1USG Working Group

June 4, 2021

Action Required: Informational

Background:

- In late July 2019, CBP stood up a new Commercial Customs Operation Advisory Committee (COAC) working group – the One United States Government Working Group (1USG WG) – which operates under and reports up through the Next Generation Facilitation Subcommittee.
- The 1USG WG serves as a key conduit to CBP and the Border Interagency Executive Council (BIEC) agencies on priority initiatives impacting CBP, its Partner Government Agencies (PGAs), industry stakeholders and international government entities – with a special focus on operational, technical, and policy and regulatory issues that involve more than one U.S. Government agency.

Issue:

- The 1USG WG creates opportunities for industry stakeholders to provide input to, and engage with, the BIEC, its member PGAs, and other agencies with equities and authorities at the U.S. border on pertaining to supply chain management, Single Window and trade data processing, process optimization, risk management and other areas of mutual interest.
- It builds upon previous and ongoing COAC, CBP, and interagency efforts; provides focused feedback; and formulates actionable recommendations that identify a 1USG approach toward coordinated strategic solutions.

Current Status:

- The 1USG WG kick-off meeting was held in August 2019. To date, the 1USG WG has collaborated on the following efforts:
 - Two-day “Deep Dive” on the Global Business Identifier (GBI), culminating in 17 recommendations made to the COAC in December 2019;
 - The GBI project and technical teams met with the COAC 1USG WG to obtain feedback on the technical buildout and enrollment process for the GBI Evaluative Proof of Concept (EPoC);
 - Engagement with U.S. Fish and Wildlife Service (FWS) in order to support the April 6, 2020 reopening of the FWS message set pilot for commodities regulated by FWS;
 - Briefings by U.S. Department of Agriculture, Animal and Plant Health Inspection Service (USDA-APHIS) on enforcement of harmonized tariff schedule code flagging for the APHIS Core message set, as well as other PGAs initiating process and regulatory changes impacting trade;
 - Virtual “Disclaim Workshop” on July 1, 2020, with participation from USDA-APHIS, Environmental Protection Agency, Food and Drug Administration, and Department of Transportation-National Highway Traffic Safety Association, to resolve confusion that persists among the trade community in disclaiming entered goods from PGA review, and to refine PGA guidance on use of disclaim codes and import requirements for regulated commodities.
 - Collaboration with the BIEC agencies to better align trade industry priorities and practices with PGA priorities and practices.

Next Steps:

- The 1USG WG held a virtual PGA Trusted Trader Workshop on November 30, 2020 to discuss possible development of a PGA Trusted Trader program. Follow up discussions are being held with PGAs to

chart a path forward for the creation of integrated, interagency Trusted Trader initiatives and/or reciprocity with Customs Trade Partnership Against Terrorism (C-TPAT);

- The GBI project team will continue to provide updates to the 1USG WG on upcoming GBI development and will reach out to the WG for additional feedback as needed;
- Collaboration with industry and PGAs to develop a trade-facing “Disclaim Handbook” to clarify the compliant use of declaration disclaim codes for shipments of PGA-regulated commodities, targeted for publication to CBP.gov in June 2021.
