CBP and Trade Automated Interface Requirements

Appendix T - In-bond Common Errors

November 2019

Appendix T

In-bond Common Errors

The In-bond Error Message Dictionary identifies error messages encountered in transmitting ACE ABI CATAIR records in QP and WP format and explains the reason for the error message.

Table of Changes

Date of Change	Section(s) Affected	Brief Description of Change
November 2019		Errors 372 added for when an attempt is made to Arrive an In-bond at a port different from a previously specified QP In-bond Destination Port.
August 2019		Error 096 (Run has been Terminated) should be reported to your CBP client rep. Error 109 (Invalid Bonded Carrier ID) may occur if a carrier has no Type 2 bond on file.

001   **QP30 RECORD MISSING**

Record Identifier QP30 - QP10 Action Code is 'A' and QP30 record is missing.

or

Record Identifier QP30 – QP10 Action Code is 'B' and QP30 record is missing.

002   **QP10 COUNT EXCEEDED**

Record Identifier QP10 - Used more than once per B-Y Block for QP10 Action Codes 'A' and 'B'.

or

Record Identifier QP10 - Used more than 999 times per B-Y Block for QP10 Action Code 'D'.

003   **QP40 RECORD MISSING**

Record Identifier QP40 - Data was not transmitted when full bill data is transmitted within the QP message.

004   **NO SHIPPER DATA FOUND**

Record Identifier QP50 - Data was not transmitted when full bill data is transmitted within the QP message.

005   **NO CONSIGNEE DATA FOUND**

Record Identifier QP55 Consignee Name/Address Record - Not transmitted when full bill data is transmitted within the QP message.

006   **QP30 LOOP COUNT EXCEEDED**

Record Identifier QP30 - Used more than 9999 times per QP10.

007   **NO CARGO DESC DATA FOUND**

Record Identifier QP71 - Data was not transmitted when full bill data is transmitted within the QP message.

008   **NO INBOND DATA FOUND**

Record Identifier QP10 - In-bond Number data element is missing.

or

Record Identifier QP10 - In-bond Number not on file for QP30 Bill Delete.

or

Record Identifier QP10 - In-bond Number not on file for QP10 In-Bond Delete.

009   INVALID CARRIER CODE

Record Identifier QP10/QP20 - Carrier Code data element contains a code not in carrier record file.

or

Record Identifier QP10/QP20 - Carrier Code is missing.

010   INVALID TRANSPORTATION MODE

Record Identifier QP20 - Mode of Transportation Code data element contains values not specified in the Implementation Guide.

or

For WP to report FDA Prior Notice, this error is returned if the affirmation of compliance RNO (Rail Car Number) is sent with an MOT other than RAIL (20 or 21).

011   INVALID VESSEL COUNTRY CODE

Record Identifier QP20 - Importing Vessel Country Code data element contains invalid country code.

012   INVALID VOYAGE

Record Identifier QP20 - Voyage Number data element is missing.

or

Record Identifier QP20 - Voyage Number data element cannot contain special characters.

013   NO MAN UNIT CODE FOR BL

Record Identifier QP40 - Manifest Unit code is not specified in the Implementation Guide.

or

Record Identifier QP71 - If provided, Manifest Unit Code is not specified in the Implementation Guide.

014   INVALID UNLADING PORT

This message is not currently being used.

015   INVALID EST ARR DATE RANGE

Record Identifier QP20 – When creating non-withdrawal in-bonds the date in the Estimated Date of Arrival data element is before or after 270 days from the processing date of the inbound message.

016   **QP32 COUNT EXCEEDED**

Record Identifier QP32 - Used more than once per QP30.

017   **INVALID BOL**

Record Identifiers QP30 - Bill of Lading Sequence Number data element contains spaces or is not alpha/numeric.

018   **QP33 COUNT EXCEEDED**

Record Identifier QP33 - Used more than 999 times per QP30.

019   **QP40 LOOP COUNT EXCEEDED**

Record Identifier QP40 - Used more than once per QP30.

020   **INVALID WEIGHT**

Record Identifier QP40 - Contains weight information in a format other than numeric, not greater than 0, or is missing.

021   **INVALID WEIGHT UNIT**

Record Identifier QP40 - Weight Unit data element is missing or contains an invalid value per the Implementation Guide.

022   **INVALID VOLUME**

Record Identifier QP40 - Volume Unit data element is provided without Volume data element, or Volume data element is other than numeric or is not greater than zero.

023   **INVALID VOLUME UNIT**

Record Identifier QP40 - Volume data element is provided without Volume Unit data element or Volume Unit data element contains an invalid value per the Implementation Guide.

024   **MISSING NAME**

Record Identifier QP50, QP55, or QP60 - Foreign Shipper, Consignee, or Notify Name/Code data element is missing.

025   **MISSING ADDRESS**

Record Identifier QP50, QP55, or QP60 - Foreign Shipper, Consignee, or Notify Address data element is missing.

026   INVALID SNP PROFILE - XXXXXXXXX

Record Identifier QP32 - Where XXXXXXXXX is the Secondary Notify Party (SCAC, FIRMS, or ABI Routing Code) that does not have a valid EDI profile.

027   QP50/QP55/QP60 COUNT EXCEEDED

Record Identifier's QP50 or QP55 - Used more than once per bill of lading (QP30 Record).

or

Record Identifier QP60 - Used more than three times per Bill of Lading (QP30 Record).

028   QP51/QP56/QP61 COUNT EXCEEDED

Record Identifier's QP51, QP56, or QP61 - Used more than once per QP51/QP56/QP61 Record loop.

029   QP52/QP57/QP62 COUNT EXCEEDED

Record Identifier's QP52, QP57, or QP62 - Used more than once per QP52/QP57/QP62 Record loop.

030   INVALID INBOND ENTRY TYPE

Record Identifier QP10 - In-bond Entry Type data element contains anything other than 61, 62, or 63.

or

Record Identifier QP10 - In-bond Entry Type is missing.

031   DUPLICATE CONTAINER FOR THE BILL

Record Identifier QP65 - Cannot repeat the container number or 'NC' within the same bill.

032   INVALID INBOND NUMBER

Record Identifier QP10 - Contains a Conventional In-bond Number where first 8 characters are either not numeric or are all zero's.

or

Record Identifier WP10 - Does not contain an In-bond Number data element when required for specific Action Codes as specified within the Implementation Guide for WP.

033   INVALID PORT

Record Identifier QP10 and QP20 - U.S. Port of Destination or Port of Importing Conveyance Arrival data element is missing.

or

Record Identifier QP20 – Port of Importing Conveyance Arrival data element contains a code that does not appear in the Census Schedule D port code list.

or

Record Identifier QP10 - U.S. Port of Destination data element contains a code that does not appear in the Census Schedule D port code list.

or

Record Identifier WP20 - When provided, the Port of Arrival data element contains a code that does not appear in the Census Schedule D port code list.

034   INVALID FOREIGN PORT

Record Identifier QP40 - The Foreign Port of Lading is missing.

or

Record Identifier QP40 - The Foreign Port of Lading contains a code that does not appear in the Census Schedule K Foreign Port code list.

or

Record Identifier QP10 - Foreign Port of Destination is missing for In-Bond Entry Type 62 (T&E-Transport & Export or 63 (IE-Immediate Export).

or

Record Identifier QP10 - Foreign Port of Destination contains a code that does not appear in the Census Schedule K Foreign Port code list.

