Compared to other major airports ...

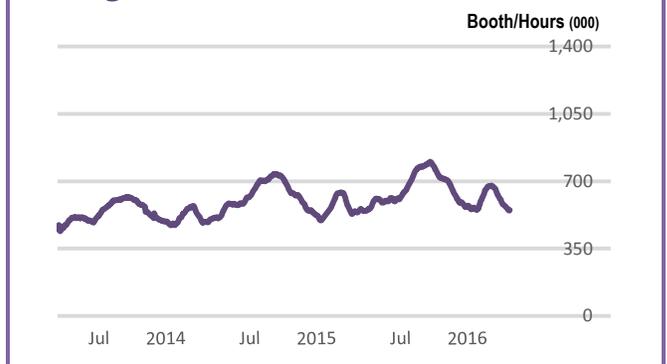

Waits increase significantly

- Travel is up significantly at LAX (Bradley).** Traveler volume at Bradley Terminal (year to date) has increased 10% compared to last year. Today, 41% of passengers are confirmed with automated solutions like Global Entry and APC, up from 31% last year.
- More booths being staffed to meet demand.** Booth hours at LAX Bradley have increased 5% compared to a year ago, from 584 hours to 615 hours per day, but have not kept pace with traveler volume (+10%).
- Increase in wait times.** Year to date, LAX Bradley's average wait increased by 5.9 minutes (34%) to 23.2 minutes. 94% of passengers are being processed in under 60 minutes.
- Faster processing.** LAX (Bradley) has one of the longest average cycle times of any major terminal. However, average cycle time 88.5 seconds) has decreased from 90.6 seconds a year ago. Cycle time will further improve if APC could be applied to non-immigrants (55.6%).

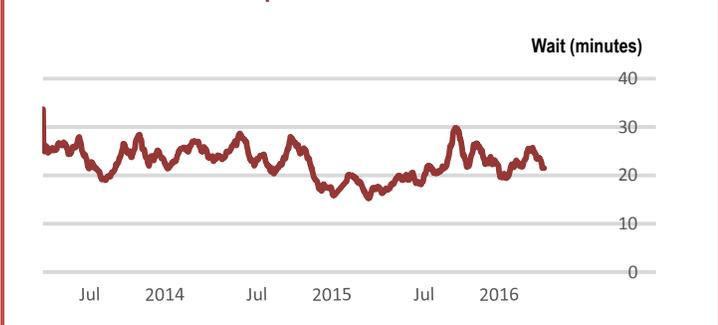

Traveler Volume ... trending upwards

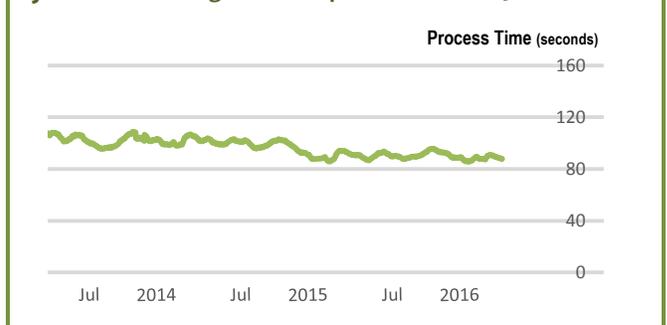

Staffing ... 5% more booths staffed than last year

Wait Time ... recent upturn in wait time

Cycle Time ... significant improvement in 2015

Best Practice Inventory

LAX Bradley Best Practice Assessment: LAX Bradley has implemented many of the available best practices. Most notably, 41% of LAX Bradley's passengers are now processed by Global Entry and APC. APC is available at LAX Bradley not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

Legend

 Fully Implemented	 Partially Implemented / Not Available	 Not Implemented
---	---	---

