Introduction

With the implementation of e-Manifest: Rail and Sea (M1), ocean conveyance (vessel) information will be maintained in ACE. To accomplish this, sea carriers with an ACE Portal account will be able to individually enter their conveyance data into a predefined template.

Creating and Maintaining Conveyance Records

After logging into your ACE Portal account select the Accounts tab and you will default to the “*Account Type: Broker*” screen. In order to create your conveyance information in the ACE portal account, you must be in the **carrier** account type view.

1. Select **Carrier** from the “*Select Account Type*” drop down menu.
2. Select **Go** and the carrier view will display. You will now be on the “*Accounts*” tab under the carrier view.

Create and Maintain Ocean Conveyances

(For Vessel Operating Common Carriers Only)

3. Select the “+” next to the top carrier account to reveal the sub-accounts of the carrier account.

4. Select the sea carrier sub-account that needs to have conveyance data added.

5. The “Carrier” portlet displays. Scroll down to the bottom of the page to see a series of sub-tabs in the sea carrier sub-account portlet (*Contacts, Addresses, Drivers/Crew, Conveyances, Equipment, Shippers, Consignees*). Select the **Conveyances** sub-tab to begin navigating the portal functionality that will allow the user to create and maintain their conveyance data.

Navigating the Conveyances Tab

Under the “Conveyances” sub-tab you will see the following information displayed for each vessel – “Vessel (IMO) Code, Vessel Name, Flag of Registry and Former Vessel Name” (if applicable). Each “Vessel Code” is hyperlinked. Selecting a vessel code will take the user to the “Conveyance Identification” screen. This screen displays all of the data entered for the selected vessel. Information on how to edit and remove vessel data is provided in subsequent sections.

Create and Maintain Ocean Conveyances

(For Vessel Operating Common Carriers Only)

- The “*Download*” hyperlink allows a user to view all vessel information that has been entered into the account in a spreadsheet format.
- The “*Upload File*” hyperlink takes a user to a screen where the user can download a template to add, edit and delete multiple vessel records in the account simultaneously. Additional information on the functionality will be provided in the future when it becomes available.
- The “*Add Conveyance*” hyperlink takes a user to the conveyance identification screen, which is used for entering a single new vessel record in the account.
- The “*History*” hyperlink allows the user to view all the vessels its company has controlled but no longer operates. Any vessel for which you have removed the relationship will appear in the history link. If you no longer control a vessel, you must remove the relationship between that vessel and your account.

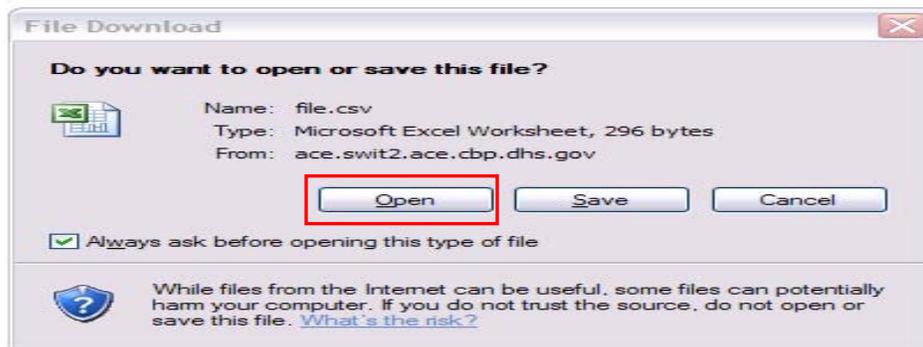

Viewing Existing Vessel Information

To view existing vessel account information:

1. Select the **Download** hyperlink.

2. Select **Open**.

The carrier's vessel records appear as one single line of data for each conveyance listed in the account. The data for each vessel is displayed in the order shown below. This view gives the account user a complete view of each

Adding Individual Vessel Records

Vessel information can be entered individually using the “Conveyances” sub-tab. To add a single vessel record, follow the steps below:

1. Select the **Add Conveyance** hyperlink.

A new screen displays giving you the option of creating a new vessel record or pulling up an existing vessel record, if the *Vessel Code* (Vessel IMO number) is known and the vessel information is resident in ACE.

