</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>June 2022</td>
<td>Added new Events Advisory (353/Hi) error 387</td>
</tr>
</tbody>
</table>
| 2.0     | February 2022  | Added more details to errors:  
- 012, 033, 034, 146, 211, 232, 234, 235, 249, 380  
Search “Ocean House Bill Release” for new edits to be effective in ACE Certification – anticipated Summer 2022:  
- Updated error 485 for the maximum of $800 on Section 321 shipments  
- Added new bill types for error 051 in-bond record validations  
- Added new bill types to container-related validations 165, 269 to 272, 274, 277  
- Added new bill types to bill number-related validation 122  
- Added new bill types to event date-related validations 128, 144, 154  
- Updated error 163 to add House bill type as allowable for PTTs for Ocean House Bill Release  
- Removing validation for Error 313 In-bond Invalid on House Bill |
| 1.9     | November 2015  | Original                     |
001 **NO M01 FOUND**

Record Identifier M01 - Record was not transmitted.

002 **NO P01 FOUND**

Record Identifier P01 - Record was not transmitted.

003 **NO B01/M11 RECORD FOUND**

Application ID MI/TS309W - Record Identifier B01/Segment M11 was not transmitted.

or

Application ID AI Record Identifier A01/TS309Y Segment M13 – Record Identifier B01/Segment M11 was not transmitted when Action Code/Amendment Type Code is ‘A’ - Add a Bill of Lading.

004 **INV N00/S01/N1 REC FOUND**

Record Identifier N00/S01/Segment N1 - Shipper Data was not transmitted or was transmitted out of order.

005 **INV N00/U01/N1, N00/N01/N1**

Record Identifier N00/U01/Segment N1 – Both Consignee data and Record Identifier N00/N01/Segment N1 - Notify Data were not transmitted or were transmitted out of order.

or

Rail only. Segment N1 - Consignee data was not transmitted or was transmitted out of order.

006 **INVALID RECORD TYPE**

Record not valid for Application ID.

007 **INVALID D01/N10 RECORD**

Record Identifier D01/Segment N10 – When Record Identifier C01/Segment VID is provided, Record Identifier D01/Segment N10 is not provided

008 **MIB NO I01/M12 RECORD**

Record Identifier I01/Segment M12 - Record was not transmitted.

009 **INVALID CARRIER CODE**

Record Identifier I01/Segment M12 – When provided, the In-bond Carrier Code data element contains a code not in the carrier record file.

or

TS324 Segment N7 – When provided, the Container Operator Code data element contains a code not in the carrier record file.
Record Identifier H01/Segment M15 – When Message Code data element is A the In-bond Carrier Code data element contains a code not in the carrier record file.

EDIFACT BAPLIE NAD – When provided, the Container Operator Code data element contains a code not in the carrier record file.

**010 INVALID TRANS MODE**

Record Identifier B02/Segment M1122 – Transportation Method Type Code contains a value not specified in the Implementation Guides.

**011 INVALID COUNTRY CODE**

Application ID MI/AI/II/TI Record Identifier M01 - Vessel Country Code data element is missing.

Application ID HI Record Identifier M01 - When Message Code data element is 4, 9, U or Y the Vessel Country Code data element is missing.

Application ID MI/AI Record Identifier M01/TS309 Segment M10 - Vessel Country Code data element contains invalid country code.

Rail only. TS309 Segment N10 - If Country Code provided, the data element contains invalid country code.

**012 INVALID VOYAGE/TRIP #**

Application ID MI/II/II/TI Record Identifier M01 - Voyage Number data element is missing.

Application ID HI Record Identifier M01 - When Message Code data element is 4, 9, U or Y the Voyage Number data element is missing.

Application ID MI/AI/II/TI Record Identifier M01; TS309/TS353/TS356/TS357 Segment M10 - Voyage Number is not alpha/numeric or contains embedded space(s).

Segment M10 - Trip Number data element is greater than 5 characters and up to the standard maximum in length.

Rail only. TS309 Segment M10 - Trip Number data element does not contain a valid Julian Date.

Rail only. TS353 Segment M10 - Trip Number data element does not contain a valid Julian Date.

TS324 Segment V1 – The Voyage Number data element is missing.

EDIFACT BAPLIE TDT – The Voyage Number data element is missing.
013 I01/M12 INV FOR SEC 321 BL

These error descriptions from BR-VAL-001 and BR-VAL-006 can be used:

Rail only: Segment M12 - If M1109 BOL Type Code is ‘23’ Section 321 then Segment M12 In-bonds are not permitted.

Or

Record Identifier I01/Segment M12 – Cannot provide in-bond record/segment when Bill of Lading Type Code is Section 321

014 INVALID UNLADING DDPP

Record Identifier A01/Segment M13 - Port of Unlading data element information does not match the Port of Unlading data element information in Record Identifier P01/Segment P4.

015 INVALID EST ARR DATE RANGE

Application ID MI Record Identifier P01/TS309 Segment P4 - This message will be sent if a user attempts to create a manifest before or after 270 days from the processing date of the inbound message.

or

Record Identifier H01/Segment M15 - When the Message Code is ‘Y’ to Update EDA, this message will be sent if a user attempts to update the EDA to beyond 270 days from the processing date of the inbound message.

This message is not currently being used

016 MISSG OR INV CNTR CHKDIGIT

Record Identifier C01/Segment VID - Container Check Digit is missing or invalid.

or

TS324 Segment N7 – Container Check Digit is missing or invalid.

or

EDIFACT BAPLIE EQD - Container Check Digit is missing or invalid This message is not currently being used.

017 MISSING OR INVALID BILL #

Application ID MI/AI Record Identifier B01 - Bill of Lading Sequence Number data element is not alpha/numeric, missing, or contains embedded spaces.

or

TS309 Segment M11 - Bill of Lading Sequence Number data element contains embedded spaces.

or

Rail only. TS309Y Segment M11 - Bill of Lading Sequence Number data element length is greater than 12 characters and up to the standard maximum in length.

or

Application ID AI Record Identifiers A01 - Bill of Lading Sequence Number data element is not alpha/numeric, missing, or contains embedded spaces. Valid for Amendment Type
TS309 Segment M13 - Bill of Lading Sequence Number data element contains embedded spaces. Valid for Amendment Type Codes ‘D’ and ‘R’.

Rail only. TS309Y Segment M13 - Bill of Lading Sequence Number data element length is greater than 12 characters and up to the standard maximum in length. Valid for Amendment Type Codes ‘D’ and ‘R’.

Application ID II Record Identifiers A01 - Bill of Lading Sequence Number data element is not alpha/numeric, missing, or contains embedded spaces. Valid for Amendment Type Code ‘E’.

Application ID II Record Identifiers B03 - Bill of Lading Sequence Number data element is not alpha/numeric, missing, or contains embedded spaces.

018 NO B02 RECORD FOUND
Record Identifier B02 - Record was not transmitted.

019 NO J01 RECORD FOUND
Record Identifier J01 - Record was not transmitted.

020 INVALID WEIGHT
Record Identifier B01/Segment M11 - Weight data element must be greater than ‘0’.

Record Identifier B01 - Weight data element contains weight information in a format other than numeric.

Record Identifier B01 - Weight data element is missing.

021 INVALID WEIGHT UNIT
Record Identifier B01/Segment M11 - Weight Unit data element contains an invalid value per Implementation Guides.

Record Identifier B01 - Weight Unit data element is missing.

022 INVALID MEASUREMENT
This message is not currently being used.

023 INVALID VOLUME UNIT
Record Identifier B02/Segment M11 – Volume Unit data element contains an invalid value per Implementation Guides.

Record Identifier B02 – Volume Unit is missing when Volume is provided.
024  **MISSING OR INVALID NAME**

Record Identifier S01, U01, N01, N00/Segment N1 (excludes Entity Identifier Codes ‘CB’ and ‘SNP’) - Foreign Shipper, Consignee, or Notify Name/Code data element is missing.

*or*
Segment N102 - Name data element length exceeds 35 characters accepted by CBP and up to the standard maximum in length.

*or*
Segment PER02 - Name data element length exceeds 23 characters accepted by CBP and up to the standard maximum in length.

025  **MISSING OR INVALID ADDRESS**

Record Identifier S01, U01, N01, N02 (exclude if Entity Identifier Codes in Record Identifier N00 is ‘CB’ or ‘SNP’) - Foreign Shipper, Consignee, or Notify Address data element is missing. Segment N301/N302 - Address data element length exceeds 35 characters accepted by CBP and up to the standard maximum in length.

026  **INV SNP PROFL - XXXXXXXXX**

Application Set MI-AI Record Identifier B02/TS309 Segment M11 - XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that does not have a valid EDI profile.

*or*
Application Set MI-AI Record Identifier N00/TS309 Segment N1 - If the Identification Code Qualifier is ‘2’, Identification Code XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that does not have a valid EDI profile.

*or*
Application Set MI-AI Record Identifier N00 - If the Identification Code Qualifier is ‘2’, XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that is missing.

*or*
Application Set II Record Identifier B03/TS357 Segment M21 - XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that does not have a valid EDI profile.

*or*
Application Set II Record Identifier N00/TS357 Segment N1 - If the Identification Code Qualifier is ‘2’, Identification Code XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that does not have a valid EDI profile.

*or*
Application Set II Record Identifier N00 - If the Identification Code Qualifier is ‘2’, XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that is missing.

*or*
Rail only. TS358 Segment M13 (Consist) - XXXXXXXXXX is the Secondary Notify Party SCAC or FIRMS code that does not have a valid EDI profile.

027  **SECONDARY SCAC 2 NOT VALID**

This message is not currently being used.
028 MUST BE ARR/CANC AT IB LEVL

Record Identifier H01/Segment M15 – Arrival of an In-bond by Bill (Message Code 2) or Container (Message Code 3) is not allowed for Subsequent and less than full bill quantity In-bonds. These In-bonds must be arrived at the In-bond level (Message Code 1).

or

Record Identifier H01/Segment M15 – Cancel Arrival of an In-bond by Bill (Message Code G) or Container (Message Code H) is not allowed for Subsequent and less than full bill quantity In-bonds. These In-bonds must be cancelled at the In-bond level (Message Code F).

029 MUST BE EXP/CANC AT IB LEVL

Record Identifier H01/Segment M15 – Export of an In-bond by Bill (Message Code 6) or Container (Message Code 7) is not allowed for Subsequent and less than full bill quantity In-bonds. These In-bonds must be exported at the In-bond level (Message Code 5).

or

Record Identifier H01/Segment M15 – Cancel Export of an In-bond by Bill (Message Code J) or Container (Message Code K) is not allowed for Subsequent and less than full bill quantity In-bonds. These In-bonds must be cancelled at the In-bond level (Message Code I).

030 INVALID IB ENTRY TYPE

Application ID MI - AI Record Identifier I01/TS309W, 309P, 309Y Segment M12 - In bond Entry Type data element contains anything other than 61, 62, or 63 for Ocean MOT and 61, 62, 63, 69, or 70 for Rail MOT.

or

Application ID II Record Identifier I01/TS357 Segment M12 - In bond Entry Type data element contains anything other than 61, 62, or 63.

or

Rail only. TS309T Segment M12 - In-bond Entry Type data element contains anything other than 69.

031 DUPLICATE CONTAINR FOR BL

Record Identifier C01/Segment VID - Cannot repeat the container number or ‘NC’ within the same bill of lading.

032 INVALID INBOND NUMBER

Application ID MI/AI/II Record Identifier I01 - Contains an In-bond Number in both the Conventional In-bond Number and the Paperless In-bond Number fields.

or

Application ID MI/AI Record Identifier I01/TS309 Segment M12 - Contains an In-bond Number that was created by a process other than the MI-AI/TS309 Manifest transmission. Does not pertain to Rail.

or

Application ID MI/AI/II Record Identifier I01/TS309/357 Segment M12 - Contains a Paperless or Conventional In-bond Number and the Port Codes specified for the In-bond number.
are not configured as In-bond Ports.

or
Application ID MI/AI/II Record Identifier I01/TS309/357 Segment M12 - Contains a Paperless In-bond Number that does not have a numeric sequence in positions 4-10.

or
TS309/357 Segment M12 - Contains a Paperless In-bond Number that is greater than 11 characters and up to the standard maximum in length.

or
Application ID MI/AI/II Record Identifier I01/TS309/357 Segment - Contains a Conventional In-bond Number where first 8 characters are not numeric or are all zeroes.

or
TS309/357 Segment M12 - Contains a Conventional In-bond Number that is greater than 9 characters and up to the standard maximum in length.

or
Application ID II Record Identifier I01/TS 357 Segment M12 - Contains an In-bond that is not on-file but is requested to be deleted via the II/357 Subsequent In-bond transmission.

or
Application ID II Record Identifier I01/TS357 Segment M12 - Contains an In-bond Number that was created by a process other than the II/357 Subsequent In-bond transmission.