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

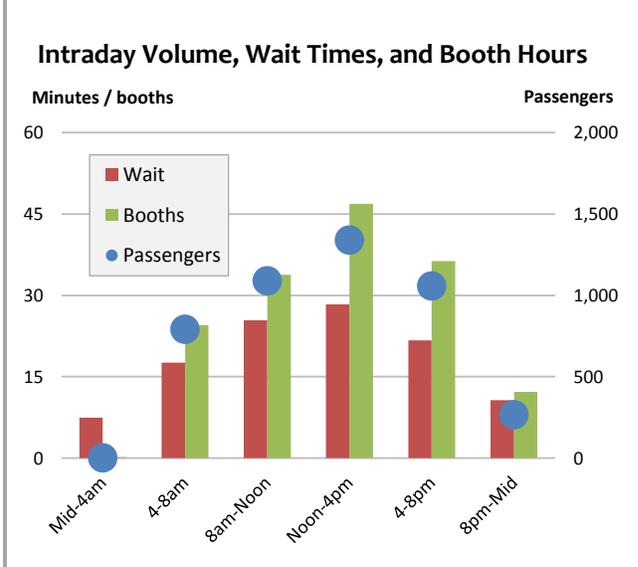

28% of passengers wait more than 30 minutes

Year to date, approximately 7% of Bradley passengers wait more than 1 hour. Between the hours of Noon to 4pm, 38% of passengers wait more than 30 minutes.

LAX Bradley staffs well to traffic demand

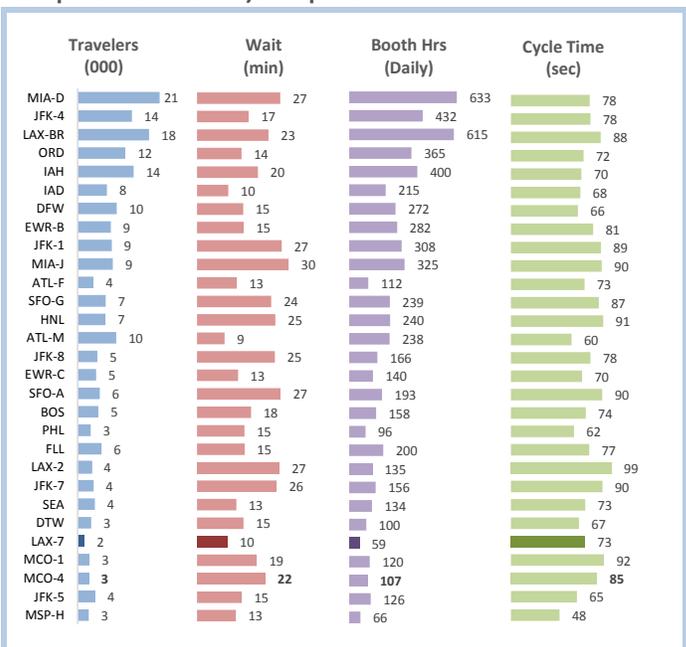

On average, nearly 1,340 passengers arrive every hour between Noon and 4pm. By staffing 47 booths, average waits (28 minutes) are higher than the average (23.2 minutes). Opening extra booths from 4am to Noon may reduce average waits leading into peak hours.

Wait times drop due to decreased traveler volume

- Travel is down at LAX Terminal 7.** Traveler volume (year to date) has decreased 8% compared to last year. The volume decrease at Terminal 7, the increase at terminal 2, and the Bradley Terminal may be a result of airport authority decisions. Today, 40% of LAX-7's passengers are confirmed with Global Entry and APC.
- Slightly decreased booths hours.** Average daily booth hours have decreased 3% from 61 hours last year to 59 hours this year.
- Fast processing.** Average cycle time has decreased by 3.1 seconds, while max hourly throughput increased by 2 passengers per booth, per hour.
- Wait times decreased by 20%.** A decrease in traveler volume and more efficient processing have led to a decrease in wait time. The average wait time decreased by 20%, from 12.3 minutes last year to 9.9 minutes this year.

