The Unit of Measure is [KG] and the Commodity Net Quantity for the American bison is 50.60 [00000005060]

The Inspection Status is [I] and the Arrival Date is [01012019]. The Inspection Location is [AIR CANADA WAREHOUSE]

The Government Agency Code for the U.S. Fish and Wildlife Service is [FWS] and the Government Agency Program Code is [FWS]. Hybrid Beefalo cattle (Bison bison x Bos taurus) requires clearance using FWS Form 3-177 data and documents [EDS]. Documents are not uploaded in the Document Image System, therefore this field is left blank. The Intended Use Code [230.000] indicates the beefalo are for Consumer Use as Human Food (a commercial purpose).

Item type is reported as [P] for all FWS commodities.

Since the Beefalo is a hybrid of two different genera, there must be a PG05 record for each parent of the hybrid specimen to create the hybrid scientific name. Scientific Genus Name for the first parent of the hybrid is [BISON]. Scientific Species Name for the first parent of the hybrid is [BISON]. The FWS Description Code for the hybrid carcass is [MEAA100].

Scientific Genus Name for the second parent of the hybrid is [BOS]. Scientific Species Name for the second parent of the hybrid is [TAURUS]. The FWS Description Code for the hybrid carcass is [MEAA100].

The Source Type Code is Species Country of Origin [267]. The Country Code for the species country of origin is Canada [CA].

The Beefalo was harvested from a ranched population so the Commodity Qualifier Code is [R].

The shipment is for commercial purposes, so a FWS Import/Export license is required. The LPCO Type is [FWL]. The alphanumeric associated with the I/E license is the LPCO Number [33333Z]. Note: This LPCO Type (License) must be the same for all FWS message sets, per CBP Entry.

The Common Name (Specific) for Bos taurus x Bison bison is [BEEFALO].

The Entity Role Code is [FWI]. The Declaration Code is [FW3] and the Declaration Certification is [Y], which indicates that the entity certifies the FWS Message Set data (Form 3-177). The Date of Signature is [01012019].

Remarks Text is [FISH, SHR, CORAL ROCK] indicating the markings on the cartons containing wildlife in the CBP Entry.

The PGA Line Value for the Erect seahorse is $5,600 [000000005600]

The Unit of Measure is [NO] and the Commodity Net Quantity for the Erect seahorse is 155 [000000015500].

The Inspection Status is [I] and the Arrival Date is [01012019]. The Inspection Location is [AIR CANADA WAREHOUSE]

The commercial cargo description is [LIVE ROCK]

The Source Type Code is Species Country of Origin [267]. The Country Code for the species country of origin is Fiji [FJ].

The live rock/coral is harvested from the wild in Fiji, so the Commodity Qualifier Code is [W].

The shipment is for commercial purposes, so an FWS Import/Export license is required. The LPCO Type is [FWI]. The alphanumeric associated with the I/E license is the LPCO Number [333332]. Note: This LPCO Type (License) must repeat and be the same per CBP Entry.

Order Scleractinia requires clearance using FWS Form 3-177 data and documents [EDS]. Documents are uploaded in the Document Image System [Y]. The Intended Use Code [130.035] indicates the live rock is for commercial purposes.

CITES allows coral rock or live rock to be permitted at the order level. In order to accommodate this higher listing exemption, the Scientific Genus Name for live rock/coral rock will be indicated as [SCLERACTINIA]. For this example, the Scientific Species Name for the live rock/coral rock will be indicated as [SPECIES]. Note: if there are species attached to the coral rock/live rock, they must be separately declared. The FWS Description Code for the live rock/coral rock is [ROC].

The Common Name (Specific) for Order Scleractinia is [STONY]. The Common Name (General) is [CORAL]. Even though this commodity is often known as live rock, the description code is not LIV and thus no Live Venomous Wildlife Code is required. The total number of Cartons Containing Wildlife in the CBP Entry is 67 [000067].