To find an existing vessel, the Vessel Code (Vessel IMO Number) must be exact. The system will not provide a list of similar names or numbers from which to choose. This option would normally be used when a carrier is starting a lease or charter using a vessel owned or operated by another carrier.

2. Select “**Create**,” since we are creating a new record in the account. This will take you to the “*Conveyance Identification*” screen.

Create and Maintain Ocean Conveyances

(For Vessel Operating Common Carriers Only)

The screenshot shows the 'Carrier' window with the following elements:

- Header: Carrier
- Message: *Indicates field is required
- Section: Create Conveyance
- Button: Create (highlighted with a red box)
- Section: Search for an Existing Conveyance
- Field: * Vessel Code: [text input]
- Button: Search
- Buttons: Continue, Cancel

3. **Enter data in all of the data fields that have an asterisk “*” next to them.** These are required fields and must be completed with a valid data element in order for ACE to accept the record. Other data fields are optional. For “Flag of Registry,” “Vessel Type,” “Operator Country” and “Country Built-In” use the drop down menus to populate these data fields.

The screenshot shows the 'Carrier' window with the following elements:

- Header: Carrier
- Message: *Indicates field is required
- Section: Conveyance Identification
- Fields: * Vessel Code, * Vessel Name, Former Vessel Name, * Vessel Owner, * Effective Start Date, Effective End Date, * Flag of Registry (highlighted), Official Number, Call Sign, * Vessel Type (highlighted), * Draft (with radio buttons for Feet and Meters), * Gross Tonnage, * Net Tonnage, Rig, * Operator Country (highlighted), * Country Built In (highlighted), Year Built
- Buttons: Save, Cancel

The system will check for overlapping dates. If an overlap exists an error message displays indicating the record will not be saved. You must change the date.

If the vessel type normally used for a vessel is not reflected in the list provided in the Vessel Type drop down menu, use code 499 – Other NEI (Not Elsewhere Identified).

Create and Maintain Ocean Conveyances

(For Vessel Operating Common Carriers Only)

Please note that the “Effective End Date” currently cannot be set. At this time, the date should be left blank.

The design of M1 will not allow the user to add a conveyance record using a future date, even if that date is tomorrow. If you search for the record and try to add it with a future date, you will receive an error message stating “Effective Date cannot be in Future.” The Effective Date can only be the current date or prior to the current date.

Editing Individual Vessel Records

To edit a single vessel record, select the “Vessel Code” of the vessel that needs editing from the list of vessels located on the “Conveyances” sub-tab.

1. Select the **Vessel Code** for the “Rising Sun.” This will take you to the “Conveyance Identification” screen.

Save Cancel

5. Select the **OK** button to return to the "Conveyances" screen.

Carrier cannot edit any vessel record that is link to another carrier's SCAC. In these cases the carrier will need to contact CBP to remove the relationship between the conveyance and the carrier so the new party can edit the data.

Deleting Individual Vessel Records

Deleting a vessel from the carrier's ACE Portal account is easy and can be done by following the steps outlined below.

1. Select the **Vessel Code** of the vessel that is to be deleted. In this example, select **9999999** next to *Jolly Roger*.

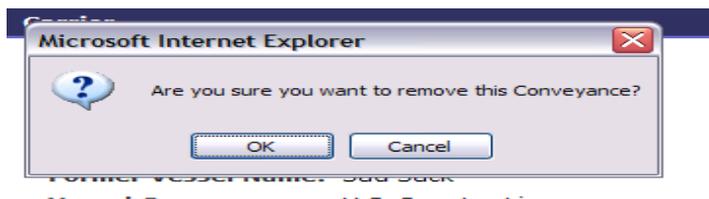

The screenshot shows the 'Conveyances' tab selected in the ACE Portal. The table displays the following data:

Vessel Code	Vessel Name	Flag of Registry	Former Vessel Name
9999998	Midway	Aruba	Halfway
9999999	Jolly Roger	Australia	Sad Sack

2. Select **Remove Relationship** button located at the upper right hand corner of the vessel record detail screen.

3. Verify that you want to remove the conveyance by selecting **OK**. This will return you to the "Conveyances" view.

When a vessel is deleted from the carrier's account, the "Effective End Date" is set as the date of the deletion. This allows a new carrier to upload the vessel information, if there is a transfer of ownership or operators.

The Download hyperlink can also be used to verify that a vessel or several vessels have been deleted, modified or added.