Traveler Volume ... sharp decrease in 2015

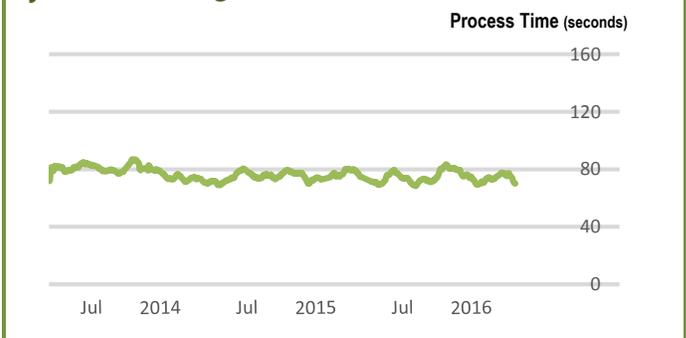

Booth hours ... sharp decrease in 2015

Wait Time ... steadily decreasing

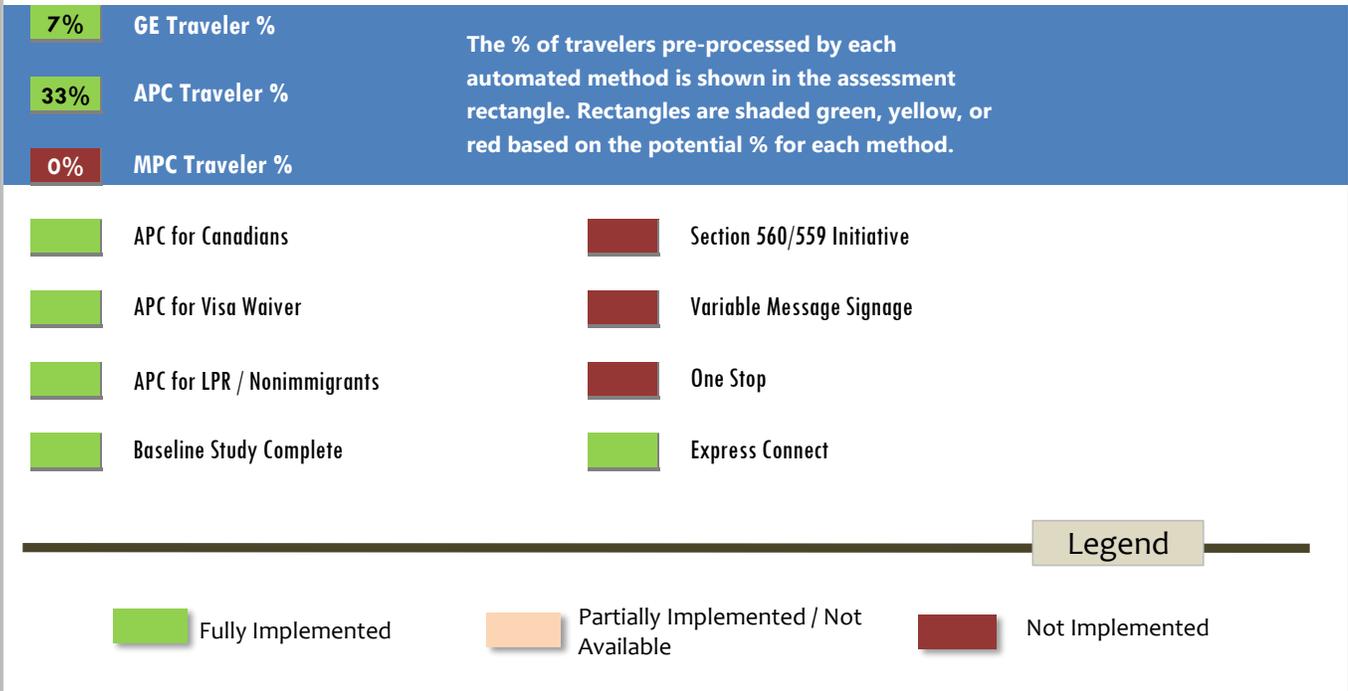

Cycle Time ... slight downward trend since 2014

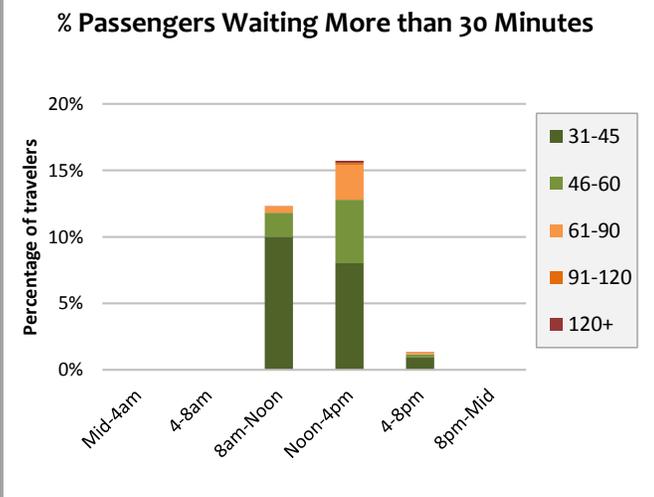

Best Practice Inventory

LAX-7 Best Practice Assessment: LAX-7 has not implemented many of the available best practices. Most notably, 40% of LAX-7's passengers are now processed by Global Entry and APC. APC is available at LAX Bradley not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

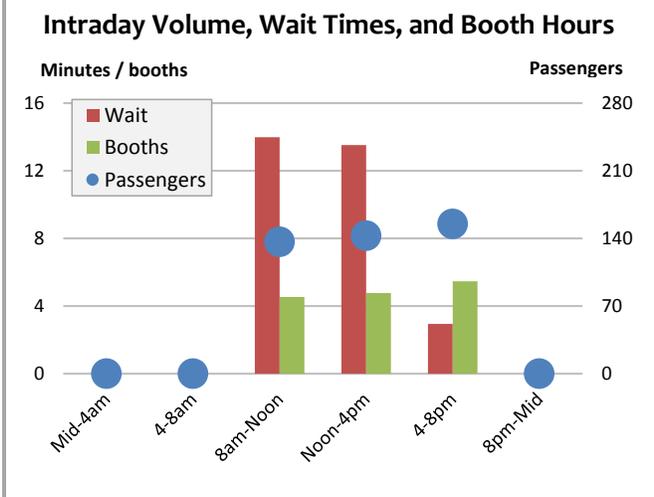