033 INVALID DDPP

Record Identifier P01/Segment P4 - Port of Unlacing Code data element contains a code that does not appear in the Census Schedule D Port code list.

or
Application ID MI/AI Record Identifier P01 - Port of Unlacing Code data element is missing.

or
Application ID HI Record/TS 353 Identifier P01/P4 – When Message Code data element is 4, 9, U, P, V or Y the Port of Unlacing Code data element is missing.

or
Record Identifier I01/Segment M12 - U.S. Port of Destination data element is missing or contains a code that does not appear in the Census Schedule D Port code list.

or
Record Identifier H01/Segment M15 – When Message Code data element contains code 1, 2, 3, 4, or Z the Port of Arrival data element contains a code that does not appear in the Census Schedule D Port code list or is not a valid In-Bond destination.

or
Record Identifier P01/Segment P4 – Port of Unlacing Code data element submitted does not match the Manifest on file (Combination of these 4 elements: SCAC, Conveyance ID, Manifest sequence number and voyage number)
034  INVALID FOREIGN PORT

Record Identifier B01.Foreign Port/Segment M1102 - Contains a code that does not appear in the Census Schedule K Foreign Port code list.

or

Record Identifier B02.Last Foreign Port, B02.First Foreign Port/Segment M1120, M1121 - Contains a code that does not appear in the Census Schedule K Foreign Port code list.

or

Record Identifier B02.Last Foreign Port, M1120 – is missing.

or

Record Identifier B04/N9 – Reference Identifier Qualifier Code “CSK” contains a code that does not appear in the Census Schedule K Foreign Port code list.

or

Rail only. Segment M11 - Contains a code that does not appear in the Census Schedule K Foreign Port code list.

or

Record Identifier I01/Segment M12 - Contains a code that does not appear in the Census Schedule K Foreign Port code list. The Foreign Port of Destination is required on the Record Identifier I01/Segment M12 when the In-bond Entry Type is 62 or 63.

or

Record Identifier H02/Segment M15 - When Message Code data element contains code '9', Foreign Departure Port/Location Identifier contains a code that does not appear in the Census Schedule K Foreign Port code listing the Vessel Departure Message.

or

Record Identifier H02/Segment M15 - When Message Code data element contains code '9', Foreign Departure Port/Location Identifier missing.

035  INVALID DOLLAR VALUE

Record Identifier I01/Segment M12 – Value data element contains data (US Dollar) that is missing, not numeric, or is not greater than zero. Decimals are not allowed.

036  INVALID STATUS CODE

Record Identifier B01/Segment M11 - Bill Status Indicator/Bill of Lading Type Code contains a value not provided in the Implementation Guides.

037  MISSG OR INV STOWGE POSTN

TS324 V4 - Stowage Position is missing or invalid.

or

BAPLIE LOC - Stowage Position is missing or invalid.

038  B/L ALREADY ON FILE

Record Identifier J01/B01/Segment M11 - The Bill of Lading Number is already on file and not in Deleted Status.
**039 MANIFEST NOT ON FILE**

Application ID AI Record Identifier M01/TS309Y Segment M10 - No record of the manifest was found or was found in deleted status. Manifest is defined by Carrier Code, Vessel Name or Vessel Code, Voyage/Flight, and Manifest Sequence Number.

**or**

Application ID HI/TS353 - Manifest transmitted was not found or was found in deleted status for Conveyance Arrival (4), Vessel Departure (9), Change in Estimated Date of Arrival (Y), Delete Consist (S), or the Enroute (X). Manifest is defined by Carrier Code, Vessel Name or Vessel Code, Voyage/Flight Number, and Manifest Sequence Number.

**or**

Application ID AI Record Identifier M01/TS309Y, HI/TS353, II/TS356, TI/TS357 - Vessel name was submitted in the original manifest but not in subsequent amendments or actions. IMO Lloyds vessel ID was submitted in original manifest but not in subsequent amendments or actions. Vessel name and IMO Lloyds vessel ID were submitted in the original manifest but not in subsequent amendments or actions.

---

**040 B/L NOT ON FILE**

Application ID MI-AI Record Identifier A01/TS309 Segment M13 - No bill was found for Amendment Type Code to ‘D’ or ‘R’.

**or**

Application ID TI Record Identifier T01/TS356 Segment M20 - No bill was found for Permit to Transfer.

**or**

Application ID II Record Identifier A01/TS357 Segment M13 - No bill was found for Amendment Type Code E.

**or**

Application ID II Record Identifier B03/TS357 Segment M21 - No bill was found for Subsequent In-bond.

---

**041 MISSING/INV CONTAINER NBR**

Record Identifier C01 - The Container Number/Equipment Number data element is missing.

**or**

Segment VID - The Equipment Number data element is missing when the Equipment Initial data element is not reported as ‘NC’.

**or**

Rail only. Segment VID - The Equipment Number data element length is greater than 10 characters when the Equipment Initial data element is provided OR is greater than 14 characters when the Equipment Initial data element is NOT provided.

**or**

TS324 Segment N7 - The Container/Equipment Number data element is missing.

**or**

EDIFACT BAPLIE EQD - The Container/Equipment Number data element is missing.
042 INVALID QUANTITY

Record Identifier A01 - Quantity data element for Amendment Type Code R, is transmitted as not numeric.

or

Record Identifier A01/Segment M13 - Quantity data element for Amendment Type Code R, is transmitted as not greater than ‘0’.

or

Record Identifier D01 - Piece Count data element contains data that is not numeric.

or

Record Identifier B01 - Manifest Quantity data element contains data that is missing or not numeric.

or

Record Identifier B01/Segment M11 - Manifest Quantity data element contains data that is not greater than ‘0’.

or

Segment M11/Segment M13/Segment M20 - Quantity data element is more than 10 characters and up to the standard maximum in length.

or

Record Identifier T02/Segment M20 - Permit to Transfer Quantity data element contains data that is not numeric or 0. Permit to Transfer quantity cannot exceed full BOL or BOL/equipment quantity.

or

Record Identifier T02 - Permit to Transfer Quantity data element is missing.

or

Application ID II Record Identifier B03/TS357 Segment M21 - In-bond Quantity data element contains data that is ‘0’.

or

Application ID II Record Identifier B03 - In-bond Quantity data element contains data that is missing or not numeric.

043 INV IN-BOND CHECK DIGIT

Record Identifier I01/Segment M12 – Conventional In-bond Number data elements contain data that is not numeric or has an invalid check digit.

044 NO ZCR RECORD FOUND

Record Identifier ZCR - Record was not transmitted or contains all spaces.

045 INVALID ACTION CODE

Application ID MI/AI Record Identifier A01/TS309 Segment M13 - Action Code/Amendment Type Code data element is missing or contains codes not found in the Implementation Guides.

or

Record Identifier ZCR - AMS User Code contains all spaces

Application ID II Record Identifier A01/TS357 Segment M13 - Action Code/Amendment Type Code data element is missing or contains codes not found in the Implementation Guides.
Guides.

or

Application ID MI Record Identifier A01/TS309 Segment M13 – This message will be sent if a user attempts to add a BOL to a manifest that has an actual arrival date of 365 days or more in the past.

046  INVALID AMENDMENT CODE

Record Identifier A01/Segment M13 - Amendment Code data element is missing or contains values not found in the Implementation Guides.

047  MISSING DESCRIPTION

Record Identifier D01 - Description field is missing.

or

Segment N10 - Description data element is missing.

048  INVALID SNP - XXXXXXXXXX

Application Set MI/Al Record Identifier B02 or TS309 Segment M11 – Where XXXXXXXXXX is the Secondary Notify Party that contains a code that does not appear in the SCAC or FIRMS file.

or

Application Set MI/Al Record Identifier N00 or TS309 Segment N1 – Where XXXXXXXXXX is the Secondary Notify Party that contains a code that does not appear in the SCAC or FIRMS file.

or

Application Set MI/Al Record Identifier N00 or TS309 Segment N1 – Where XXXXXXXXXX is the Secondary Notify Party that contains a code that is not a valid Broker.

or

Application Set II Record Identifier B03 or TS357 Segment M21 – Where XXXXXXXXXX is a code that does not appear in the SCAC or FIRMS file.

or

Application Set II Record Identifier N00 or TS357 Segment N1 – Where XXXXXXXXXX is a code that does not appear in the SCAC or FIRMS file.

or

Application Set II Record Identifier N00 or TS357 Segment N1 – Where XXXXXXXXXX is a code that is not a valid Broker.

or

Rail only. TS358 Segment M13 (Consist) - Where XXXXXXXXXX is a code that does not appear in the Carrier or FIRMS file.

049  T01 LOOP COUNT EXCEEDED

Record Identifier T01 - Used more than 9999 times per envelope.
050  INVALID EST ARRIVAL DATE

Application ID MI/AI Record Identifier P01 - Original Scheduled Date of Arrival data element contains an arrival date in format other than MMDDYY for CAMIR.

or

Application ID MI/AI Record Identifier P01 - Original Scheduled Date of Arrival data element is missing.

or

Application ID HI Record Identifier P01 - When Message Code data element contains 4, 9, U, or Y the Original Scheduled Date of Arrival data element contains an arrival date in format other than MMDDYY for CAMIR.

or

Application ID HI Record Identifier P01 - When Message Code data element contains 4, 9, U, or Y the Original Scheduled Date of Arrival data element is missing.

051  MIB NOT INDICATED ON BL

Record Identifier I01 – Was provided without the Record Identifier B01 Master In-bond Indicator data element set to ‘1’.

or

Segment M12 - Was provided without the M1109 Bill of Lading Type Code data element set to one of the in-bond bill types:

- ‘10’ (Simple/Regular In-bond).
- ‘29’ (Master In-bond);
- ‘38’ (Simple/Regular In-bond Type 62/63 with Security Filing)
- new for Ocean House Bill Release:
  - ‘45’ (House In-bond),
  - ‘14’ (Section 321 Release off the Manifest - Simple/Regular In-bond)
  - ‘22’ (Section 321 Release off the Manifest - House In-bond)

052  H01/M15 IB TYP INV DVRSN

Record Identifier H01/Segment M15 – In-bond Type invalid for Diversion - When Message Code data element contains code ‘Z’, the request for In-bond Diversion is invalid for In-bond Type ‘63’.

053  K01/M13 INVALID AS OF ACT ARR

This message is not currently being used.

054  H01/M15 DVRSN DENIED

Record Identifier H01/Segment 15 - When Message Code data element contains code ‘Z’, the request for In-bond Diversion has been denied because the Record Identifier H01/Segment M15 denotes an entity which has an active hold at the In-bond destination.

055  MISSG HAZMAT CODE QUALIF

TS324/Segment H1 - HAZMAT Code Qualifier is missing or invalid.
or

EDIFACT BAPLIE/Segment DGS - HAZMAT Code Qualifier is missing or invalid.

056 CONV NOT ON FILE
This message is not currently being used.

057 INVALID VOLUME
Record Identifier B02 - If Volume data element is provided, must be numeric.
or
Record Identifier B02 – Volume is missing when the Volume Unit is provided.

058 ACCUM QTY NOT = BILL QTY
Record Identifier D01/Segment N10 - Manifest Quantity data element in Record Identifier B01/Segment M11 contains a quantity that does not equal the sum of quantities on the Record Identifier D01/Segment N10.

059 A01/M13 REQ AS OF ACT/ARR
Application Set MI Record Identifier B01/TS309W Segment M11 – Application Set AI Record Identifier A01/TS309Y Segment M13 is required to add a bill after vessel arrival.

060 XXXX BILL REJECTED XXXX
Record Identifier B01/Segment M11 – Bill not accepted because of an error within the Bill data.

061 MISSG HAZMAT PAGE NBR
This message is not currently being used.

062 MISSG OR INV PORT OF LOAD
TS324/Segment R4 - Port of Loading is missing or invalid per Implementation Guide.
or
EDIFACT BAPLIE/Segment LOC - Port of Loading is missing or invalid per SMDG Implementation Guide.

063 MISSG OR INV PORT OF DSCHRG
TS324/Segment R4 - Port of Discharge is missing or invalid per Implementation Guide.
or
EDIFACT BAPLIE/Segment LOC - Port of Discharge is missing or invalid per SMDG Implementation Guide.
064  **A01 LOOP COUNT EXCEEDED**

Record Identifier A01 - Used more than 9999 times per envelope.