035   INVALID DOLLAR VALUE

Record Identifier QP10 - The Value data element is missing when QP10 Action Code is 'A'.

or

Record Identifier QP10 - Value data element contains data that is not numeric or a '0' when QP10 Action Code is 'A'

036   QP70 COUNT EXCEEDED

Record Identifier QP70 - Used more than 999 times per QP65.

037   WP10 LOOP COUNT EXCEEDED

Record Identifier WP10 - Used more than 9999 times per envelope.

038   **BOL ALREADY ON FILE**

Record Identifier QP30 - The QP dataset cannot contain Record Identifiers QP40 thru QP76 when the Bill is already on file.

039   **WP20 COUNT EXCEEDED**

Record Identifier WP20 - Used more than once per WP10.

040   **BILL NOT ON FILE**

Record Identifier QP30 - Action Code data element with 'D' was transmitted to delete the Bill but the Bill was not on file.

or

Record Identifier QP30 – Action Code data element with 'A' was transmitted to add the Bill to the In-Bond but the Bill was not on file.

041   **MISSING CONTAINER NUMBER**

Record Identifier QP65 - The Container Number data element is missing.

042   **INVALID QUANTITY**

Record Identifier QP30 – When provided, In-bond Quantity data element contains data that is not numeric.

or

Record Identifier QP40 - Manifest Quantity data element contains a quantity that is not numeric, equal to '0', or is missing.

or

Record Identifier QP71 - Piece Count data element contains a quantity that is not numeric or is missing.

043   **INVALID INBOND CHECK DIGIT**

Record Identifier QP10 - In-bond Number data element contains an invalid In-bond Check Digit.

044   **INVALID VESSEL NAME**

This message is not currently being used.

045   ACTION CODE INVALID OR MISSING

Record Identifier QP10 - Action Code data element is missing.

or

Record Identifier QP10 - Action Code data element contains anything other than a valid code per the Implementation Guide.

or

Record Identifier QP30 - Action Code data element is missing.

or

Record Identifier QP30 - Action Code data element contains anything other than a valid code per the Implementation Guide.

or

Record Identifier WP10 - Action Code data element contains anything other than a valid code per the Implementation Guide.

046   INVALID AMENDMENT CODE

This message is not currently being used.

047   MISSING DESCRIPTION

Record Identifier QP71 - Description data element is missing.

048   INVALID SNP - XXXXXXXXX

Record Identifier QP32 - Where XXXXXXXXX is the Secondary Notify Party (SCAC, FIRMS, or ABI Routing Code) that contains a code that does not appear on file.

or

Record Identifier QP32 – When QP32 is provided, at least the first Secondary Notify Party in positions 3 to 11 must be provided.

049   SCAC NOT ELIGIBLE FOR NOTIFICATION

This message is not currently being used.

050   INVALID ESTIMATED ARRIVAL DATE

Record Identifier QP20 - Original Scheduled Date of Arrival data element contains an arrival date in format other than MMDDYY for CATAIR.

051   MASTER INBOND NOT INDICATED ON BL

This message is not currently being used.

052   **BILL COUNT NOT = BILLS READ**

This message is not currently being used.

053   **ACTUAL ARRIVAL DATE INVALID**

This message is not currently being used.

054   **PORT NOT = P01/P4 PORT**

This message is not currently being used.

055   **INVALID LAYORDER DATE**

This message is not currently being used.

056   **VESSEL NOT ON FILE**

This message is not currently being used.

057   **INVALID WEIGHT OR MEASURE**

This message is not currently being used.

058   **ACCUMULATED QTY NOT = BILL QTY**

Record Identifier QP40 - Manifest Quantity data element contains a quantity that does not equal the sum of Piece Counts on the Record Identifier QP71.

059   **REQUIRED AS OF ACT ARR DATE**

This message is not currently being used.

060   **BILL REJECTED**

This message is not currently being used.

061   **MANIFEST REJECTED**

This message is not currently being used.

062   **PORT REJECTED**

This message is not currently being used.

Just kidding.

063   BILL ACCEPTED

This message is not currently being used.

064   BILL CLOSED NO ACTIONS ALLOWED

This message is not currently being used.

065   BILL PASSED EDITS

This message is not currently being used.

066   QP75 LOOP COUNT EXCEEDED

Record Identifier QP75 - Transmitted in excess of the allowable 99 Hazardous Material records per container per bill of lading set.

067   HAZMAT CODE MISSING

Record Identifier QP75 - Hazardous Material Code data element is missing.

or

Record Identifier QP75 - Hazardous Material Code data element contains an invalid value.

068   HAZMAT DATA OUT OF ORDER

Record Identifier QP76 - Appears before Record Identifier QP71 and QP72.

or

Record Identifier QP76 - Transmitted without an accompanying Record Identifier QP75 Loop Header.

069   QP76 COUNT EXCEEDED

Record Identifier QP76 - Transmitted in excess of the allowable two Record Identifier QP76 records per Record Identifier QP75.

070   INV HAZMAT CODE QUAL

Record Identifier QP75 - If provided, Hazardous Material Code Qualifier is not found in the Implementation Guide.

071   INVALID FLASHPOINT TEMP

Record Identifier QP75 - If provided, Flashpoint Temperature must be numeric.

072   INV FLASHPOINT TEMP UOM

Record Identifier QP75 - If provided, Flashpoint Temperature UOM is not found in the Implementation Guide.

073   NO HARMONIZED NUMBER FOUND

Record Identifier QP70 - When provided and In-bond Type is T&E '62' or IE '63', the Harmonized Number data element is required.

074   INCORRECT HARMONIZED NUMBER

Record Identifier QP70 - If provided, Harmonized Number Data Element contains data that does not appear in Harmonized Schedule file.

075   COMM VALUE MISSING OR INV

Record Identifier QP70 - When Record Identifier QP10 In-bond Entry Type is T&E '62' or IE '63', the Value data element is missing.

or

Record Identifier QP70 - Value data element is not numeric.

076   COMM WEIGHT MISSING OR INV

Record Identifier QP70 - When Record Identifier QP10 In-bond Type is T&E '62' or IE '63', the Weight data element is missing.

or

Record Identifier QP70 - Weight data element is not numeric.

or

Record Identifier QP70 - Weight data element is missing when Weight Unit is provided.

077   COMM WEIGHT UNIT INVALID

Record Identifier QP70 - When Record Identifier QP10 In-bond Type is T&E '62' or IE '63', the Weight Unit data element contains an invalid value per the Implementation Guides.

or

Record Identifier QP70 - Weight Unit data element is missing when Weight data element is provided.

078   MARKS AND NUMBERS MISSING

Record Identifier QP72 - Marks and Numbers data element is missing.

079   INVALID FDA BTA IND - MUST BE Y OR N

Record Identifier QP10 - The FDA Indicator is required for In-bond Entry Type IT '61' or T&E '62'. When required, BTA/FDA Indicator data element in Record Identifier QP10 must be 'Y' for yes or 'N' for no.

080   FTZ IND MUST BE Y ORBLANK

Record Identifier QP10 - The FTZ Indicator is not 'Y' or ' ' (space).

081   MANIFEST TRANSMITTAL

This message is not currently being used.

082   MASTER IB-LESS THAN 48 HOURS

This message is not currently being used.

083   QTY NOT EQUAL BILL QTY

This message is not currently being used.

