  - 135 Border Patrol stations and 20 substations within 20 sectors, with 35 permanent checkpoints
  - 14 Air and Marine branches, 5 National Security Operations, and one Air and Marine Operations Center
SNAPSHOT
A SUMMARY OF CBP FACTS AND FIGURES

TOP RESPONSIBILITIES

**Border Security:** CBP secures America’s borders at and between ports of entry by stopping inadmissible people and illicit goods. CBP’s offices of Field Operations, Border Patrol, and Air and Marine Operations represent the largest federal law enforcement agency.

**Trade:** CBP works to secure and facilitate imports arriving in the U.S., accommodating the increasing volume and complexities of international trade. CBP protects U.S. agricultural resources through active inspections at ports of entry. With the Container Security Initiative, Customs-Trade Partnership Against Terrorism, and the Automated Commercial Environment, CBP has a sturdy base of partnerships and technology to safeguard the American public and promote legitimate international commerce.

**Travel:** Over a million times each day, CBP officers welcome international travelers and returning U.S. citizens into the United States. CBP secures and facilitates legitimate travel by growing trusted traveler programs, embracing business transformation initiatives, fostering public-private partnerships, and employing robust targeting and risk assessment strategies. Working closely with stakeholders, CBP keeps international travelers informed, secures the travel environment, and promotes modern global tourism.

KEY PROGRAMS AND INITIATIVES

**Global Entry:** This program allows pre-approved, low-risk U.S. citizens and lawful permanent residents expedited clearance upon arrival into the U.S. Participants enter using automated self-service kiosks and are generally exempt from routine CBP questioning.

**Electronic System for Travel Authorization:** ESTA is an automated system used to determine the eligibility of visitors from Visa Waiver countries prior to boarding a carrier to travel to the U.S. ESTA enhances the security of these travelers and will allow the U.S. government to continue to expand the program with our most trusted allies.

**Customs-Trade Partnership Against Terrorism:** Under C-TPAT, importers who meet certain security standards are provided expedited processing benefits. This enables CBP to facilitate legitimate trade while focusing resources on unknown or high-risk shipments.

**Automated Commercial Environment:** ACE is a modernized commercial trade processing system with features designed to consolidate and automate border processing. It provides a solid technology foundation for all border security initiatives within CBP.

**Centers of Excellence and Expertise:** These centers work with the international trade community to transform CBP’s approach to trade operations. The Centers increase the use of uniform practices across ports of entry, help to timely resolve trade compliance issues nationwide, and further strengthen critical agency knowledge of key industry practices. Centers of Excellence and Expertise for 10 different industries operate nationwide.

**Preclearance:** Through CBP preclearance, CBP officers and agriculture specialists perform the same immigration, customs, and agriculture inspections of air passengers on foreign soil — prior to boarding a direct flight to the U.S. — without further CBP processing or security screening upon arrival. This creates opportunities for increased security, economic growth, and an improved passenger experience.