065  **S01/U01/N01 COUNT EXCEEDED**

Record Identifier’s S01 or U01 - Used more than once per bill of lading (B01 Record).

or

Record Identifier N01 - Used more than three times per Bill of Lading (B01 Record).

066  **HAZMAT SEGMENTS EXCEED 99**

Record Identifier V01 - Transmitted in excess of the allowable 99 hazardous material records per container per bill of lading set.

067  **HAZMAT CODE MISSING/INV**

Record Identifier V01 - Hazardous Material Code data element is missing.

or

Record Identifier V01/Segment H1 - Hazardous Material Code data element contains an invalid value.

or

TS324 Segment H1 - Hazardous Material Code data element contains an invalid value.

or

EDIFACT BAPLIE DGS - Hazardous Material Code data element contains an invalid value.

068  **HAZMAT DATA OUT OF ORDER**

This message is not currently being used.

069  **HAZMAT REC PER SET EXC**

Record Identifier V02 - Transmitted in excess of the allowable one Record Identifier V02 per Record Identifier V01.

or

Record Identifier V03 - Transmitted in excess of the allowable two Record Identifier V03 records per Record Identifier V01.

070  **INV HAZMAT CODE QUAL**

Record Identifier V01/Segment H1 - Hazardous Material Code Qualifier is not found in the Implementation Guide.

or

Record Identifier V01/Segment H1 - Hazardous Material Code Qualifier is missing.

071  **INVALID FLASHPOINT TEMP**

Record Identifier V02 - If provided, Flashpoint Temperature must be numeric.
072  **INV FLASHPOINT TEMP UOM**

Record Identifier V02/Segment H1 - If provided, Flashpoint Temperature UOM is not found in the Implementation Guide.

073  **NO HARMONIZED NUMBER FOUND**

Record Identifier D00/Segment N10 - When Record Identifier I01/Segment M12 In-bond Type is T&E ‘62’ or IE ‘63’, the Harmonized Number data element is required.

074  **INCORRECT HARMONIZED NBR**

Record Identifier D00/Segment N10 – If provided, first six positions of the Harmonized Number Data Element contains data that does not appear in the Harmonized Schedule file.

or

Record Identifier D00/Segment N10 – If provided, cannot be less than 6 or more than 10 characters in length.

075  **COMM VALUE MISSING OR INV**

Record Identifier D00/Segment N10 - When Record Identifier I01/Segment M12 In-bond Type is T&E ‘62’ or IE ‘63’, the Value data element is missing.

or

Record Identifier D00/Segment N10 - Value data element is not numeric.

076  **COMM WEIGHT MISSING OR INV**

Record Identifier D00 - When Record Identifier I01/Segment M12 In-bond Type is T&E ‘62’ or IE ‘63’, the Weight data element is missing.

or

Record Identifier D00 - Weight data element is not numeric.

or

Record Identifier D00 - Weight data element is missing when Weight Unit is provided.

077  **COMM WEIGHT UNIT INVALID**

Record Identifier D00 - When Record Identifier I01/Segment M12 In-bond Type is T&E ‘62’ or IE ‘63’, the Weight Unit data element contains an invalid value per the Implementation Guides.

or

Record Identifier D00 - Weight Unit data element is missing when Weight data element is provided.

078  **MARKS AND NUMBERS MISSNG**

Record Identifier D02 - Marks and Numbers field is missing.

or

Record Identifier D02 – Record was not transmitted.

or

Segment N10 – Marks and Numbers data element is missing.
079  **D02 COUNT EXCEEDED**

Record Identifier D02 - Used more than 999 D02 Records per C01 Record.

080  **MAN SEQ NBR INVALID**

Record Identifier M01/Segment M10 - When provided the Manifest Sequence Number is not numeric.

or

Segment M10 – When provided the Manifest Sequence Number cannot be greater than 6 characters in length.

081  **INVALID DUNS NUMBER**

Record Identifier N00/Segment N1 - The DUNS number is not a valid DUNS number.

This message is not currently being used.

082  **H01/M15 DVRSN PORT INV**

Record Identifier H01/Segment M15 - When Message Code data element contains code ‘Z’, the request for In-bond Diversion has been denied because the Diversion Port is equal to the Intended Destination already on file.

083  **A01/M13 QTY NOT = BILL QTY**

Record Identifier A01/Segment M13 - Action Code data element contains 'R', but the bill status is 30, Discrepancy Report Pending. The Record Identifier A01/Segment M13 sent to correct a discrepancy had an added quantity that did not equal the amended bill quantity.

084  **INV FLSHPNT TEMP NEG IND**

Record Identifier V02 - If provided, Flashpoint Temperature Negative Indicator is not found in the Implementation Guide.

085  **MISSING ENTRY NUMBER**

This message is not currently being used.

086  **MISSING ENTRY TYPE**

This message is not currently being used.

087  **INVALID ENTRY TYPE**

This message is not currently being used.

088  **MISSING RELEASE DATE**

090 SEND G01/M14 AFTER CON ARR

This message is not currently being used.

091 INVALID ENTRY NUMBER

This message is not currently being used.

092 S02/U02/N02 COUNT EXCEEDED

Record IDs S02, U02, or N02 - Used more than once per S01/U01/N01 Record loop.

or

Record Identifier N02 - Used more than two times per N00 Record loop.

093 VESSEL MUST BE ARRIVED

Record Identifier H01/Segment M15 - When Message Code data element contains code 1, 2, or 3 the vessel must be arrived before the in-bond arrival.

094 S03/U03/N03 COUNT EXCEEDED

Record IDs S03, U03, or N03 - Used more than once per S01/U01/N01 Record loop.

or

Record Identifier N03 - Used more than once per N00 Record loop.

095 M01/M10, P01/P4 RECS MSSNG

This message is not currently being used.

096 RUN HAS BEEN TERMINATED

The transmission was terminated for various reasons: database problem. Report this error to your assigned CBP Client Representative or the CBP help desk at 1-800-927-8729.

097 PLEASE CALL CLIENT REP

This error message accompanies error messages 989 thru 999.

098 NOT AUTHORIZED TO TRANSMIT

This message is not currently being used.

099 N04 COUNT EXCEEDED

Record Identifier N04 - Used more than once per N00 loop.
100 INV PROCESS MODE

This message is not currently being used.

101 NOT OPERATIONAL

This message is not currently being used.

102 NO BILLS PROCESSED FOR PORT

Record Identifier P01/Segment P4 - Contains an error causing all bills for this port to be rejected without further error checking.

103 BILL ALREADY DELETED

This message is not currently being used.

104 INVALID EST ARRIVAL DATE

This message is not currently being used.

105 I01 COUNT EXCEEDED

Application ID MI/AI Record Identifier I01 - Used more than once per B01 Record.

or

Application ID II Record Identifier I01 - Used more than once per B03 Record.

106 I02 COUNT EXCEEDED

Record Identifier I02 - Used more than once per I01 Record.

107 B01 LOOP COUNT EXCEEDED

Record Identifier B01 - Used more than 9999 times per envelope.

108 BONDED CARRIER ID REQUIRED

Record Identifier I01/Segment M12 - The Bonded Carrier ID number is missing.

or

Record Identifier H01/Segment M15 - When Message Code data element contains code A or Z the Bonded Carrier ID number is missing.

or

Record Identifier T01/Segment M20 - Pertains to Permit to Transfer, but the Bonded Carrier ID number is missing.

109 INVALID BONDED CARRIER ID

Record Identifier I01/Segment M12 – The Bonded Carrier ID number is not in bonded carrier file.
or
Record Identifier H01/Segment M15 - When Message Code data element contains code A or Z the Bonded Carrier ID number is not in the bonded carrier file.

or
Record Identifier T01/Segment M20 - For Permit to Transfer, but the Bonded Carrier ID number is not in the bonded carrier file.

110 **B03 LOOP COUNT EXCEEDED**

Record Identifier B03 - Used more than 9999 times per envelope.

111 **M01/M10 MIB IND - Y OR SPACE**

This message is not currently being used.

112 **B01/M11, I01/M12 ENT NOT =**

This message is not currently being used.

113 **B01/M11, I01/M12 PORT DEST NOT =**

This message is not currently being used.

114 **P01/P4 PORT CANT = IB DEST**

Application ID MI-AI Record Identifier P01/TS309 Segment P4 - If Record Identifier I01/Segment M12 has in-bond entry type codes IT ‘61’ or T&E ‘62’, the In-bond Port of Destination data element is the same as the Port of Discharge data element in Record Identifier P01/Segment P4.

Or
Application ID II Record Identifier I01/TS357 Segment M12 - If Record Identifier I01/Segment M12 has in-bond entry type codes 61 or 62, the In-bond Port of Destination data element is the same as the Port of Discharge on the BOL when no previous in-bond is given; or the in-bond port of destination data element is the same as the in-bond arrival port of the previous in-bond number.

Or
Rail only. TS309P/TS309Y(A)dd Segment P4 - If Segment M12 has in-bond entry type codes 69 or 70, the In-bond Port of Destination data element is the same as the Port of Discharge data element in Segment P4.

Or
Rail only. TS309T Segment P4 - If Segment M12 has in-bond entry type code 69, the In-bond Port of Destination data element is the same as the Port of Discharge data element in Segment P4.

115 **H01 MSG CODE IS REQ**

Record Identifier H01 - The Message Code data element is missing.

116 **INVALID H01/M15 MSG CODE**

Record Identifier H01/Segment M15 - Message Code data element contains anything other than a valid code per Implementation Guide.
117  **H01 NUM ARR IS REQ**

Record Identifier H01– The In-bond Entity data element is missing when the Message Code data element is other than 4, 9, U, or Y.

118  **H01 DATE INVALID**

Record Identifier H01- When Message Code data element contains code 1, 2, 3, 4, 5, 6, 7, A, or Y the Date data element contains invalid month, day, and year or is not numeric.

119  **H01/M15 REQUIRED**

This message is not currently being used.

120  **MIB PREFIX NOT ON FILE**

Record Identifier I01/Segment M12 - The Paperless In-bond Number data element contains an in-bond prefix that does not match the prefix for this carrier in the carrier file.

121  **MIB NBR MUST BEGIN WITH V**

Record Identifier I01/Segment M12 - The Paperless In-bond Number data element contains an in-bond number that does not begin with V.

122  **H01/M15 BL NUM NOT ON FILE**

Record Identifier H01/Segment M15 - When Message Code data element contains code 2, 6, G, J, M, U or V, the bill number is not on file. Codes M and U are new for Ocean House Bill Release.

123  **H01/M15 IB NUM NOT ON FILE**

Record Identifier H01/Segment M15 - When Message Code data element contains code 1, 5, A, F, I, L, or Z, the in-bond number is not on file.

124  **H01/M15 IB NUM ALREADY ARR**

Record Identifier H01/Segment M15 - When Message Code data element contains code ‘1’ or ‘Z’, the in-bond number is already arrived.

125  **H01/M15 PREV IB CONCLUDED**

Record Identifier H01/Segment M15 - When Message Code data element is 1, 2, 3, 5, 6, 7, A, F, G, H, I, J, K, L, or Z, the action is not allowed against a Previous In-bond Number.

126  **H01/M15 BL NUM ALREADY ARR**

Record Identifier H01/Segment M15 - When Message code data element contains code ‘2’, the bill number is already arrived.
127  **H01 LOOP COUNT EXCEEDED**

Record Identifier H01 - Used more than 9999 times per envelope.

128  **H01/M15 DATE REQUIRED**

Record Identifier H01 - When Message Code data element contains code 1, 2, 3, 4, 5, 6, 7, 9, A, O, U, or Y the Date data element is missing. Codes O and U are new for Ocean House Bill Release.

129  **H01/M15 DATE EXCEEDS TODAY**

Record Identifier H01/Segment M15 - When Message code data element contains code 1, 2, 3, 4, 5, 6, 7, 9, A, O or U the Date data element must not contain a date that is in the future. Codes O and U are new for Ocean House Bill Release.  

or  

Rail only  Segment M15 - When Action Code data element contains code 1, 2, 3, 4, 5, 6, 7, or A the Date data element contains a date that is in the future.

130  **H01/M15 ARR DTE OVER 120**

This message is not currently being used.

131  **CONTAINER ALREADY ARRIVED**

Record Identifier H01/Segment M15 - When Message Code data element contains code ‘3’, the Container is already arrived.