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

9% of passengers wait more than 30 minutes
 While very few Terminal 7 passengers wait more than 1 hour (about 1%), approximately 9% wait more than 30 minutes. Between the hours of Noon to 4pm, 16% of passengers wait more than 30 minutes.

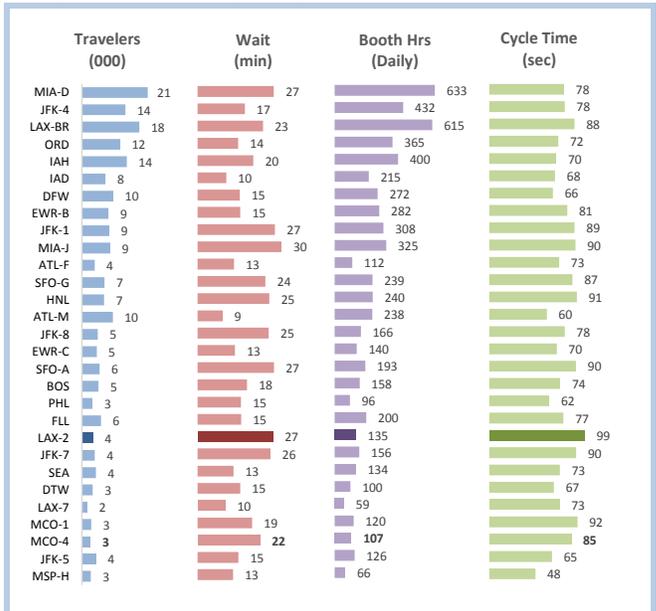

The highest waits are from 8am to 4pm
 LAX-7 is busiest between 4pm and 8pm, when 150 passengers arrive per hour. Waits are lower than the average. The waits are highest from 8am to 4pm. Opening one extra booth from 8am to 4pm could greatly reduce waits.