084   INV FLSHPNT TEMP NEG IND

This message is not currently being used.

085   MISSING ENTRY NUMBER

This message is not currently being used.

086   MISSING ENTRY TYPE

This message is not currently being used.

087   INVALID ENTRY TYPE

Record Identifier FD05 - The Entry Type given in WP for affirmation code 'ETP' is not valid.

088   MISSING RELEASE DATE

This message is not currently being used.

089   CARRIER GO4 TRANSMISSION

This message is not currently being used.

090   SEND GO AFTER VESSEL ARRIVAL

This message is not currently being used.

091   INVALID ENTRY NUMBER

Record Identifier FD05 - The Entry Number given in WP for affirmation code 'ENT' is not valid.

092   INBOND INTERFACE COMPLETED

This message is not currently being used.

093   VESSEL MUST BE ARRIVED

Record Identifier WP10 - Vessel must be arrived before the in-bond arrival.

094   PROBLEM IN INBOND INTERFACE

This message is not currently being used.

095   BOL HDR DATA MISSING

This message is not currently being used.

096   RUN HAS BEEN TERMINATED

The transmission was terminated for a database problem. Report problem to ~~USCBP help desk at 1-800-927-8729~~your assigned CBP Client Representative.

097   PLEASE CALL CLIENT REP

This error message accompanies error messages 989 thru 999.

098   NOT AUTHORIZED TO TRANSMIT

This message is not currently being used.

099   DB ERROR ON XRE FILE

This message is not currently being used.

100   INVALID PROCESS MODE ON XRE

This message is not currently being used.

101   NOT TEST/OPERATIONAL MODE

This message is not currently being used.

102   NO OPEN BILL(S) FOR PROCESSING

Record Identifier WP10 - Contains a Bill or In-bond Number that where the Status prevents the action from being accepted (the Bills are deleted or the In-bond is concluded).

103   BILL ALREADY DELETED

This message is not currently being used.

104   INVALID ESTIMATED ARRIVAL DATE

This message is not currently being used.

105   INBOND NUMBER USED AT ANOTHER PORT

This message is not currently being used.

106   DELETE BILL WITHOUT QP40 TO QP76

Record Identifiers QP40 to QP76 – These records must not be included with a QP30 Action Code of 'D'.

107   INBOND DB ERROR-POSSIBLY FILE FULL

This message is not currently being used.

108   BONDED CARRIER ID REQUIRED

Record Identifier QP10 – Bonded Carrier ID is missing when the Action Code data element is 'A' to add an In-bond.

or

Record Identifier WP20 - Bonded Carrier ID is missing for Transfer of Liability or In-bond Diversion.

109   INVALID BONDED CARRIER ID

Record Identifier QP10 – Bonded Carrier ID is not on file when the Action Code data element is 'A' to add an In-bond.

or

Record Identifier WP20 - Bonded Carrier ID is not on file for Transfer of Liability or In-bond Diversion.

or

Record Identifier QP10 – Bonded Carrier ID does not have an active Type 2 (Custodial) Bond on file.

110   NOT AUTH TO USE CUST BOND

Record Identifier QP10 - Filer Code in the B Record attempting to use Bonded Carrier ID Number in QP10, not on the Custodial Bond profile.

or

Record Identifier QP10- Filer Code in the B Record attempting to use Bonded Carrier ID Number in QP10, not authorized because of termination date on the Custodial Bond profile.

or

Record Identifier QP10 - Filer Code in the B Record attempting to use Bonded Carrier ID Number in QP10, not authorized for Origin port on the Custodial Bond profile.

or

Record Identifier QP10 - Filer Code in the B Record attempting to use Bonded Carrier ID Number in QP10, not authorized for Destination port on the Custodial Bond profile.

or

Record Identifier WP20 – When the Action Code data element is Z, the Filer Code in the B Record attempting to use the Bonded Carrier ID Number in WP20 for Diversion request, not authorized for Destination port on the Custodial Bond profile.

111   AMS MIB IND-USE Y OR SPACE

This message is not currently being used.

112   HDR & INB ENTRY TYPE NOT=

This message is not currently being used.

113   INBOND DEST EXISTS FORBOL

This message is not currently being used.

114   EXPRT PORT MUST = ARR PORT

Record Identifier QP20 - If Record Identifier QP10 has in-bond entry type code 63, the In-bond Port of Destination data element in Record Identifier QP10 must be the same as the Port of Discharge data element in Record Identifier QP20.

115   ARR MESSG CODE IS REQUIRED

Record Identifier WP10 - Action Code uses Error Message 045 for this case. This message is not currently being used.

116   VALID ARR MSG =>1 2 3 4

This message is not currently being used.

117   9 DIGIT NUM REQUIRED

This message is not currently being used.

118   DATE INVALID-YYMMDD

Record Identifier WP20 - Date data element is not in numeric format.

or

Record Identifier WP20 - Date data element contains invalid month, day, and year.

119   INBOND PORT REQUIRED

Record Identifier WP20 - Port of Arrival/Export data element is missing when required for specific Action Codes as specified within the Implementation Guide for WP.

120   INBOND PREFIX NOT ON FILE

This message is not currently being used.

121   INBOND NBR MUST BEGIN WITH V

This message is not currently being used.

122   BILL NBR NOT ON FILE

Record Identifier WP10 – When Action Code data element contains 2, 3, 6, or 7 the BOL number specified is not on file or is missing.

123   INBOND NBR NOT ON FILE

Record Identifier WP10 - When Action Code data element contains code 1, the In-bond Number specified is not on file.

124   INBOND NBR ALREADY ARRIVED

Record Identifier WP10 - When Action Code data element contains code 1, the In-bond Number is already arrived.

125   BILL NBR CONCLUDED

This message is not currently being used.

126   BILL NBR ALREADY ARRIVED

Record Identifier WP10 - When Action Code data element contains code 2, the bill number is already arrived.

127   LAYORDER DATE ERROR

This message is not currently being used.

128   WP20 DATE REQUIRED

Record Identifier WP20 - The Date data element is missing or contains a '0'.

129   ARRIVAL DATE EXCEEDS TODAYS DATE

Record Identifier WP20 - When Action Code data element contains codes 1, 2, or 3, the Date data element contains an arrival date that is in the future.

130   ARRIVAL DATE OVER 120 DAYS OLD

This message is not currently being used.

131   CONTAINER ALREADY ARRIVED

Record Identifier WP20 - When Action Code data element contains code 3, the Container is already arrived.

132   ARRIVAL DATE BEFORE DEPARTURE

Record Identifier WP20 - When Action Code data element contains codes 1, 2, or 3, the Date data element contains an arrival date at the destination port that is before the departure date for the entity being arrived.

133   TOL DATE EXCEEDS TODAYS DATE

Record Identifier WP20 - When Action Code data element contains code A the Date data element contains a Transfer of Liability date that is in the future.

134 **TOL DATE EXCEEDS TODAYS TIME**

Record Identifier WP20 - When Action Code data element contains code A and the Transfer of Liability Date is the current date, the Time data element contains a Transfer of Liability time that is in the future.

135 **NO CONTAINER DATA FOUND**

This message is not currently being used.

136 **INVALID ISSUER CODE**

Record Identifier QP30 – Issuer Code of Master Bill of Lading data element is not a valid SCAC or FIRMS code.

137 **NO ISSUER CODE FOUND**

Record Identifier QP30 - Issuer Code of Master Bill of Lading data element is missing.

