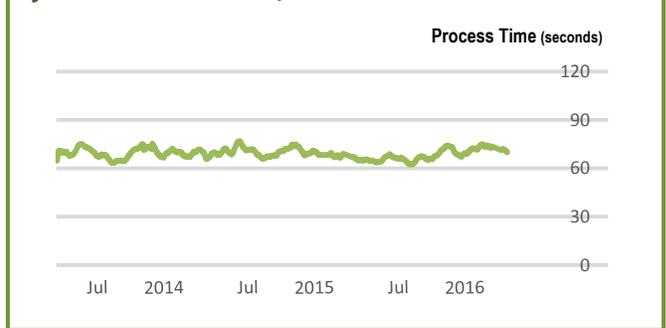

Booth Hours ... 5% fewer booths than last year

Wait Time ... decreasing wait times since 2013

Cycle Time ... recent upward trend

Best Practice Inventory

EWR Best Practice Assessment: EWR-C has implemented some of the available best practices. Most notably, 48% of EWR Terminal C passengers are now processed by automated technologies like Global Entry and APC. APC is available at EWR only to US and Canadian citizens.

9% of passengers wait more than 30 minutes

While very few EWR Terminal C passengers wait more than 1 hour (about 2%), approximately 9% of passengers wait more than 30 minutes. Between the hours of 4am to 8am, 13% of passengers wait more than 30 minutes.

EWR-C matches booth hours well to peak

EWR-C is busiest between 4pm and 8pm, when over 430 passengers arrive per hour. Wait times are the same as the average during this time. Waits could be reduced from 4am to 8am when traffic is lighter (310 per hour), but waits are longer (15 minutes).