Compared to other major airports ...

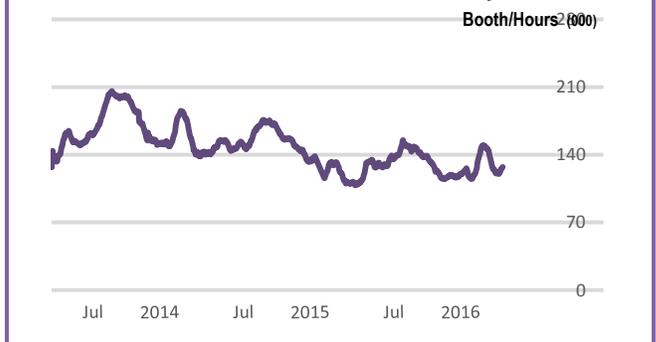

Automation needed to speed processing; Slowest cycle time in the nation

- Travel is up at LAX Terminal 2.** Traveler volume (year to date) has increased 12% compared to last year. Only 2% of passengers are confirmed with Global Entry today, up from 1% last year. APC is not implemented.
- More booths compared to last year.** Booth hours have increased (12%), up from 120 hours a year ago to 135 hours this year. However, the booth increase is not enough to reduce wait time, as shown by increase in waits (+15%).
- Slower processing.** Average cycle time increased by 4.4 seconds, while max hourly throughput decreased by 1.7 passengers per booth, per hour. Lax-2 is one of the few terminals in the nation with decreasing efficiency, and has the slowest average processing in the nation.
- Wait times increased by 15%.** Insufficient booth hours and longer process times have led to increase in wait time. The average wait time increased by 15%, from 23.2 minutes last year to 26.7 minutes this year.

Traveler Volume ... 12% more travelers than last year

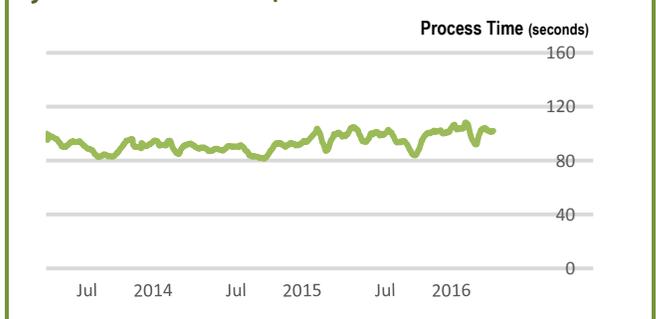

Booth Hours ... 12% more booths than last year

Wait Time ... trending upward

Cycle Time ... recent upward trend

Best Practice Inventory

LAX-2 Best Practice Assessment: LAX-2 has not introduced many of the available best practices. Automated processing such as Global Entry is implemented, however only 2% of travelers are utilizing it. To fulfill its potential, LAX Terminal 2 needs to utilize more best practices, especially APC.

2%	GE Traveler %	The % of travelers pre-processed by each automated method is shown in the assessment rectangle. Rectangles are shaded green, yellow, or red based on the potential % for each method.
0%	APC Traveler %

35% of passengers wait more than 30 minutes

Year to date, approximately 6% of Terminal 2 passengers wait more than 1 hour. Between the hours of Noon to 4pm, 42% of passengers wait more than 30 minutes.

Lax-2 has highest waits in off peak hours

The busiest hours are between 8pm and Midnight, when 310 passengers arrive per hour. Wait times during peak hours are 25 minutes, which is lower than the average. By opening more booths from 8am-8pm, LAX-2 may reduce average waits.