138 **INV MOT FOR EXP REPORTING**

Record Identifier WP20 – When provided, and Action Code data element contains code 5, 6 or 7 the Export MOT data element is not equal to '10' or '11' per Implementation Guides.

or

Record Identifier WP20 – When Action Code data element contains code 5, 6 or 7 the Export MOT data element is missing when Export Conveyance is given.

139 **INV CONV FOR EXP REPORTING**

Record Identifier WP20 – When Action Code data element contains code 5, 6 or 7 the Export Conveyance is missing when Export MOT data element is given.

140 **BOL NOT AVAILABLE FOR USE**

Record Identifier QP30 - Bill of Lading contains a bill number that has been used within the past 3 years and is not active.

141 **PENDING ARCHIVE -NO ACTION ALLOWED**

This message is not currently being used.

142 **UNAUTHORIZED TO TRANSMIT**

Record Identifier B - The Broker is not authorized for In-bond in the Broker Profiles.

or

Record Identifier B - The Broker/Transmitter's profile contains an Application ID for which the Broker/Transmitter is not configured.

143 **INVALID DP-SITE_PORT**

Record Identifier B - The Broker Profile is not found for the Broker Port combination.

144 **TIME IS INVALID**

Record Identifier WP20 - Time data element is not in a 24-hour clock format or is missing.

145 **VESSEL ARRIVAL DATE OVER 30 DYS**

This message is not currently being used.

146 **SEAL NUMBER MISSING**

This message is not currently being used.

147 **VESSEL CODE/NAME REQUIRED**

Record Identifier QP20 - The Importing Vessel Name data elements is missing for non-withdrawal QP messages.

148 **INCORRECT VESSEL CODE**

This message is not currently being used.

149 **REPLACE BOL MUST BE OPEN STATUS**

This message is not currently being used.

150 **OLD CONTAINER NUMBER NOT ON FILE**

This message is not currently being used.

151 **INCORRECT VESSEL NAME**

This message is not currently being used.

152 **CONV NAME INVALID**

Record Identifier QP20 - Importing Conveyance Name data element contains one or more slashes or special characters not in the 'American English Keyboard'.

153 **VESSEL ARR NOT AUTHORIZED FOR PORT**

This message is not currently being used.

154 **ARRIVAL TIME IS IN THE FUTURE**

Record Identifier WP20 - When Action Code data element contains codes 1, 2, or 3 and the Arrival Date is the current date, the Time data element shows an Arrival Time that is in the future.

155 **H01 ALREADY SUBMITTED FOR PORT**

This message is not currently being used.

156 **BILL NUMBER REQUIRED**

Record Identifier QP30 - The Issuer Sequence of Master Bill of Lading data element is missing.

157 **FIRMS CODE REQUIRED**

Record Identifier FD05 - The FIRMS Code data element is blank in the WP application.

158 **FIRMS CODE NOT ON FILE**

Record Identifier FD05 - The FIRMS Code data element in the WP application contains a code not in the FIRMS file.

or

Record Identifier WP10 – When provided, FIRMS Code data element contains a code not in the FIRMS file.

159 **FIRM NOT ACTIVE**

Record Identifier WP10 – When provided, the FIRMS Code data element contains a code not classified as active in the FIRMS file.

160 **FIRM NOT BONDED**

This message is not currently being used.

161 **PTT ALREADY AUTHORIZED**

This message is not currently being used.

162 **BILL STATUS NOT ELIGIBLE FOR PTT**

This message is not currently being used.

163 **BILL TYPE NOT ELIGIBLE FOR PTT**

This message is not currently being used.

164 **FIRM NOT ON FILE FOR PORT**

Record Identifier WP10 – When provided, FIRMS Code data element contains a code not on file for this port of In-bond arrival.

165 **CONTAINER NOT ON FILE FOR BILL**

Record Identifier WP10 - When Action Code data element is 3 or 7 the Container Number data element contains a Container Not On File For Bill or Container Not On File.

166 **EXPORT DATE BEFORE ARRIVAL DATE**

Record Identifier WP20 – When Action Code data element contains codes 5, 6, or 7 the request to export the in-bond is rejected because the in-bond has not been arrived.

or

Record Identifier WP20 - When Action Code data element contains codes 5, 6, or 7 the Date data element has an in-bond export date that is before the arrival date that is on file for the in-bond.

167 **EXPORT DATE ALREADY ON FILE**

Record Identifier WP20 – When Action Code data element contains codes 5, 6, or 7 the status of the in-bond indicates that the in-bond is already exported.

168 **CONTACT CLIENT REP TO EXP**

This message is not currently being used.

169   NOT AUTHORIZED FOR EXP AT THIS PORT

This message is not currently being used.

170   NOT AUTHORIZED FOR THIS ENTRY TYPE

This message is not currently being used.

171   NOT AUTHORIZED FOR PAPERLESS MIB

This message is not currently being used.

172   EXP DATE LESS THAN IB ARR DT

This message is not currently being used.

173   ENTRY TYPE NOT ELIGIBLE FOR EXPORT

Application WP - The entry type for the In-bond being exported show an entry type other than 62 or 63.

174   PORT OF DEST NOT FOR EXPORT

This message is not currently being used.

175   EXPORT DATE IS IN FUTURE

Record Identifier WP20 - When Action Code data element contains codes 5, 6, or 7 the Date data element shows an exportation date that is in the future.

176   EXPORT TIME IS IN FUTURE

Record Identifier WP20 - When Action Code data element contains codes 5, 6, or 7 and the Export Date is the current date, the Time data element shows an exportation time that is in the future.

177   WP10 PREV IB CONCLUDED

Record Identifier WP10 - When Message Code data element is 1, 2, 3, 5, 6, 7, A, or Z, the action is not allowed against a Previous In-bond Number.

178   PREVIOUS INBOND NOT FOUND

Record Identifier QP30 - Previous In-bond Number was not on file.

179   BILL IN HELD STATUS

Record Identifier WP10 - When Action Code data element contains codes 5, 6, or 7 and there is a container level hold on any of the containers on the in-bond.

or

Record Identifier WP10 - When Action Code data element contains codes 5, 6, or 7 and there is a bill level hold on any of the bills on the in-bond for the Transfer of Liability.

or

Record Identifier WP10 - When Action Code data element contains code A and there is a bill level hold on any of the bills on the in-bond.

or

Record Identifier WP10 - When Action Code data element contains code A and there is a container level hold on any of the containers on the in-bond for the Transfer of Liability.

180   MISSING QUANTITY

This message is not currently being used.

181   PREV INBOND MOVE MUST BE ARRIVED

Record Identifier QP30 - The previous in-bond movement must be arrived before you can add a second in-bond movement.

182   PREVIOUS IN-BOND INVALID FOR TYPE 63

Record Identifier QP30 - The in-bond number in the Previous In-bond Number data element cannot be type 63.

183   PREVIOUS IN-BOND ALREADY EXPORTED

Record Identifier QP30 – The in-bond number in the Previous In-bond Number data element cannot be in exported status.

184   IN-BOND NBR EXISTS FOR THIS BILL

This message is not currently being used.

185   MIB ENTRY NOT PREV ENTRY

Record Identifier QP10 - In-bond Type Code must match existing data when QP is used to add additional Bills to existing In-bonds.

186 **B03/I01 PAIR REQUIRED**

This message is not currently being used.