132  **H01/M15 ARR DTE BEFORE DEP**

Record Identifier H01/Segment M15 - When Message code data element contains code 1, 2, or 3, the Date data element contains an arrival date at the destination port that is before the departure date from the discharge port.

133  **PORT NOT VALID FOR IB NUM**

Record Identifier I01/Segment M12 - In-bond Number has already been used for another destination.

134  **INVALID MIB CHECK DIGIT**

Record Identifier I01/Segment M12 - Paperless In-Bond Number data element contains a check digit for the V number that does not agree with the formula for calculating check digits.

135  **NO VALID C01/VID RECORD**

Record Identifier C01/Segment VID - Record was not transmitted.

136  **INVALID ISSUER CODE**

Record Identifier J01/Segment M11 - Transmitted for a carrier not in the carrier file.
Customs Automated Manifest Interface Requirements – Import Ocean ACE M1

or
Record Identifier J01/Segment M20 - Transmitted for a carrier not in the carrier file.

or
Record Identifier J01/Segment M21 - Transmitted for a carrier not in the carrier file.

or
Record Identifier J01/Segment M13 - Transmitted for a carrier not in the carrier file.

137 **NO ISSUER CODE FOUND**

Application ID MI Record Identifier J01 - Issuer Code data element is missing when Record Identifier B01 is reported.

or
Application ID TI Record Identifier J01 - Issuer Code data element is missing.

or
Application ID II Record Identifier J01 - Issuer Code data element is missing.

or
Application ID AI Record Identifier J01 - Issuer Code data element is missing when Record Identifier A01 is reported to add a BOL.

138 **INV MOT FOR EXP REPORTING**

Record Identifier I02 – When provided, and In-bond Type Code data element is T&E '62' or IE '63' the Mode of Transportation Code data element is not equal to ‘10’, ‘11’, or ‘S’ per Implementation Guides.

or
Record Identifier I02 – When In-bond Type Code data element is T&E '62' or IE '63' the Mode of Transportation Code data element is missing when Vessel Name is given.

or
Record Identifier H02/Segment M15 – When provided, and Message Code data element contains code 5, 6 or 7 the Mode of Transport data element is not equal to ‘10’, ‘11’, or ‘S’ per Implementation Guides.

or
Record Identifier H02/Segment M15 – When Message Code data element contains code 5, 6 or 7 the Mode of Transport data element is missing when export conveyance name is given.

139 **NO VALID EQD/N7 RECORD**

EDIFACT BAPLIE EQD – Record was not transmitted.

or
TS324 Segment N7 - Record was not transmitted.

140 **BL NUM NOT ALLOWED FOR USE**

Record Identifier J01-B01/Segment M11 - Bill of Lading Sequence Number data element contains a bill number that has been used within the last 3 years and is not active.

or
Rail only. Segment M11 – Rail 309P Bill of Lading Sequence Number data element
contains a Bill Number that was purged after 60 days and was not deleted by the carrier.

141 **H02 COUNT EXCEEDED**

Record Identifier H02 - Used more than once per H01 Record.

142 **CONV ALREADY ARRIVED**

Record Identifier H01/Segment M15 - When Message code data element contains Conveyance Arrival (4), the Conveyance Arrival Date/Time is already on file.

*or*

Rail only. Segment M15 - When Message code data element contains a Conveyance Enroute (X) message is received after the conveyance is arrived.

143 **DDPP NOT ON MANIFEST**

Record Identifier H01/Segment M15 - When Message code data element contains Conveyance Arrival (4) or Change EDA (Y), the Port of Arrival data element contains a Port of Arrival that is not on the original manifest.

*or*

Rail only. Segment M15 - When Message code data element contains Conveyance Arrival (4), Delete Consist (S) or Conveyance Enroute (X), the Port of Arrival data element contains a Port of Arrival that is not on the original manifest.

144 **ARRIVAL TIME IS INVALID**

Record Identifier H01 - When Message Code data element contains code 1, 2, 3, 4, 5, 6, 7, A, O, U or Y the Time data element is not in a 24-hour clock format. Codes O and U are new for Ocean House Bill Release.

145 **CONV ARR DATE OVER 30 DAYS**

Record Identifier H01/Segment M15 - When Message code data element contains code ‘4’, the Date data element contains an arrival date over 30 days in the past.

146 **INVALID SEAL NUMBER**

Record Identifier C01/VID - When provided, the Seal Number reported must be at least two characters in length.

147 **CONV NAME OR CONV CODE REQ**

Application ID MI-AI Record Identifier M01 / TS309-TS358 Segment M10 - The Vessel Name and Vessel Code data elements are missing.

*or*

Application ID HI Record Identifier M01/TS353 Segment M10 - When Record Identifier H01/Segment M15 Message Code data element is 4, 9, U or Y the Vessel Name and Vessel Code data elements are missing.

*or*

Rail only. TS353 Segment M10 - When Segment M15 Message Code data element is 4, S or X the Vessel Name data element is missing.
148 **INCORRECT CONV CODE**

Record Identifier M01/Segment M10 - When provided, Vessel Code data element contains a code that is not in vessel code file.

*or*

TS324 Segment V1 - The Vessel Code data element contains a code that is not in vessel code file.

*or*

EDIFACT BAPLIE TDT - The Vessel Code data element contains a code that is not in vessel code file.

149 **J01 LOOP COUNT EXCEEDED**

Record Identifier J01 - Used more than 9999 times per envelope.

150 **P01/P4 LOOP CNT EXCEEDED**

Application MI-AI Record Identifier P01 - Used more than 20 times per envelope.

*or*

Application HI-TI-II Record Identifier P01 - Used more than 1 time per envelope.

*or*

Application 353/356/357/358 Segment P4 - Used more than 1 time per envelope.

151 **INCORRECT VESSEL NAME**

Application ID MI-AI Record Identifier M01/TS309 Segment M10 - Manifest Vessel Name data element contains a name that does not match the name associated with the vessel code in the vessel code file.

*or*

Application ID HI Record Identifier M01/TS353 Segment M10 - When Record Identifier H01/Segment M15 Message Code data element is 4, 9, U or Y the Manifest Vessel Name data element contains a name that does not match the name associated with the vessel code in the vessel code file.

*or*

TS324 Segment V1 - The Vessel Name data element contains a name that does not match the name associated with the vessel code in the vessel code file.

*or*

EDIFACT BAPLIE TDT - The Vessel Name data element contains a name that does not match the name associated with the vessel code in the vessel code file.

152 **CONV NAME INVALID**

Application ID MI-AI Record Identifier M01/ TS309 Segment M10 - Manifest Vessel Name data element contains one or more slashes or contains a character not recognized in the ‘American English Keyboard’.

*or*

TS309 Segment M10 - The Vessel Name data element length is greater than 23 characters and up to the standard maximum.

*or*

TS309/357 Segment M12 – The Export Vessel Name data element length is greater than 23 characters and up to the standard maximum.
153 **CONV ARR NOT AUTH FOR PORT**

This message is not currently being used.

154 **H01/M15 TIME IN THE FUTURE**

Record Identifier H01/Segment M15 - When Message code data element contains code 1, 2, 3, 4, 5, 6, 7, 9, or A, O or U the Time data element is in the future and the Date data element is the current date. Codes O and U are new for Ocean House Bill Release.

or

Rail only. Segment M15 - When Message Code data element contains code 1, 2, 3, 4, 5, 6, 7, or A the Time data element is in the future and the Date data element is the current date.

155 **H01 ALREADY TRANS FOR PORT**

This message is not currently being used.

156 **BILL NUMBER REQUIRED**

Record Identifier T01/Segment M20 - Bill of Lading Number data element is missing.

157 **FIRMS CODE REQUIRED**

Record Identifier T01 - FIRMS Code data element is missing.

158 **FIRMS CODE NOT ON FILE**

Record Identifier T01/Segment M20 - FIRMS Code data element contains a code not in the FIRMS file.

or

Rail only. TS358 Segment P4 (Consist) - FIRMS Code data element contains a code not in the FIRMS file.

or

Record Identifier H01/Segment M15 – When provided, FIRMS Code data element contains a code not in the FIRMS file.

159 **FIRM NOT ACTIVE**

Record Identifier T01/Segment M20 - The FIRMS Code data element contains a code not classified as active in the FIRMS file.

or

Record Identifier H01/Segment M15 – When provided, the FIRMS Code data element contains a code not classified as active in the FIRMS file.

160 **FIRM NOT BONDED**

Record Identifier T01/Segment M20 - The FIRMS Code data element is not classified as bonded in the FIRMS file.
161  **PTT ALREADY AUTHORIZED**

Record Identifier T01/Segment M20 – The Permit to Transfer has already been requested and authorized for this bill of lading.

162  **BILL STATUS INELIG FOR PTT**

Record Identifier T01/Segment M20 – The Permit to Transfer not allowed against a bill in a ‘hold’ status.

163  **BILL TYPE INELIGBL FOR PTT**

Record Identifier T01/Segment M20 - Bill type must be Regular, Master, or In-bond **or** House (new for *Ocean House Bill Release*).

164  **FIRM NOT ON FILE FOR DDPP**

Record Identifier T01/Segment M20 - FIRMS Code data element contains a code not on file for this port for in-bond bill types.

*or*

Record Identifier H01/Segment M15 – When provided, FIRMS Code data element contains a code not on file for this port of In-bond arrival.

165  **CONT NOT ON FILE FOR BILL**

Record Identifier T01/Segment M20 - Container Number data element contains a number that is not in the container file.

*or*

Record Identifier H01 - When Message Code data element is 3, 7, H, K, **N, O** or P, the Container Number data element contains a Container Not On File For Bill or Container Not On File. **Codes N and O are new for Ocean House Bill Release.**

166  **EXPR DATE BEFORE ARR DATE**

Record Identifier H01/Segment M15 - When Message Code data element contains codes 5, 6, or 7 the request to export the in-bond is rejected because the in-bond has not been arrived.

*or*

Record Identifier H01/Segment M15 - When Message Code data element contains codes 5, 6, or 7 the Date data element has an in-bond export date that is before the arrival date that is on file for the in-bond.

167  **EXP DATE ALREADY ON FILE**

Record Identifier H01/Segment M15 - When Message Code data element contains codes 5, 6, or 7 the status of the in-bond indicates that the in-bond is already exported.

168  **CONTACT CLIENT REP TO EXP**

This message is not currently being used.

177 MANIFEST ARCHIVED

This message is not currently being used.

178 PREV IB NUM NOT ON FILE

Record Identifier B03/Segment M21 – When provided the previous In-Bond must be on file.

179 BILL IN HELD STATUS

Record Identifier H01/Segment M15 - When Message Code data element contains codes 5, 6, or 7 and there is a bill level hold on any of the bills on the in-bond.

or

Record Identifier H01/Segment M15 - When Message Code data element contains codes 5, 6, or 7 and there is a container level hold on any of the containers on the in-bond.
Record Identifier H01/Segment M15 - When Message Code data element contains code A and there is a bill level hold on any of the bills on the in-bond for the Transfer of Liability.  

or  

Record Identifier H01/Segment M15 - When Message Code data element contains code A and there is a container level hold on any of the containers on the in-bond for the Transfer of Liability.

**180 MISSING QUANTITY**

Record Identifier B03/Segment M21 - The quantity data element is missing.

**181 PREV IB MOVE MUST BE ARR**

Record Identifier B03/Segment M21 - The previous in-bond movement must be arrived before you can add a second in-bond movement.

**182 M01 GROUP/ CNT EXCD**

Application ID MI-AI Record M01 - More than 99 Manifest Groupings submitted for envelope.  

or  

Application ID HI-TI-II Record M01 - Used more than 1 time per envelope.

**183 M02 COUNT EXCEEDED**

Record Identifier M02 - Used more than once per M01 Record.

**184 DUPLICATE IB NUM FOR BL**

Application ID II Record Identifier I01/TS357 Segment M12 - This in-bond already exists for the Bill of Lading.

**185 MIB ENTRY NOT PREV ENTRY**

Record Identifier I01/Segment M12 - The in-bond is on file and the in-bond entry type does not match the currently reported in-bond entry type.

**186 B03/M21-I01/M12 PAIR REQ**

Record Identifier I01/Segment M12 - One B03/M21 and one I01/M12 are required. CBP requires a B03/M21 segment to be sent if an I01/M12 is provided.  

or  

Record Identifier B03/Segment M21 - One B03/M21 and one I01/M12 are required. CBP requires an I01/M12 segment to be sent if a B03/M21 is provided.

