U.S. Customs and
Border Protection

Change log for April 2015

CAMIR Input to Customs and Border Protection

Renumber pages

Record Identifier M01

Page EXP 18

Change:

This is a mandatory record used to transmit vessel information and specific manifest data. Once the original manifest (ACR record positions 14-15 code ‘**MI**’) has been transmitted and accepted, the M01 record becomes ‘frozen’. In any subsequent amendments or actions (ACR record positions 14-15 “**UI**”, “**HI**”, “**II**”, “**TI**”) the mandatory and required elements in the M01 record in the original manifest must be submitted.

To:

Once the original manifest (ACR record positions 14-15 code ‘**XI**’) has been transmitted and accepted, the M01 record becomes ‘frozen’. In any subsequent amendments or actions (ACR record positions 14-15 “**UI**”, “**HI**”) the mandatory and required elements in the M01 record in the original manifest must be submitted.

EXP – 2 (there seems to be numerous EXP-2 pages). Perhaps the Version wound up in place of the page number.

OUTPUT RECORD USAGE MAP

Third paragraph

Change:

The following table illustrates how the automated interface expects repeating groups to be structured within an original Export Manifest submission response (**MR**), Standalone House BOL submission response (**PR**) or Export Manifest amendment response (**AR**). Additional notes are provided for clarification on looping structures.

To:

The following table illustrates how the automated interface expects repeating groups to be structured within an original Export Manifest submission response (**XR**), Standalone House BOL submission response (PR) or Export Manifest amendment response (**UR**). Additional notes are provided for clarification on looping structures.

3. EXP-2

Record Identifier A01

Change:

This is a conditional record used to identify the type of Export Manifest amendment being transmitted. This record is required when an ACE participant amends the manifest quantity or adds or deletes a bill of lading. The A01 record is not included for original Export Manifest submissions. When a manifest is arrived the A01 record is required to add a new Bill of Lading or amend an existing Bill of Lading. This record is required with the ACR Application Identifier is **AI**.

When a manifest is arrived the A01 record is required to add a new Bill of Lading or amend an existing Bill of Lading. This record is required with the ACR Application Identifier is **UI**.

ECM – page 14

Valid Message Codes, under Code “8” the Description shows:

8 Departure of vessel for foreign

Also, under Note 1 – Continued (ECM-page 15)

Here is what the IG says

Change:

- If the message code is 8 (foreign departure), the vessel has departed the **last load port** for a foreign destination.

To;

- If the message code is 8 (foreign departure), the vessel has departed the **U.S. Port of Export** This message should be reported for **each U.S. Port of Export**