187 **INVALID INTERMEDIATE PORT 1**

This message is not currently being used.

188 **INVALID INTERMEDIATE PORT 2**

This message is not currently being used.

189 **INVALID INTERMEDIATE PORT 3**

This message is not currently being used.

190 **INVALID INTERMEDIATE PORT 4**

This message is not currently being used.

191 **INVALID INTERMEDIATE PORT 5**

This message is not currently being used.

192 **MISSING CITY NAME**

Record Identifier WP20 - When Action Code data element is A the city name data element is missing for Transfer of Liability.

193 **MISSING OR INVALID STATE OR PROVINCE**

Record Identifier FD05 - Has a state code that is invalid for the United States or Canada.

or

Record Identifier WP20 - When Action Code data element is A the state code data element is blank for Transfer of Liability.

194 **INTER PORT IND INVALID FOR MSG**

This message is not currently being used.

195   **M01/B03 DATA DOES NOT MATCH HDR**

This message is not currently being used.

196   **INVALID SECONDARY SCAC 2**

This message is not currently being used.

197   **HS-VAL-WGT REQ FOR EXPORT INB**

This message is not currently being used.

198   **FILER ERROR**

This message is not currently being used.

199   **REC 10 MISSING/INVALID**

This message is not currently being used.

200   **QP65 LOOP COUNT EXCEEDED**

Record Identifier QP65 - Number of QP65 Records exceeds 999 per QP30 Record.

201   **REC 10 AND 30 ACTS NOT CONSISTENT**

Record Identifiers QP10 and QP30 - Action Codes are not consistent. For QP10 Action Code of 'A', QP30 Action Code of 'A' is valid. For QP10 Action Code of 'B', QP30 Action Code of 'D' is valid.

202   **INVALID BILL IND**

This message is not currently being used.

203   **INBOND NOT FOUND**

Record Identifier QP10 - In-bond is not on file for QP10 In-bond Delete.

204   **INVALID DEST FOR INB IN QP10**

Record Identifier QP10 - U.S. Port of Destination is equal to the Port of Importing Conveyance Arrival on the QP20 for an In-bond Entry Type IT '61' or T&E '62'.

205   **NO BILL ON FILE**

This message is not currently being used.

206   **LINE MISSING OR OUT OF SEQUENCE**

Application QP - This error accompanies Error Message 003 when the QP40 record is missing, Error Message 005 when the QP50 record is missing, Error Message 041 when the QP65 record Container Number field contains spaces, or Error Message 106 when bill data (records QP40 to QP76) are provided on a Bill Delete.

207   **SHELL CANNOT BE DELETED**

This message is not currently being used.

208   **INBOND DEST CANNOT = DDPP FOR TYPE 61 OR 62**

Record Identifier QP10 - When the previous in-bond is not provided and In-bond Entry Type 61 or 62 the U.S. Port of Destination must not equal the Port of Importing Conveyance Arrival on file.

209   **INBOND DELETED**

Record Identifier QP10 - This message accompanies the successful response of an In-bond delete.

210   **INBOND DEST MUST = DDPP FOR TYPE 63**

Record Identifier QP10 - When the previous in-bond is not provided and In-bond Entry Type 63 the U.S. Port of Destination must match the Port of Importing Conveyance Arrival on file.

211   **AMS BILL, DELETE DENIED**

This message is not currently being used.

212   INVALID PREVIOUS DEST PORT

Record Identifier QP10 – When the previous in-bond is provided and the In-bond Entry Type is 63, the U.S. Port of Destination must equal the actual Destination Port of the previous In-bond.

or

Record Identifier QP10 - When the previous in-bond is provided and the In-bond Entry Type is 61 or 62, the U.S. Port of Destination cannot equal the Destination Port of the previous In-bond.

213   INBOND EXISTS FOR OTHER PORTS

This message is not currently being used.

214   BILL REQUIRED FROM AMS CARRIER

This message is not currently being used.

215   AMS CARRIER, BILL REJECTED

Record Identifier QP30 - The Issuer Code of Master Bill of Lading data element cannot use an Automated Carrier SCAC to create a Bill with the QP Application using Records QP40 to QP76.

216   RECORD INVALID FOR AMS CARRIER

This message is not currently being used.

217   CONTAINER NUMBER MUST BE ALPHANUMERIC

Record Identifier QP65 - Container Number field cannot have embedded spaces or characters other than alpha/numeric.

218   **BAD INPUT RECORD**

Application ID QP - If QP10 Action Code is 'A', records other than QP10 thru QP76 are invalid.

or

Application ID QP – If QP10 Action Code is 'B', records other than QP10 and QP30 are invalid.

or

Application ID QP – If QP10 Action Code is 'D', records other than QP10 are invalid.

or

Application ID WP - Contains a Record Identifier that is invalid for the WP transaction set

219   **AMS CARRIER- REMAINING DATA REJECTED**

This message is not currently being used.

220   **BILL ACCEPTED FOR INBOND**

Record Identifier QP30 - This message accompanies the successful response of an In-bond add.

221   **BILL REJECTED- REMAINING DATA REJECTED**

Record Identifier QP20 - This message accompanies error message 244 when multiple QP20 records are provided for an In-bond QP10 Record.

222   **BILL CANNOT BE DELETED FOR AMS CARRIER**

This message is not currently being used.

223   **BILL DELETED FOR INBOND**

Record Identifier QP10 and QP30 - This message accompanies the successful response of a Bill delete.

224   **ALL BILLS DELETED FOR INBOND**

This message is not currently being used.

225   INBOND PREVIOUSLY DELETED

Record Identifier QP10 - QP10 Action Code 'D' or QP10 Action Code 'B' and QP30 Action Code 'D' - In-bond is already in deleted status.

or

Record Identifier QP10 - QP10 Action Code 'B' with QP30 Action Code 'D' - In-bond is still on file but the relationship with a specific bill is already deleted.

226   BILLS ON IB MUST HAVE SAME ORG PORT

Record Identifier QP20 - Upon adding an In-bond, if multiple Bills exist against the In-bond the Port of Importing Conveyance Arrival must be the same for all the Bills in non-deleted status on the In-bond.

or

Record Identifier QP30 – When no Previous In-bond is being reported, adding an existing In-bond to an existing BOL (QP Short) the Port of Unlading for the BOL must match the Port of Origin for the In-bond that is on file.

227   ALL BILLS ON IB MUST HAVE SAME DEST

Record Identifier QP10 - Upon adding an In-bond, if multiple Bills exist against the In-bond, the U.S. Port of Destination must be the same.

228   PREVIOUS IN-BOND NOT VALID

Record Identifier QP30 – Previous In-bond must match existing Previous In-bond data when QP is used to add additional Bills to existing In-bond.

229   DO NOT INPUT QP20

Record Identifier QP20 and QP30 - Do not include the QP20 Record when an In-bond is provided in the QP30 Previous In-bond Number field.

or

Record Identifier QP20 – Do not include the QP20 Record when QP10 Action Code is 'A' and QP30 Action Code is 'A' for an automated carrier in the QP30 Issuer Code of Master Bill of Lading data element.

230   FOREIGN PORT INVALID FOR IMM TRNSPRT

Record Identifier QP10 – Foreign Port of Destination must be spaces or zeros for In-bond Entry Type 61 (IT-Immediate Transport).

231   QP20 RECORD MISSING

Record Identifier QP20 - Required for a QP10 Action Code of 'A' and QP30 Action Code of 'A' for a non-automated carrier when using Records QP40 to QP76.