**187 QTY REQUIRED W/C4 CODE**

Rail only. Segment N10 - N1001 quantity is required when C4 code is provided.
188 **ONE C4 ALLOWD FOR BILL TYP**

Rail only. Segment N10 - Only one C4 can be reported for M1109 Bill of Lading Type Codes for Regular Bill ‘00’ and Unit Train ‘26’.

189 **C4 CODES NEED SAME IMPORTR**

Rail only. Segment N10 – When M11 bill type indicates a single entry for multiple C4 codes all C4 codes must have same importer.

190 **B04/N9 COUNT EXCEEDED**

- Application ID MI/AI Record Identifier B04 - Used more than 999 times per Record Identifier B01.
- or
- Application ID MI Record Identifier B04 - Used more than one time per Record Identifier M01 (for the Unique Voyage Identifier).
- or
- Application ID II Record Identifier B04 - Used more than 999 times per Record Identifier B03.
- or
- Application Set AI/HI/II/TI Record Identifier B04 – Not valid at manifest level Record Identifier M01 (for the Unique Voyage Identifier).
- or
- TS309Y Segment N9 – Not valid at manifest level Segment M10 (for the Unique Voyage Identifier).

191 **N00 LOOP COUNT EXCEEDED**

- Application ID MI/AI Record Identifier N00 - Used more than 25 times per Record Identifier B01.
- or
- Application ID II Record Identifier N00 - Used more than 25 times per Record Identifier B03.

192 **MISSING CITY NAME**

- Record Identifier H01/Segment M15 - When Message code data element contains code A the City Name data element is missing.
- or
- Record Identifier N03/Segment N4 – City Name data element is missing when N03/N4 is provided.

193 **MISSING STATE CODE**

- Record Identifier H01/Segment M15 - When Message code data element contains code A the State Code data element is missing.
194  **INVALID STATE CODE**
This message is not currently being used.

195  **INV UNIQUE VOYAGE IND**
Record Identifier B04/Segment N9 - At the manifest level (M01/M10), does not contain a valid CBP Unique Voyage Indicator. The CBP Unique Voyage Indicator must begin with the SCAC of the Vessel Operator and be unique for 5 years.

196  **INVALID SECONDARY SCAC 2**
This message is not currently being used.

197  **D00 REQ ON EXP IB**
Record Identifier D00 – Record was not transmitted for In-bond Type T&E ‘62’ or IE ‘63’ movement to report the Harmonized Code, Value, Weight and Weight Unit.

198  **INV MAN TYP CD OR APPL ID**
Segment M10 - Manifest Type Code (M1009) in the TS309 is anything other than P, T, W, or Y.

    or
Segment M10 - Manifest Type Code (M1009) in the TS353 is anything other than H.

    or
Rail only. TS353 Segment M10 - Manifest Type Code (M1009) is missing.

    or
Segment M10 - Manifest Type Code (M1009) in the TS356 is anything other than T.

    or
Segment M10 - Manifest Type Code (M1009) in the TS357 is anything other than I.

    or
Segment M10 - Manifest Type Code (M1009) in the TS358 is anything other than S.

199  **INVALID BILL TYPE**
This message is not currently being used.

200  **INVALID FILER FOR DDPP**
This message is not currently being used.

201  **INVALID ENTITY IDENTIFIER**
Record Identifier N00/Segment N1 - Entity identifier code is anything other than valid codes used in the Implementation Guides per Application ID or Transaction Set.

202  **INVAL ENTITY IDENT QUAL**
Record Identifier N00/N1 - Identification qualifier is not equal: to ’17’ when entity identifier is ‘CB’; to ‘2’ or ‘17’ when entity identifier is ‘SNP’; or to ‘1’ to report DUNS when entity identifier is ‘ST’ or ‘BKP’ where ID qualifier is valid per Implementation Guide.
**203  VEHICLE ID NUM NOT PRESENT**

Record Identifier C02 - Vehicle Identification Number is missing or spaces.

**204  INV MANIFEST UNIT CODE**

Record Identifier B01/Segment M11 - Manifest Unit code is other than codes specified in the Implementation Guides.

*or*

Record Identifier B01 - Manifest Unit code is missing.

*or*

Record Identifier D01/Segment N10 - When provided, Manifest Unit code is other than codes specified in the Implementation Guides.

**205  CONSIST NOT ON FILE**

This message is not currently being used.

**206  CONSIST ALREADY ARR/LOCKED**

Rail only. TS353 Segment M15 – When Message code data element contains code S, cannot delete consist after it has been arrived or locked via portal.

*or*

Rail only. TS358 (Consist) – Cannot amend consist after it has been arrived or locked.

**207  CONVEYANCE ALREADY CONSIST**

This message is not currently used.

**208  BILL ALREADY CONSISTED**

Rail only. TS358 Segment MBL (Consist) - Bill of Lading number previously consisted on another train.

*or*

TS309P, TS358 (Consist) – resubmission of Bill of Lading in 309P when the Bill is already consisted on a train

**209  BL NOT ON FILE OR DELETED**

Rail only. TS 358 Segment MBL (Consist) - Bill of Lading number not in database or is in deleted status.

**210  INVALID EQUIP DESC CODE**

Rail only. TS358 Segment VID (Consist) - Container/Equipment Description code is anything other than codes listed in Appendix K.
211 INVALID LOAD-EMPTY IND

Rail only. TS358 Segment VID (Consist) - Load/empty indicator is anything other than 'L' or 'E'.

or

Application ID MI-AI Record Identifier C01/TS309 Segment VID - If sending the empty bill type ‘2’ in CAMIR or ‘12’ in ANSI X12, must also show the loaded condition of ‘E’ for empty in C01, position 75 or VID10.

or

Application ID MI-AI Record Identifier C01/TS309 VID – If a container (C01/VID) segment is repeated in the message for the same container number, the Loaded-Empty Indicator must have the same value throughout the repeated records.

212 AMS BILL ON FILE

This message is not currently being used.

213 AMENDMENT CODE NOT=S

Rail only. TS358 Segment M13 (Consist) - The Amendment code is anything other than 'S'.

214 MAX 2nd NOTIFY REACHED

This message is not currently being used.

215 INVALID EST ARR TIME

Rail only. TS358 Segment P4 (Consist) - The estimated arrival time is missing.

216 DB ERROR ON XRJ FILE

This message is not currently being used.

217 FIRMS CODE DEACTIVATED

Rail only. TS358 Segment P4 (Consist) - The FIRMS code is in inactive status in the FIRMS file.

218 FIRMS NOT BONDED

This message is not currently being used.

219 MANIFEST TYPE CODE NOT=S

This message is not currently being used.

220 INVALID VOYAGE/FLIGHT NBR

Rail only. TS358 Segment M10 (Consist) - The voyage/flight number is not a valid Julian date.
221  **INVALID BL NUMBER**

Rail only. TS358 Segment MBL01 (Consist) - SCAC is not in the carrier file.

*or*

Rail only. TS358 Segment MBL02 (Consist) - The bill of lading number is non-AMS and contains spaces, non-American English keyboard characters or the length is invalid.

*or*

Rail only. TS358 Segment MBL02 (Consist) - The Bill of Lading Number data element length is greater than 12 characters and up to the standard maximum.

*or*

Rail only. TS358 Segment MBL (Consist) - The Unique Bill of Lading Number is not on file.

222  **IB ARRIVAL NOT REQD AT IP**

Rail only. TS353 - For In transit In-bond Type the wrong port was given for in-bond arrival.

223  **M13 INVALID FOR NON-AMS BILL**

Rail only. TS358 Segment M13 (Consist) - MBL segment is missing when an M13 is provided.

*or*

Rail only. TS358 Segment MBL/Segment M13 (Consist) - MBL04 cannot equal 'N' if M13 is provided.

224  **MBL INVALID AMS INDICATOR**

Rail only. TS358 Segment MBL (Consist) - AMS indicator is anything other than 'Y' or 'N'.

225  **N00/N01 RECORD NOT FOUND**

Record Identifier N00 or Record Identifier N01 – Either Record was not transmitted when N02 was provided.

226  **N02/N3 RECORD NOT FOUND**

Record Identifier N02/Segment N3 – Records/Segments are mandatory if N00/N1 Entity Identifier Codes other than CB or SNP.

227  **N01 RECORD NOT FOUND**

This message is not currently being used.

228  **SPEC CATEGORY W/NO D00 VAL**

This message is not currently being used.
229  ABI BROKER NOT FOUND

Record Identifier N00 - If the Identification Code Qualifier is '17', the filer code in the ID Code field/Identification Code element is not in the ABI Routing Code file.

or

Record Identifier N00 - If the Identification Code Qualifier is '17', the filer code in the ID Code field/Identification Code element is missing.

230  COULDN'T VERIFY ABI BROKER

This message is not currently being used.

231  BROKER NOT AUTHZD

Application IDs MI/AI Record Identifier N00 / TS309 Segment N1 - Filer not authorized as a Customs Broker.

or

Application ID II Record Identifier N00 / TS357 Segment N1 - Filer not authorized as an In-bond Participant.

232  INVALID REF # QUALIFIER

Record Identifier B04/Segment N9 - Reference Identification Qualifier is not valid per Implementation Guides.

or

X.12 Segment N9 – a Reference Number Qualifier should be specified in the N9 segment located at position 090, and not the N9 segment at position 045.

or

Segment M1208/M2007 - Reference Identification Qualifier is not valid per Implementation Guide.

or

Segment N1004 - Commodity Code Qualifier is not valid per Implementation Guide.

or

Segment PER01 - Contact Function Code is not valid per Implementation Guide.

or

Segment M2005 – Location Qualifier is not valid per Implementation Guide.

233  WRONG CONVEYNCE ARRVL PORT

Record Identifier H01/Segment M15 - When Message code data element contains code ‘4’, the Port of Arrival not equal to Port of Estimated Arrival in P01/P4.

234  COMM QUALIFIER MISSING

Record Identifier N04/PER - If a communications number is present, communications qualifier is missing.

235  COMM NUMBER MISSING/INV

Record Identifier N04 - If a communications qualifier is present, communications number is missing.
Segment **PER03-PER06** – Communication Number data element length exceeds 64 characters accepted by CBP and up to the standard maximum in length.

### 236 INVALID COMM QUAL

Record Identifier N04/Segment PER - The communications qualifier is invalid per Implementation Guide.

### 237 CANT CANCEL - NOT ARRIVED

Record Identifier H01/Segment M15 - When Message code data element contains code F, G or H the In-bond Arrival being cancelled is unarrived at destination.

### 238 CANT CANCEL - ALREADY EXP

Record Identifier H01/Segment M15 - When Message code data element contains code F, G or H the In-bond Arrival being cancelled is already exported at destination.

### 239 MAX TRNSACTN CNT REACHED

This message is not currently being used.

### 240 CANT CANC - NOT EXPORTED

Record Identifier H01/Segment M15 - When Message code data element contains code I, J or K the In-bond export being cancelled is not exported at destination.

### 241 D01 COUNT EXCEEDED

Record Identifier D01 - Used more than 999 D01 Records per C01 Record.

### 242 C4 CODE NOT VALID xxxx

Rail only. Segment N1 - Customs Broker in the N104 does not match the Broker within the C4 Code number – Segment N10.

or

Rail only. Segment N10 - Where ‘xxxx’ will equal ‘C4 ’ to indicate the C4 Code does not exist.

or

Rail only. Segment N10 - Where ‘xxxx’ will equal ‘DDPP’ to indicate the C4 Code does not exist for the Port in the P4.

or

Rail only. Segment N10 - Where ‘xxxx’ will equal ‘PRD ’ to indicate the Product is not active for the C4 Code and the Port in the P4.

or

Rail only. Segment N10 - Where ‘xxxx’ will equal ‘BANK’ to indicate the C4 Code Entry Number Bank is not active for the Broker in the C4 Code and the Port in the P4.
243  **INB NOT ALLOWED WITH LINE RELEASE**

244  **D00 COUNT EXCEEDED**

Record Identifier D00 - Used more than 999 D00 Records per C01 Record.

245  **PREV IB # EXISTS**

Rail only. Segment M12 - Bill is being created with in-bond number that already exists and has at least one active bill attached.

*or*

Application ID MI/AI Record Identifier I01/TS309W-Y Segment M12 - Bill is being created with in-bond number that was previously submitted by a Rail carrier.

*or*

Application ID II Record Identifier I01/TS357 Segment M12 – In-bond Number that was previously submitted by a Rail carrier is being added to an existing Bill.

246  **IB # ABSENT**

Record Identifier I01/Segment M12 - Both the Paperless and Conventional in-bond fields are missing.

