Since kicking off in 2019, U.S. Customs and Border Protection’s (CBP) 21st Century Customs Framework (21CCF) initiative has brought government and industry together in pursuit of a modernized legal framework that would better enable CBP to address the challenges and needs of a rapidly evolving customs environment. From early engagements with industry groups and Partner Government Agencies (PGAs), to standing up an industry-led Task Force and working together to identify legislative priorities, the 21CCF initiative continues to be propelled by the power of public-private partnership. Join us for a discussion on key 21CCF modernization objectives and milestones.