232 UNABLE TO DELETE INB LEG

Record Identifier QP10 - The request to delete a subsequent in-bond is rejected when the in-bond is listed as previous in-bond to another in-bond on file.

233 QP55 RECORD MISSING

This message is not currently being used.

234 QP65 RECORD MISSING

Record Identifier QP65 - Not transmitted when full bill data is transmitted within the QP message.

235 QP70 RECORD MISSING

Record Identifier QP70 - Not transmitted if In-bond Entry Type data element is T&E '62' or IE '63' when full bill data is transmitted within the QP message.

236 QP71 RECORD MISSING

Record Identifier QP71 - Not transmitted when full bill data is transmitted within the QP message.

237 QP72 RECORD MISSING

Record Identifier QP72 - Not transmitted when full bill data is transmitted within the QP message.

238 MOT NOT ALLOWED FOR PORT

This message is not currently being used.

239 PORT OF ARRIVAL MUST BE ASEAPORT

This message is not currently being used.

240 PORT OF ARRIVAL MUST BE LAND BORDER

This message is not currently being used.

241 FOREIGN PORT MUST BE VALID SCHEDULE K

This message is not currently being used.

242 **WP10 RECORD MISSING**

Mandatory Record Identifier WP10 - Not transmitted within the WP message.

243 **QP10 RECORD MISSING**

Mandatory Record Identifier QP10 - Not transmitted within the QP message.

244 **QP20 COUNT EXCEEDED**

Record Identifier QP20 - Used more than once per QP10.

245 **INVALID FILER FOR SECONDARY NOTIFY**

This message is not currently being used.

246 **PREVIOUS INBOND NOT FOUND**

This message is not currently being used.

247 **NO BILL SUBMITTED FOR INBOND**

This message is not currently being used.

248 **MASTER BILL NBR MUST BE ALPHANUMERIC**

Record Identifier QP30 - Issuer Sequence of Master Bill of Lading data element cannot have embedded spaces and characters other than Alpha/Numeric.

249 **ALL BILLS ON INB MUST BE SAME ENTRY TYP**

This message is not currently being used.

250 **QP72 RECORDS EXCEEDED**

Record Identifier QP72 - A maximum of 999 QP72 Records is allowed per QP65 Record.

251 **QP71 RECORDS EXCEEDED**

Record Identifier QP71 - A maximum of 999 QP71 Records is allowed per QP65 Record.

252 **WP20 RECORD MISSING**

Record Identifier WP20 - This Record is required when using WP to Arrive, Export, Transfer of Liability, or Divert an In-bond. This Record is not required when using WP10 Action Codes of 8 and 9 (FDA BTA).

253   INVALID DESTINATION PORT

Record Identifier QP10 - U.S. Port of Destination for the In-bond is not configured as an In-bond Port for the In-Bond type.

or

Record Identifier WP20 - Port of Arrival/Export is not configured as an In-bond Port for the In-Bond type.

254   DONT USE QP20 FORDELETE

This message is not currently being used.

255   INBOND EXISTS FOR THIS BILL

Record Identifier QP30 - The QP10 In-bond Number and QP30 Master Bill Number is already on file in AMS.

256   CANNOT ADD BILL TO EXISTING AMS INBOND

Record Identifier QP10 - The Action Code of 'A' cannot be used to add an In-bond on file in AMS by a source other than QP.

257   REMAINING DATA IN BLOCK REJECTED

This message is not currently being used.

258   TEMP IND MUST BE BLANK OR N

Record Identifier QP75 - The Negative Indicator must be either spaces or 'N'.

259   INBOND ALREADY ON FILE AS FTZ

Record Identifier QP10 - The Foreign Trade Zone/Warehouse Indicator must be set to 'Y' when the In-bond Number is already on file in AMS as an FTZ Withdrawal.

260   INVALID FTZ PORT

Record Identifier QP40 - The Foreign Port of Lading for FTZ Withdrawals must be 99999.

261   DATA CONTAINED IN FTZFIRMS FIELD

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code can only be provided when the QP10 Foreign Trade Zone/Warehouse Indicator is set to 'Y'.

262   INVALID FTZ FIRMS CODE

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code is not on the FIRMS code file or is missing.

or

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code must be in active status.

or

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code must be bonded.

or

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code bond type must be '2' Custodial or '4' FTZ bond.

or

Record Identifier QP20 - The Foreign Trade Zone FIRMS Code facility type must be '02' FTZ, '04' Bonded Warehouse, or '10' Multi-use Bond.

263   BILL TO DELETE IS NOT FTZ TYPE

This message is not currently being used.

264   FTZ MUST HAVE FULL BILL DATA

This message is not currently being used.

265 QP30 PREV INBOND INVALID FOR FTZ

Record Identifier QP30 - The Previous In-bond Number cannot be given when the QP10 Foreign Trade Zone/Warehouse Indicator is set to 'Y'.

266   INVALID REF # QUALIFER

Record Identifier QP33 - Qualifier data element is invalid per Implementation Guide.

or

Record Identifier QP33 - Reference Identifier Qualifier data element is missing.

267   REF # BLANK

Record Identifier QP33 - Reference Identifier data element is missing.

268   INBOND ALREADY ON FILE AS NON-FTZ

Record Identifier QP10 - The Foreign Trade Zone/Warehouse Indicator must be set to space when the In-bond Number is already on file in AMS as a non-FTZ Withdrawal.

269 **FTZ FIRMS CODE MISMATCH**

Record Identifier QP10 – When the QP10 Carrier Code is a FIRMS code it does not match the FIRMS code provided in QP20 Foreign Trade Zone FIRMS Code.

or

Record Identifier QP20 – When the QP20 Carrier Code is a FIRMS code it does not match the FIRMS code provided in QP20 Foreign Trade Zone FIRMS Code.

or

Record Identifier QP30 – When the QP30 Issuer Code of Master Bill of Lading is a FIRMS code it does not match the FIRMS code provided in QP20 Foreign Trade Zone FIRMS Code.

270 **TRANSACTION DATA REJECTED**

Application ID QP and WP - This message accompanies every rejected QP and WP message.

271 **DATA ADDED AS REQUESTED**

Application ID WP - This message accompanies every successful WP message.

272 **INVALID LINE NUMBER**

Record Identifier FD01 - The FDA Line Number is equal to zero or is not numeric.

273 **INVALID PRODUCT CODE**

Record Identifier FD01 - The FDA Product Code is not on file.

274 **CARGO STORAGE STATUS**

Record Identifier FD01 - The Cargo Storage Status is invalid.

275 **INVALID COUNTRY CODE**

Record Identifier FD01 - The FDA Country of Production is not on file.

or

Record Identifier FD05 - The Affirmation Country Code is not on file.

276 **INVALID AFFIRMATION OF COMPLIANCE**

Record Identifier FD01 - The Affirmation of Compliance Code is not valid.

or

Record Identifier FD05 - The Affirmation of Compliance Code is not valid.

277   **AFFIRMATION QUALIFIER EQUAL SPACES**

Record Identifier FD01 - The Affirmation of Compliance Qualifier cannot be spaces.

or

Record Identifier FD05 - The Affirmation of Compliance Qualifier cannot be spaces.

278   **INVALID MANUFACTURER NUMBER**

Record Identifier FD01 - The FDA Actual Manufacturer Number cannot be spaces and must be a valid code.