247  **TRAIN ALREADY CONSISTED**

Rail only. TS309 Segment M10 - Consist already exists for transit train.

248  **B04/N9 REF ID MISSING**

Record Identifier B04/Segment N9 - Qualifier is indicated but Reference Identification field is missing.

249  **ALL C01/VID FIELDS REQUIRED**

This message is not currently being used. Record Identifier C01/VID – Container/Equipment field is required.

250  **C01/VID DESC CODE INVALID**

Record Identifier C01/Segment VID01 - Code in the Equipment Description Code data element is missing or not in the container/equipment description code table (Appendix I).

*or*

Record Identifier C01/Segment VID09 - If provided, code in the equipment description portion of the Equipment Type data element is not in the container/equipment description code table (Appendix I).

251  **C01/VID LOAD/EMPT STAT INV**
Record Identifier C01/Segment VID in the Application ID MI and AI/TS309 - Code in the Load/Empty Status Code field is anything other than valid codes in the Implementation Guides.

**252 C01/VID TYPE OF SVC INV**

Record Identifier C01/Segment VID - If provided, code in the Type of Service Code field is anything other than valid codes in the Implementation Guides.

**253 C01/VID EQUIP TYPE INVALID**

Record Identifier C01/Segment VID09 - If provided, Equipment Type data element has invalid code per Implementation Guide.

*or*

TS324 Segment N7 - If provided, Equipment Type data element has invalid code per Implementation Guide.

*or*

EDIFACT BAPLIE EQD - If provided, Equipment Type data element has invalid code per Implementation Guide.

**254 C01/VID LENGTH INVALID**

Record Identifier C01 - If provided, Container/Equipment Length field has invalid format per Implementation Guide.

*or*

TS324 Segment N7 - If provided, Container/Equipment Length field has invalid format per Implementation Guide.

*or*

EDIFACT BAPLIE EQD - If provided, Container/Equipment Length field has invalid format per Implementation Guide.

**255 C01/VID HEIGHT INVALID**

Record Identifier C01 - If provided, Height field has invalid format per Implementation Guide.

*or*

TS324 Segment N7 - If provided, Height field has invalid format per Implementation Guide.

*or*

EDIFACT BAPLIE EQD - If provided, Height field has invalid format per Implementation Guide.

**256 C01/VID WIDTH INVALID**

Record Identifier C01 - If provided, Width field has invalid format per Implementation Guide.

*or*

TS324 Segment N7 - If provided, Width field has invalid format per Implementation Guide.

*or*

EDIFACT BAPLIE EQD - If provided, Width field has invalid format per Implementation Guide.
257  **B02/M11 PLACE RECEIPT REQ**

Record Identifier B02/Segment M11 - Place of Receipt data element is missing.

258  **NO I01/M12-FRGN CARGO ROB**

Record Identifier I01/Segment M12 - Cannot provide in-bond record/segment when Bill of Lading Type Code is FROB.

259  **C4 CODE MISSING**

Rail only. Segment N10 – At least one C4 code is required when M1109 Bill of Lading Type Code is 24, 25, or 26 (Line Release type codes). When Multiple N10’s are provided to report additional Description and/or Marks and Numbers, the C4 code is not repeated.

260  **CONSISTED TO DIF DDPP**

This message is not currently being used.

261  **DUP CONTAINER NOT ALLOWED**

Rail only. TS358 Segment VID (Consist) - Contains a duplicate Container/Equipment ID.

262  **INVALID ID – CNTR MUST BE EMPTY**

This message is not currently being used.

263  **REPORT CNTR. DISCRP TO CBP**

This message is not currently being used.

264  **CONV NAME MUST EQUAL TRAIN**

Rail only. TS309P - Bill is preliminary but conveyance name in M10 is anything other than ‘TRAIN’.

265  **MAX 2 CBP BROKER PER BOL**

Record Identifier N00/Segment N1 - More than two CBP brokers, code ‘CB’ in Entity ID code is transmitted where ‘CB’ is a valid qualifier per Implementation Guide.

266  **A01/M13 MISSNG FOR AMNDMNT**

Application Set AI/TS309Y - Record Identifier A01/Segment M13 is required.

267  **VOYAGE NOT ON FILE FOR BL**

This message is not currently in use.
268 **BL TYPE INVALID W/C4 CODE**

Rail only. Segment N10 - A C4 code is in the N10 Record, but the bill type in the M11 is not a valid Rail Line Release bill type code.

269 **NO H02/M15 RECORD FOUND**

Record Identifier H01 - When Message code data element contains code 3, 7, 9, H, K, N, O, P or UQ the message is transmitted without H02 record container information. Codes N and O are new for Ocean House Bill Release.

270 **H02/M15 INV REF NUM QUAL**

Record Identifier H01/Segment M15 - When Message code data element contains code 3, 7, H, K, N, O or P the Reference Number Qualifier code value is not valid per the Implementation Guide. Codes N and O are new for Ocean House Bill Release.

271 **H02/M15 INVALID REF NBR**

Record Identifier H01/Segment M15 - When Message code data element contains code 3, 7, H, K, N, O or P the Reference Number Qualifier code is provided but the Reference Identification is missing. Codes N and O are new for Ocean House Bill Release.

272 **H02/M15 BOL NUM NOT ON FILE**

Record Identifier H01/Segment M15 - When Message code data element contains code 3, 7, H, K, N, O or P the Reference Number Qualifier code is ‘BM’ but the bill of lading number in the Reference Number data element is invalid. Codes N and O are new for Ocean House Bill Release.

273 **H02 MISSING IB NUMBER**

This message is not currently being used.

274 **H02/M15 IB NUM NOT ON FILE**

Record Identifier H01/Segment M15 - When Message code data element contains code 3, 7, H, N, O or K the Reference Number Qualifier code is “IB” but the in-bond number in Reference Number data element is invalid. Codes N and O are new for Ocean House Bill Release.

275 **H02 MISSING OCEAN BL**

This message is not currently being used.

276 **H02 CONV NAME REQUIRED**

This message is not currently being used.
277  **H02 IB NOT ON FILE FOR CONT**

Record Identifier H01/Segment M15 - When Message Code data element contains code 3, 7, H, N, O or K the Reference Number Qualifier code is "IB" and in-bond number in Reference Number data element, the in-bond number is not associated with container number. _Codes N and O are new for Ocean House Bill Release._

278  **TOL NOT ON FILE**

Record Identifier H01/Segment M15 - When Message Code data element contains code L for Cancel Transfer of Liability when none is on file.

279  **ONLY 1 CONV ARR ALLOWED**

This message is not currently being used.

280  **B03/M21 RECORD MISSING**

Record Identifier B03/Segment M21 - Record was not transmitted.

281  **NO H01 RECORD FOUND**

Record Identifier H01 – Record was not transmitted.

282  **P01/P4 PORT MUST = IB DEST**

Application ID MI-AI Record Identifier P01/TS309 Segment P4 - If Record Identifier I01/Segment M12 has in-bond entry type code ‘63’, the In-bond Port of Destination element is not the same as the Port of Discharge data element in the Record Identifier P01/P4.

or

Application ID II Record Identifier I01/TS357 Segment M12 - If Record Identifier I01/Segment M12 has in-bond entry type codes ‘63’, the In-bond Port of Destination data element is not the same as the Port of Discharge on the BOL when no previous in-bond is given; or the in-bond port of destination data element is not the same as the in-bond arrival port of the previous in-bond number.

283  **PREV IB ALREADY EXPORTED**

Record Identifier B03/Segment M21 - The in-bond number in the Previous In-bond Number data element cannot be in exported status.

284  **PREV IB INVALD FOR TYPE 63**

Record Identifier B03/Segment M21 - The in-bond number in the Previous In-bond Number data element cannot be Type 63.
285  **BOL NOT WRITTEN TO AMS DB**

This message is not currently being used.

286  **INVALID N00/N1 ENTITY ID CODE**

This message is not currently being used.

287  **S01/U01/N01 RECS NOT ALLWD**

Record Identifier N00 - When N00 is used to report the shipper/consignee/notify parties (non-ISF), the user is not allowed to use the S01/U01/N01 loops to report same.

288  **N00 RECORD NOT ALLOWED**

Record Identifier S01/U01/N01 - When S01/U01/N01 is used to report the shipper/consignee/notify parties, the user is not allowed to use the N00 loop to report same.

289  **PORT NOT VAL FOR CAN CARGO**

This message is not currently being used.

290  **CANADIAN CARGO IND EXPECTED**

This message is not currently being used.

291  **INVALID DEPARTURE DATE**

Record Identifier H01 - When Message Code data element contains code ‘9’ the Vessel Departure from Foreign Port Date in the Date data element is not in a 24-hour clock format.

or

Record Identifier H01/Segment M15 - When Message Code data element contains code ‘9’, the Vessel Departure from Foreign Port Date in the Date data element is in the future.

292  **DEPARTURE TIME IS INVALID**

Record Identifier H01 - When Message Code data element contains code ‘9’ the Vessel Departure from Foreign Port Time data element is not in a 24-hour clock format.

or

Record Identifier H01/Segment M15 - When Message Code data element contains code ‘9’, the Vessel Departure from Foreign Port Time data element is in the future and the Date data element is the current date.

293  **BILL ON FILE FOR FTZ**

Record Identifier A01/Segment M13 - The Bill of Lading was originally created by the QP application for FTZ withdrawal, AMS is not allowed to delete or replace quantity.

or
Rail only. Segment M11 - The Bill of Lading was originally created by the QP application for FTZ withdrawal, AMS is not allowed to amend using 309P.

294 **INBOND ON FILE FOR FTZ**

Record Identifier I01/Segment M12 - The in-bond number was originally created by the QP application for FTZ withdrawal, AMS is not allowed to use it.

295 **INVALID PAYMENT MTHD CODE**

Record Identifier B02/Segment M11 - If provided, Payment Method Code given is not valid per Implementation Guide.

296 **CSI UPD DENIED BOL IN AMS**

This message is not currently being used.

297 **UNABLE TO DELETE INB LEG**

Application ID II Record Identifier I01/TS357 Segment M12 - The request to delete a subsequent in-bond is rejected when the in-bond is listed as previous in-bond to another in-bond on file.

298 **B04/N9 REQ WITH OB QUALIF**

Record Identifier B04/Segment N9 - The House bill of lading is missing the ‘OB’ qualifier in the B04/N9 segment specifying the Master bill of lading.

299 **INVALID B/L IN B04/N9**

Record Identifier B04/Segment N9 - For Reference Identification Qualifier ‘OB’, the bill of lading given in the B04/N9 segment is not in the correct format. Embedded spaces and non-American English characters are not allowed.

300 **INVALID SCAC FOR MVOC B/L**

Record Identifier B04/Segment N9 - The Reference Identification Qualifier is ‘OB’ and the SCAC of the bill of lading given in the Reference Identification is configured as an NVOCC on the Carrier Account.

301 **SNP REQUIRED ON NVOCC B/L**

Record Identifier B02/Segment M11 - The transmission of the House bill requires a Secondary Notify Party to be included in Data element B02.Secondary Notify Party 1, B02.Secondary Notify Party 2, or N00.ID Code if N00.Entity Code=SNP/Data element M1114 or N104 if N101=SNP.

302 **NOT AUTH FOR B/L TYPE**
Application ID MI/AI Record Identifier J01/TS309 Segment M11 - The Bill Issuer code is defined in the Carrier Account as an NVOCC and the BOL Type Code reported is not a House Bill type.

303 **B02 COUNT EXCEEDED**
Record Identifier B02 is used more than once per B01 Record.

304 **FDA BTA IND REQD (Y/N)**
Record Identifier I01/Segment M12 - The FDA Indicator is required for Type '62' in-bonds. When required, FDA indicator in the I01/M12 record must be ‘Y’ for yes or ‘N’ for no.

305 **CONTAINER NUMBER REQUIRED**
Record Identifier H01/Segment M15 - When Message Code data element contains code 3 or 7 a valid container number must be used to report the arrival/export of an in-bond at the container level. The value ‘NC’ cannot be used to arrive/export an in-bond at the container level.

306 **INBOND MUST BE ARRIVED**
Record Identifier T01/Segment M20 - Request to Permit to Transfer at an In-bond Destination requires the In-bond to be arrived.

307 **BILL NOT IN PTT STATUS**
Record Identifier H01/Segment M15 - When Message code data element contains code ‘V’, attempt to delete a Permit to Transfer is invalid when the bill is not currently in Permit to Transfer status.

308 **NO T01 RECORD FOUND**
Record Identifier T01 – Record was not transmitted.

