ACE Adoption Rate Monthly Report — September 2016

ABO sunsets the ACE Adoption Rate (AAR) report after 22 editions.

Originally scheduled for October 2016, CBP is targeting January 2017 for the revised deployment and mandatory use of ACE for liquidation, drawback, reconciliation, duty deferral, collections, statements, and the Automated Surety Interface. These capabilities are operational in the Certification environment (CERT) and CBP encourages trade users to take advantage of the additional time to test their software fully.

Fiscal Year 2016 Summary In Numbers

$2.3T