279   **FIRM NAME OR CITY EQUAL SPACES**

Record Identifier FD01 - The FDA Actual Manufacturer Number must have a Firm Name and City.

or

Record Identifier FD05 - The FDA Actual Shipper/Supplier Number must have a Firm Name and City.

280   **INVALID SHIPPER NUMBER**

Record Identifier FD01 - The FDA Actual Shipper/Supplier Number cannot be spaces and must be a valid code.

281   **INVALID LINE ITEM NUMBER**

Record Identifier FD03 - The FDA Value by FDA Line must be numeric.

282   **INVALID CONSIGNEE**

Record Identifier FD05 - The Affirmation Compliance Code is 'CON' and the value of the Consignee is spaces or not on file.

283   **INVALID WIDTH**

Record Identifier FD03 - The Container Dimensions #1 Width when provided must be numeric and the last two digits must be less than 17.

284   **INVALID HEIGHT**

Record Identifier FD03 - The Container Dimensions #2 Height when provided must be numeric and the last two digits must be less than 17.

285   INVALID LENGTH

Record Identifier FD03 - The Container Dimensions #3 Length when provided must be numeric and the last two digits must be less than 17.

286   INVALID CONTACT NAME

Record Identifier FD04 - The Contact Name must be provided, cannot be spaces.

287   MISSING TELEPHONE NUMBER

Record Identifier FD04 - The Contact Telephone Number must be numeric.

or

Record Identifier FD05 - The Telephone Number for the Affirmation of Compliance Code must be provided when specified.

288   AFFIRMATION QUALIFIER REQUIRED

Record Identifier FD01 - The Affirmation of Compliance Qualifier must have an Edit Qualifier of 'Y'.

or

Record Identifier FD05 - The Affirmation of Compliance Qualifier must have an Edit Qualifier of 'Y'.

289   MISSING FAX NUMBER

Record Identifier FD05 - The Fax Number for the Affirmation of Compliance Code must be provided when specified.

290   MISSING ZIP CODE

Record Identifier FD05 - The Zip Code for the Affirmation of Compliance Code must be provided when specified.

291   MISSING TARIFF NUMBER

Record Identifier FD05 - The Harmonized Tariff Number Affirmation of Compliance Code must be provided when specified.

292   MISSING POINT OF CROSSING

Record Identifier FD05 - The Anticipated Point of Crossing Affirmation of Compliance Code must be provided when specified.

293   <u>**INVALID VOYAGE, TRIP OR FLIGHT NUM**</u>

Record Identifier FD05 - The Voyage, Trip, Flight Number Affirmation of Compliance Code must be provided when specified.

294   <u>**INVALID CARRIER NAME**</u>

Record Identifier FD05 - The Carrier Name Affirmation of Compliance Code must be provided when specified.

295   <u>**INVALID BILL NUMBER**</u>

Record Identifier FD05 - The Master Bill of Lading Affirmation of Compliance Code must be provided when specified and must have a valid SCAC.

296   <u>**INVALID FTZ NUMBER**</u>

Record Identifier FD05 - The FTZ Admission Number Affirmation of Compliance Code must be provided when specified.

297   <u>**INVALID AIRWAY BILL**</u>

Record Identifier FD05 - The Air Waybill Affirmation of Compliance Code must have valid format when specified.

298   <u>**INVALID HOUSE BILL**</u>

Record Identifier FD05 - The House Air Waybill Affirmation of Compliance Code must have valid format when specified.

299   <u>**INVALID OR MISSING RAIL CAR NUMBER**</u>

Record Identifier FD05 - The Rail Car Number Affirmation of Compliance Code must have valid format when specified.

300   <u>**INVALID REGISTRATION NUMBER**</u>

Record Identifier FD05 - The Food Facility Registration Number Affirmation of Compliance Code must have valid format when specified.

301   <u>**INVALID PRODUCER FIRM TYPE IND**</u>

Record Identifier FD05 - The Producer Firm Type Affirmation of Compliance Code must have valid format when specified.

302   **INVALID BTA PN MANUF EXEMPTION IND**

Record Identifier FD05 - The FDA PN Manufacturer Registration Number Affirmation of Compliance Code must have valid format when specified.

303   **INVALID SHIPPER REGISTRATION NUMBER**

Record Identifier FD05 - The Shipper Registration Number Affirmation of Compliance Code must have valid format when specified.

304   **INVALID SUBMITTER FIRM TYPE IND**

Record Identifier FD05 - The Submitter Firm Type Affirmation of Compliance Code must have valid format when specified.

305   **INVALID OWNER FIRM TYPE IND**

Record Identifier FD05 - The Owner Firm Type Affirmation of Compliance Code must have valid format when specified.

306   **TRANSMITTER EMAIL CANNOT EQUAL SPACES**

Record Identifier FD05 - The Transmitter Email Affirmation of Compliance Code must be provided or has not been transmitted.

307   **MANDATORY REQUIRED DATA NOT ENTERED**

This message is not currently being used.

308   **PN NOT REQUIRED FOR TYPE (63)**

Record Identifier FD05 - The In-bond Type Affirmation of Compliance Code cannot be type 63 for BTA Data Submission.

309   **WARNING - NOT AN IN-BOND PN**

Record Identifier WP10 - The Action Code is '9' and the FD05 In-bond Type Affirmation of Compliance Code was provided.

310   **NO FILER ENTERED - FILER REQUIRED**

Record Identifier WP10 - The Action Code is '8' or '9', the FD05 Entry Number Affirmation of Compliance Code was provided, but Filer Affirmation of Compliance Code was not provided.

311   REQUIRE EITHER BOL, AWB, FTZ, EFC+ENT

Record Identifier WP10 - The Action Code is '8' or '9' and neither the FD05 Master Bill Of Lading, FTZ Admission Number, Entry Number, nor Air Waybill Affirmation of Compliance Code was not provided.

312   UNIT1 QUANITY MISSING OR INVALID

Record Identifier FD02 - The Unit 1 Quantity is missing or not numeric.

313   UNIT2 QUANITY MISSING OR INVALID

Record Identifier FD02 - The Unit 2 Quantity is not numeric.

314   UNIT3 QUANITY MISSING OR INVALID

Record Identifier FD02 - The Unit 3 Quantity is not numeric.

315   UNIT4 QUANITY MISSING OR INVALID

Record Identifier FD02 - The Unit 4 Quantity is not numeric.

316   UNIT5 QUANITY MISSING OR INVALID

Record Identifier FD02 - The Unit 5 Quantity is not numeric.

317   UNIT6 QUANITY MISSING OR INVALID

Record Identifier FD04 - The Unit 6 Quantity is not numeric.

318   UNIT1 MEASURE MISSING OR INVALID

Record Identifier FD02 - The Unit 1 Measure is missing or not valid.

319   UNIT2 MEASURE MISSING OR INVALID

Record Identifier FD02 - The Unit 2 Measure is not valid when the Unit 2 Quantity is provided.

320   UNIT3 MEASURE MISSING OR INVALID

Record Identifier FD02 - The Unit 3 Measure is not valid when the Unit 3 Quantity is provided.

321   UNIT4 MEASURE MISSING OR INVALID

Record Identifier FD02 - The Unit 4 Measure is not valid when the Unit 4 Quantity is provided.

322   UNIT5 MEASURE MISSING OR INVALID

Record Identifier FD02 - The Unit 5 Measure is not valid when the Unit 5 Quantity is provided.