309 **INB INVALID-FRGN CARGO ROB**
Application ID II Record Identifier B03/TS357 Segment M21 - The bill specified has a FROB bill type and is not valid to add an in-bond.

310 **PTT NOT ON FILE FOR CNTR**
Record Identifier H01/Segment M15 - When Message code data element contains code ‘P’, attempt to delete a Permit to Transfer at the container level is invalid when the container is not currently in Permit to Transfer status.

311 **PTT CNTR ALREADY ON FILE**
Record Identifier T01/Segment M20 - Attempt to Permit to Transfer a container has already been performed.
312 HOUSE CAN HAVE ONLY 1 OB

Record Identifier B04/Segment N9 - House bills of lading are limited to the reporting of one Master bill via the B04/N9 segment with the Reference Identifier Qualifier of ‘OB’.

313 INB INVALID ON HOUSE BOL

(This validation will be removed for Ocean House Bill Release.) Record Identifier I01/Segment M12 - In-bond is invalid for a House bill of lading. In-bond movements must be against the Master bill.

314 OB QUAL INV FOR BOL TYPE

Record Identifier B01-B04/Segment M11-N9 – The B04/N9 qualifier of ‘OB’ is not valid if the BOL status indicator/BOL type code indicates as a non-house BOL.

315 INB ALREADY ARRIVED AT DESTINATION

This message is not currently being used.

316 PREVIOUS INBOND MUST BE ARRIVED

This message is not currently being used.

317 CONVEYANCE ALREADY DEPARTED

This message is not currently being used.

318 CONVEYANCE NOT DEPARTED

This message is not currently being used.

319 ALREADY CANCEL CONV DEPART

This message is not currently being used.

320 FDA PN REJECTED

This message is not currently being used.

321 ACE UPD DENIED BOL IN AMS

This message is not currently being used.

322 ACE INBOND IS PROBILL NUMBER

This message is not currently being used.
323 INV CONV FOR EXP REPORTING

Record Identifier I02 – When In-bond Type Code data element is '62' or '63' and the export conveyance Mode of Transport is given in the I02/M12 record, the export conveyance name must be given.

or

Record Identifier H02/Segment M15 – When Message Code data element contains code 5, 6 or 7 and the export conveyance Mode of Transport is given in the H02/M15 record, the export conveyance name must be given.

324 INVALID PEDIMENTO NUMBER

Record Identifier B04/Segment N9 - The Reference Identification Qualifier is 'FEN' and the Pedimento number in the Reference Identification does not have a valid format per the Implementation Guide.

325 MASTER BILL TYPE EXPECTED

Record Identifier B01/Segment M11 - The BOL number was previously submitted as the Master BOL on a House BOL submission. The BOL Type Code for this BOL must be Master.

326 DUPLICATE ABI NOT ALLOWED

This message is not currently being used.

327 C01 COUNT EXCEEDED

Application ID MI/AI Record Identifier C01 - Used more than 999 per Bill of Lading.

328 SCAC MOT NOT EQUAL CONVEY

This message is not currently being used.

329 NO G03/M14 RECORD FOUND

This message is not currently being used.

330 G02 COUNT EXCEEDED

This message is not currently being used.

331 G03 COUNT EXCEEDED

This message is not currently being used.

332 EXTENSION REQ DENIED

This message is not currently being used.
333 **ACT DES CANNOT = DEPARTURE**

Record Identifier H01/Segment M15 - When Message code data element contains code 1, 2, or 3 and In-bond type is ‘61’ or ‘62’ and the CBP Port in the H01 record (positions 25-28)/M1504 cannot equal the departure port code on file for the in-bond.

334 **ACTL DEST MUST = DEPARTURE**

This message is not currently being used.

335 **ORIGINAL BOL NOT ON FILE**

Record Identifier B04/Segment N9 - The Reference Identification Qualifier is ‘OL’ and the original bill of lading in the Reference Identification is not on file in AMS.

336 **EDA ON FILE < 5 DAYS**

Record Identifier H01/Segment M15 - When Message code data element contains code ‘Y’, this message is generated when the existing EDA is currently within 5 days of the date the EDA change is requested.

337 **PTT REJ – OPER NOT ACCEPTD**

Record Identifier T01/Segment M20 - Bill of Lading has an FTZ Admission against it in which the goods have not been accepted by the FTZ Operator.

338 **NEW EDA < 5 DAYS FROM CURR DATE**

Record Identifier H01/Segment M15 - When Message code data element contains code ‘Y’ request to change the Estimated Date of Arrival cannot change the EDA to within 5 days of the current date.

339 **ORIGINAL BILL IS EMPTY CNTR**

Record Identifier B04/Segment N9 - The Reference Identification Qualifier is ‘OL’ and the original bill of lading in the Reference Identification on file cannot be Empty Container Bill Type.

340 **OL BILL REF NOT ALLOWED**

Record Identifier B04/Segment N9 - When the new bill being added by the manifest is of Empty Container Bill Type, cannot have a B04/N9 Reference Identification Qualifier of ‘OL’ Original Bill of Lading.

341 **PEDIMENTO REQUIRED**

Record Identifier I01/Segment M12 - When In-bond Type is ‘63’ and the In-bond Destination is a Port on the U.S. southern border with Mexico, the Mexican Pedimento is required with the B04/N9 Reference Identification Qualifier of ‘FEN’.
342 DTP RECORD REQUIRED
Record Identifier H01/Segment M15 - Request to resend output messages by date/time range requires the range to be specified in the DTP Record. This message is not currently being used.

343 DATE AND TIME QUAL INVALID
Record Identifier DTP - Date and Time Qualifier data element is missing or invalid. This message is not currently being used.

344 DT/TM PERIOD FRMT QUAL INV
Record Identifier DTP - Date Time Period Format Qualifier data element is missing or invalid. This message is not currently being used.

345 DATE TIME PERIOD INVALID
Record Identifier DTP - Date Time Period data element is missing or invalid. This message is not currently being used.

346 NO MSGS IN DT/TM RANGE FOR SITE
Record Identifier H01/Segment M15 - Request to resend output messages from CBP found no messages within the date/time range provided. This message is not currently being used.

347 RESEND BATCH START NOT ON FILE
Record Identifier H01/Segment M15 - Request to resend output messages from CBP references a Start Batch sequence that is missing or not on file for the Site. This message is not currently being used.

348 RESEND BATCH END NOT ON FILE
Record Identifier H02/Segment M15 - Request to resend output messages from CBP references an End Batch sequence that is missing or not on file for the Site. This message is not currently being used.

349 RESEND APPL TYPE CODE INVALID
Record Identifier H02/Segment M15 - Request to resend output messages from CBP found by Application Type has a missing or invalid Application Type Code. This message is not currently being used.

350 RESEND BOL INVALID
Record Identifier H02/Segment M15 - Request to resend output messages from CBP found by Bill of Lading has a Bill of Lading that is missing or not found. This message is not currently being used.
351  **CNTR NOT ON FILE FOR SEAL RPLCMT**

Record Identifier H02/Segment M15 - When Message code data element contains code ?, request to Replace the Container Seal must have a valid Container Number in the H01/M15 In-bond Entity field and its Bill of Lading in the H02/M15 Reference Number. This message is not currently being used.

352  **M7A RECORD MISSING**

Record Identifier H01/Segment M15 - When Message code data element contains code 11 or 12, M7A record is required. This message is not currently being used.

353  **ORIGINAL SEAL NUMBER INVALID**

Record Identifier M7A - Original Seal Number data element is missing or not on file. This message is not currently being used.

354  **REPLACEMENT SEAL NUMBER MISSING**

Record Identifier M7A - Replacement Seal Number data element is missing. This message is not currently being used.

355  **M7A DATE INVALID**

Record Identifier M7A - Date data element is missing.

or

Record Identifier M7A - Date data element contains invalid month, day, and year. This message is not currently being used.

356  **SEAL LOCATION INVALID**

Record Identifier M7A - Seal Location is invalid or it is missing. This message is not currently being used.

357  **INVALID M7B ENTITY ID CODE**

Record Identifier M7B - Entity ID Code is invalid or it is missing. This message is not currently being used.

358  **INVALID M7B NAME**

Record Identifier M7B - Name is missing. This message is not currently being used.

359  **M7B RECORD MISSING**

Record Identifier H01/Segment M15 - When Message code data element contains code 11, M7B record is required. This message is not currently being used.
360  INVALID M7C DESCRIPTION

Record Identifier M7C - Description is missing. This message is not currently being used.

361  M7C RECORD MISSING

Record Identifier H01/Segment M15 - When Message code data element contains code 11, C record is required. This message is not currently being used.

362  VESSEL NAME INVALID

Record Identifier V11 - Vessel Name is missing. This message is not currently being used.

363  V11 RECORD MISSING

Record Identifier H01/Segment M15 - When Message code data element contains code 13, V11 record is required. This message is not currently being used.

364  B04/N9 UNLOC REQUIRED

Record Identifier B01/Segment M11 - When B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing within the manifest and a B04/N9 segment is not submitted with the UN Location Code (ULC).

365  B04/N9 CENSUS SCHD K REQD

Record Identifier B01/Segment M11 - When B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing within the manifest and a B04/N9 segment is not submitted with the Census Schedule K (CSK) Code.

366  N00/N1 BOOKING PRTY REQD

Record Identifier B01/M11 – Missing the Booking Party (BKP) in the N00/N1 when B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing type code within the manifest.

367  N00/N1 SHIP TO PRTY REQD

Record Identifier B01/M11 and N00/N1 – Missing the Ship To Party (ST) in the N00/N1 when B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing type code within the manifest.

368  D00/N10 HTS REQUIRED

Record Identifier B01/M11 - When B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing within the manifest and the HTS number is missing in the D00/N10.
369 **B04/N9 INVALID UNLOC**

Record Identifier B01/M11 and B04/N9 - When B01 Bill of Lading Status Indicator/M11 Bill of Lading Type Code indicates a unified Importer Security Filing within the manifest and the UN Location Code (ULC) is invalid in the B04/N9.

370 **INVALID CHARACTER**

ANSI X12 segment or CAMIR record contains invalid characters. Valid characters are defined as: !"#$%&'()+,-./0123456789:;<=?@ABCDEFGHIJKLMNOPQRSTUVWXYZ\]^_`{|}~

371 **INVALID VSL CODE QUAL**

Segment M10 - Contains an invalid Vessel Code Qualifier per the Implementation Guide.

*or*

TS324 Segment V1 - Contains an invalid Vessel Code Qualifier.

372 **N04/PER INVALID ZIP CODE**

This message is not currently being used.

373 **H1 INVALID PACKING GRP CODE**

This message is not currently being used.

374 **SEGMENT COUNT EXCEEDED**

This message is not currently being used.

375 **NOT AUTH TO USE CUST BOND**

Record Identifier I01/Segment M12 - Carrier Code in the M01/M10 attempting to use Bonded Carrier ID Number in I01/M12, not on the Custodial Bond profile.

*or*

Record Identifier I01/Segment M12 - Carrier Code in the M01/M10 attempting to use Bonded Carrier ID Number in I01/M12, not authorized for Origin port on the Custodial Bond profile.

*or*

Record Identifier I01/Segment M12 - Carrier Code in the M01/M10 attempting to use Bonded Carrier ID Number in I01/M12, not authorized for Destination port on the Custodial Bond profile.

*or*

Record Identifier I01/Segment M12 - Carrier Code in the M01/M10 attempting to use Bonded Carrier ID Number in I01/M12, not authorized because of termination date on the Custodial Bond profile.

*or*

Record Identifier H01/Segment M15 – When the Message Code data element is Z, the Carrier Code in the M01/M10 attempting to use the Bonded Carrier ID Number in H01/M15 for Diversion request, not on the Custodial Bond profile.

*or*

Record Identifier H01/Segment M15 – When the Message Code data element is Z, the
Carrier Code in the M01/M10 attempting to use the Bonded Carrier ID Number in H01/M15 for Diversion request, not authorized for Origin port on the Custodial Bond profile.

**or**

Record Identifier H01/Segment M15 – When the Message Code data element is Z, the Carrier Code in the M01/M10 attempting to use the Bonded Carrier ID Number in H01/M15 for Diversion request, not authorized for Destination port on the Custodial Bond profile.

**or**

Record Identifier H01/Segment M15 – When the Message Code data element is Z, the Carrier Code in the M01/M10 attempting to use the Bonded Carrier ID Number in H01/M15 for Diversion request, not authorized because of termination date on the Custodial Bond profile.