323   UNIT6 MEASURE MISSING OR INVALID

Record Identifier FD04 - The Unit 6 Measure is not valid when the Unit 6 Quantity is provided.

324   ONLY ONE BILL PERMITTED - BOL OR AWB

Record Identifier WP10 - The Action Code is '8' or '9' and the FD05 Master Bill Of Lading and Air Waybill Affirmation of Compliance Code was provided.

325   AWB OR BOL REQUIRED

Record Identifier WP10 - The Action Code is '8' then the FD05 Master Bill Of Lading or Air Waybill Affirmation of Compliance Code must be provided.

326   QTY INVALID - NO PREVIOUS QTY

Record Identifier FD02 - The Unit 2 Quantity is provided when Unit 1 Quantity is not, Unit 3 Quantity is provided when Unit 2 Quantity is not, Unit 4 Quantity is provided when Unit 3 Quantity is not, Unit 5 Quantity is provided when Unit 4 Quantity is not, or Unit 6 Quantity is provided when Unit 5 Quantity is not.

327   INVALID IMPORTER NUMBER OR FORMAT

Record Identifier FD05 - The Importer Number Affirmation of Compliance Code reference is not on file.

328   IMPORTER NBR REQUIRED - TYPE 61 REC

Record Identifier FD05 - The FD05 FTZ Admission Number or Entry Number Affirmation of Compliance Code was provided without the Affirmation of Compliance Code for Importer.

329   EST ARRVL DATE LESS THAN TODAYS DATE

Record Identifier FD05 - The FD05 Anticipated Date of Arrival Affirmation of Compliance Code was provided with a Date less than 10 days from the processing date of the WP submission.

330   INVALID FILER

Record Identifier FD05 - The Entry Filer Code Affirmation of Compliance Code reference is not on file.

331   INVALID ENTRY NBR CHECK DIGIT - ENT

Record Identifier FD05 - The Entry Number Affirmation of Compliance Code reference has an Invalid Entry Number Check Digit.

332   CARRIER CODE IN DELETED STATUS

Record Identifier FD05 - The Importer Carrier Affirmation of Compliance Code reference is on file but in deleted status.

333   DUPLICATE AFFIRMATION ENTERED

Record Identifier FD05 - The same Affirmation of Compliance Code is referenced more than once, with the exception being Affirmation of Compliance Code RNO (Rail Car Number).

334   INVALID FEI NUMBER

Record Identifier FD03 - The FDA Consignee (FDA Establishment Indicator) is not on file.

335   INVALID OR MISSING PASSWORD

Record Identifier A - Receiver Password does not match EDI Profile for the Broker.

or

Record Identifier A - Sender Password does not match EDI Profile for the Broker.

or

Record Identifier Z - Receiver Password does not match EDI Profile for the Broker.

or

Record Identifier A - Receiver Password is missing.

or

Record Identifier A - Sender Password is missing.

or

Record Identifier Z - Receiver Password is missing.

336   INV OR MSSING DDPP/FILER/OFFICE CODE

Record Identifier A – Receiver Port, Receiver Filer Code and when provided, Receiver Office Code data elements do not match EDI Profile.

or

Record Identifier A – When provided, Sender Port, Sender Filer Code and Sender Office Code data elements do not match EDI Profile.

or

Record Identifier B – When provided, Preparer Port, Preparer Filer Code and Preparer Office Code data elements do not match EDI Profile.

or

Record Identifier B - Processing Port Code, Entry Filer Code and when provided, Processing Office Code data elements do not match EDI Profile.

or

Record Identifier A – When one of Sender Port Code, Sender Filer Code or Sender Office Code data elements are provided the other data elements are required.

or

- Record Identifier B – When Preparer Indicator provided Preparer Port Code, Preparer Filer Code or Preparer Office Code data elements required.

or

Record Identifier A – Receiver Port and Receiver Filer Code data elements are missing.

or

Record Identifier B - Processing Port Code and Entry Filer Code data elements are missing.

or

Record Identifier Y - Processing Port Code and Entry Filer Code data elements are missing.

or

Record Identifier Z - Port of ABI Receiver and Receiver Filer Code data elements are missing.

337   APPLICATION NOT AVAILABLE

Record Identifier B - Application Identifier data element is not enabled within the EDI Profile.

or

Record Identifier Y - Application Identifier data element do not match in Record 'B' and Record 'Y'.

338   Y RECORD MISSING

Record Identifier Y – Record was not transmitted.

339   Z RECORD MISSING

Record Identifier Z – Record was not transmitted.

340   SENDING BROKER NOT EQUAL 'A' RECORD

This message is not currently being used.

341   SENDING OFFICE CODE NOT EQUAL 'A' REC

This message is not currently being used.

342   CANNOT BE BOTH FDA/BTA AND FTZ

Record Identifier QP10 - An In-bond cannot be both Foreign Trade Zone/Warehouse and BTA/FDA.

343   INVALID BILL TYPE

Record Identifier QP30 - The Issuer Code of the Master Bill Number data element cannot be an NVOCC as configured on the Carrier file.

or

Record Identifier QP30 - The Master Bill Number is not on file as Withdrawal type when adding an existing In-bond to an existing BOL (QP Short) and QP10 FTZ Indicator is set to 'Y'.

344   INVALID ENTRY TYPE FOR FDA/BTA

Record Identifier QP10 - The In-bond Entry Type cannot be 63 when the FDA/BTA Indicator is set to 'Y'.

345   BILL ALREADY IN DELETE STATUS

This message is not currently being used.

346   INVALID DATE

Record Identifier A – Current Date not valid format MMDDYY (month, day, year).

347   DP/BKR NOT EQUAL 'B' RECORD

Record Identifier Y - Processing Port Code and Entry Filer Code data elements do not match B record data elements.

348   DETAIL RECS FOUND - 'Y' COUNT IS ZERO

Record Identifier Y - Number of Transaction Detail Records In The Block data element cannot be '0'.

349   DETAIL REC COUNT NOT EQUAL 'Y' COUNT

Record Identifier Y - Number of Transaction Detail Records In The Block data element does not equal the record count for the 'B'-'Y' block.

350   **DP/BKR NOT EQUAL 'A' RECORD**

Record Identifier Z - Port of ABI Receiver and Receiver Filer Code data elements do not match A record data elements.

351   **INBOND QTY GREATER THAN BILL QTY**

Record Identifier QP30 - The In-bond Quantity cannot be greater than Bill Quantity on file in AMS.

352   **INBOND OR BILL DELETE DENIED**

Record Identifier QP10 and QP30 - The Action Code of 'D' cannot be used to delete an In-bond on file in AMS by a source other than QP.

353   **INVALID CONTAINER NUMBER**

Record Identifier WP10 - When Action Code is 3 or 7 the Container Number cannot be 'NC' (Non Containerized).

354   **CONVEYANCE ARRIVAL REQUIRED**

This message is not currently being used.

355   **MISSING INBOND QUANTITY**

This message is not currently being used.

356   **MUST BE EXPORTED AT INBOND LEVEL**

Record Identifier WP10 – Export of an In-bond by Bill (Action Code 6) or Container (Action Code 7) is not allowed for Subsequent and less than full bill quantity In-bonds. These In-bonds must be exported at the In-bond level (Action Code 5)

357   **MUST BE ARRIVED AT INBOND LEVEL**