376 CUST BOND CHNG NOT ALWD

Record Identifier H01/Segment M15 – When the Message Code data element is Z, the Bonded Carrier ID Number in H01/M15 for Diversion request does not match the Bonded Carrier ID Number on file.

377 FAST DRIVER INV FOR INTRANSIT

Record Identifier 309/358 DMG, N3, REF
PAXLST NAD, ATT, DTM, EMP, NAT DOC
Invalid FAST DRIVER for In-transits. Mandatory information not filed for crew.

378 INV INTRANSIT MAN FILER

Record Identifier 309.set. M1001

Record Identifier 309 set N103/04
CUSCAR NAD0540 C082 3039
FAST number specified is registered in FAST system to different carrier

**487 MISSING REQ SHIP PARTY DATA**

Record Identifier 309 set N101/02
CUSCAR NAD0540 C082 3035
NAD0540 C080 3036
Missing entity Identifier code

**488 NO EMPTY SHIPMENTS IN PREF**

Record Identifier 309 set m1009
A shipment designated as ‘preferred’ cannot be empty

**489 INV LINK of MAN TYPE TRIP**

Record Identifier 358 set M1009/
Carrier attached a preferred bill to a standard manifest
490 INV TRAVEL DOC NUMBER
Record Identifier 309358 set REF02
PAXLST DOC0280 C002 1001
Proximity card/travel document/FAST ID not in account or duplicate

491 SHIP DATA MIXED WITHEL TYPES
Record Identifier 309 set M1109, M1201
CUSCAR CST0730 C246 7361
2 different types of releases in the same shipment: BRASS, In-bond

492 SHIPMENT ON ANOTHER MANIFEST
Record Identifier 358 set MBL01, 02
CUSCAR RFF0380 C506 1153 CNT0390 C270 6069
Shipment is part of another manifest and linking is not allowed

493 MOT IS REQUIRED
Record Identifier 309 set N104/
CUSCAR NAD0540 C082 3039
Broker filer code specified doesn’t exist or is invalid

494 INV FORMAT FOR SHIPMENT
Record Identifier 309 set M11/Mm13/
CUSCAR RFF0380 C506 1153
Format is not alpha-numeric without spaces for shipment

495 INV FORMAT FOR MANIFEST
Record Identifier 309/358/353 set M10/VEH/NM1/DMG/REF
CUSCAR BGM/TDT
Format is not alphanumeric without spaces in between

496 DUPLICATE LICENSE PLATE
Record Identifier 309/358/set VEH09/VID14
CUSCAR TDT0170 C222 8453 LOC0327 C517 3225
LOC0180 C517 1131
Duplicate license plate for trip or shipment

497 DUPLICATE EQUIPMENT
Record Identifier 309/358 set VID02/VID03
CUSCAR TDT0170 C222 8453 LOC0327 C517 3225
LOC0180 C517 1131
Duplicate equipment for trip or shipment; equipment number is repeated on same shipment or trip
498  **DUPLICATE TRIP PARTY**  
Record Identifier 309 set N101  
CUSCAR NAD0100 C0801/C058  
Duplicate trip party for trip: 2 parties with same details

499  **MISSING MAND CREW PARTY**  
Record Identifier 309/358 set NM1,DMG,N3,REF  
CUSCAR PAXLST NAD ATT, DTM, EMP, NAT, DOC  
Mandatory crew information is not filed for crew: last name, first name, DOB

500  **INVALID FILING STATUS**  
Record Identifier 309/358 set M1306/  
CUSCAR RFF0510 C506 1154  
CUSREP RFF0100 C506 1154  
Format is not alpha-numeric without spaces for shipment

501  **INV LICENSE PLATE NUMBER**  
Record Identifier 309/358/353 set VEH09/VID14  
CUSCAR  TDT0170 C222 8453 LOC0327 C517 3225  
LOC0180 C517 1131  
Number exceeds 10 positions

502  **INVALID DOT NUMBER**  
Record Identifier 309/358 set VEH25/  
CUSCAR RFF0510 C506 1154  
CUSREP TDT0370 C222 8212  
Number exceeds 8 positions

503  **EXPECTED PORT CANT BE CHANGED**  
Record Identifier 309/358/353 set P401  
CUSCAR  LOC0040 C517 3225  
CUSREP LOC0130 C517 3225  
Number exceeds 10 positions

504  **PREF MANIFEST NOT ALLOWED**  
Record Identifier 309/358 set M1009/M1017  
CUSCAR BGM0020 1225  
Preferred manifest not allowed for carrier

505  **NO ACE ID OR CDL PROVIDED**  
Record Identifier 309/358/353 set VEH09/VID14  
CUSCAR  TDT0170 C222 8453 LOC0327 C517 3225  
LOC0180 C517 1131  
Number exceeds 10 positions
507  **CARRIER NOT CTPAT**
Record Identifier ANSI X12
Carrier registered for trip not CTPAT-approved in account

508  **REQUIRED TRIP INFO MISSING**
Record Identifier 309/358 set M10, P4
CUSCAR  BGM LOC DTM
Required trip information missing for trip

509  **MANIFEST REJECTED**
Record Identifier 309/358 sets M10, P4, VEH, NM1, DMG, REF,
N1, N3, N4, M11, VID, N10
CUSCAR NAD0540 NAD0100, NAD0590
CUSREP TDT, EQD, CNI
Required information for complete manifest missing: trip, crew conveyance, equipment, shipments

510  **REQ SHIP PARTY NOT GIVEN**
Record Identifier 309/ set  N101, N102
CUSCAR NAD0540, NAD0100, NAD0590
CUSREP NAD0290
Required shipment party data not provided for shipment

511  **MAN RETURNED TO PRELIMINARY**
Record Identifier 309/ set M1009
CUSCAR  BGM, DTM
Complete manifest code ‘W’ in M1009 has shipments rejected, need
Bill corrected and retransmitted and a 353 set to confirm manifest is complete

512  **INV EST DATE OF US EXIT**
Record Identifier 309/ set M1213/
CUSCAR DTM0480 C507 2380
Departure for inbond shipment where M1201 is 62, 63, 69, 70 is invalid or blank

513  **MISMATCH OF CODES AT TRIP**
Record Identifier 309/ set M1005,M1009
CUSCAR  BGM0020  C1006, 1004
Complete manifest but M1005 has system not trip number

514  **ERRORS ON MORE THAN 100 SCN**
This error message is returned after there have been errors in over 100 shipments.
It is a warning message intended for the sender to check all his shipments.
ACE stops processing errors after 100 shipments. Normally this occurs when one or more
errors are present in each shipment. The transmitter is encouraged to look at all shipments
for similar errors
515 **MAN ARRIVED CANT BE CANCELLED**

Record Identifier 309/ set M1009
CUSCAR BGM, DTM
Complete manifest code ‘W’ in M1009 has shipments rejected, need
Bill corrected and retransmitted and a 353 set to confirm manifest is complete

517 **TRANS ID NOT IN ACE**

Record Identifier header/trailer records: ISA segment.
CUSCAR UNB S002 0004, 0007/
Transmitter ID in ISA06, either SCAC or mutually defined ID is not configured in ACE

518 **PREP ID NOT IN ACE AS SCAC**

Record Identifier Header/Trailer records: GS02/GS03
CUSCAR UNG 5006 0040, 0007/ UNG S007 0044,0007
Preparer ID not found in ACE as SCAC or filer

519 **TRANS ID HAS NO EDI PROFILE**

Record Identifier Header/Trailer records: GS02/GS03
CUSCAR UNG S006 0040, 0007, UNG S007 0044 0007
A profile has been set up in ACE for the preparer but the transmitter’s account does not reference the preparer

520 **NO TRANS/PREP RELATIONSHIP**

Record Identifier Header/Trailer records: GS02/GS03
CUSCAR UNG S006 0040, 0007, UNG S007 0044 0007
Even though a proper EDI profile has been set up for both transmitter and preparer, transmitter is not authorized to send

521 **TRANS ALSO PREPARER**

Record Identifier Header/Trailer records: ISA06/ISA08,GS02/GS03
CUSCAR UNB S002 0004, 0007/UNB S003 0010 0007
Transmitter is also indicated but transmitter’s EDI profile doesn’t agree

522 **MSG TYP NOT ALLOWED FOR PROD**

Record Identifier Header/Trailer records: ISA06/ISA08
CUSCAR UNB S0002 0004 007/UNB S003 0010 0007
Transmitter EDI profile does not allow this message type format in production yet

523 **US EXPORT DATE OVER 45 DAYS**

Record Identifier 309 set M1127
CUSCAR DTM 0480, C5007 2379

Shipment claiming release as free astray or under Headnote 1 has been out of the Tariff Act has been out of the US for than 45 days
**524 CARR/CUSTOMS CUSTODY EQ N**

Record Identifier 309 set M1128
Code ‘N’ is supplied
CUSCAR GEI0420 C012 765 code ‘136’ is missing
Code 136 is missing

**525 INCORRECT/SCAC**

Record Identifier 353 set M1001, M1005
CUSCAR BGM 0020 C106, 1004
SCAC/trip number in M10 of 353 set/BGM of CUSCAR does not match original M10
of 309 set/ BGM CUSCAR

**526 SEAL NUMBERS IN DELINK**

Record Identifier 358 set M7 is provided after VEH or VID segments
CUSREP RFF0100 C506 1153/ 1154 SEL0513 9308
Seal numbers provided in delink transactions in 358 set/CUSREP

**527 INV ADDRESS IN PROFILE**

Carrier has invalid address in ACE profile

**528 INVALID MOT**

Record Identifier 309/358/353 sets M10 CUSCAR
Carrier attempting to transmit using method of transportation other than ‘J’ in M10
Or ‘03’ in CUSCAR/CUSREP

Record Identifier 353 set M1501, code 7, M1502: container equipment number
CUSREP DOC0160 C002 1001 code 833, RFF0170 C056 code AGP for
container/equipment export
Various inbond destinations provided in CUSCAR LOC0410 C517 3225 for inbonds in
CUSCAR DOC0365 C503
Record Identifier 309 set M13/M1201
CUSREP

**530 NO CN ARR IF MULT DEST IB**

Record Identifier 353 set M1501, code 3, M1502: container equipment number
CUSREP DOC0160 C002 1001 code 833, RFF0170 C056 code AGP for
container/equipment export
Various inbond destinations provided in CUSCAR LOC0410 C517 3225 for inbonds in
CUSCAR DOC0365 C503
Carrier attempts to arrive inbond by container/equipment in one destination port
But inbond-bills associated with the container/equipment are for various destination ports. To arrive by container/equipment all inbond-bills must be for the same Destination port in which the container/equipment is arrived.
531 NO CN EXP IF MULT DEST IB

Record Identifier 353 set M1501, code 7, M1502:container/equipment number
CUSREP DOC0160 C002 1001 code 833, RFF0170 C056 code AGP for container/equipment export
Various inbond destinations provided in CUSCAR LOC0410 C517 3225 for inbonds in CUSCAR DOC0365 C503
Carrier attempts to export inbond by container/equipment in one destination port
But inbond-bills associated with the container/equipment are for various destination ports. To export by container/equipment all inbond-bills must be for the same Destination port in which the container/equipment is arrived.

532 INBOND EXPORT REJ

Record Identifier 353 set M1501, code 5,6,7, M1502:inbond number, BOL Number, container/equipment number
CUSREP DOC0160 C002 1001 code 833, RFF0170 C056 code AAM for BOL number, AGP for company issued equipment ID, or IB for inbond number
Carrier attempts to export inbond by inbond number, bill of lading number, or container/equipment number but (1) the inbond has not been arrived in the destination port
Or (2) the inbond has arrived but a hold exists on a bill associated or (3) the inbond has been exported

533 INBOND CANCEL REJ

Record Identifier 353 set M1501, code F,G,H,I,J,K, M1502:inbond number, BOL Number, Container/equipment number
CUSREP BGM0020 C002 code 1, DOC0160 C002 1001 code 98, 833 RFF0170 C056 1153 code AAM for BOL number, AGP for company issued equipment ID, or IB for inbond number
Carrier attempts to cancel arrival/export inbond by inbond number, bill of lading number, or container/equipment number but (1) the inbond has not been arrived in the destination port Or (2) the inbond has arrived but a hold exists on a bill associated or (3) the inbond has been cancelled

534 MAN OR ACCNT MISS CIT CODE

Record Identifier 309 set DMG06, 07, citizenship code and country are missing
PAXLST MAT0250 3493 C042 3293 citizenship code and country code are missing.
The driver’s ACE account is missing citizenship and country code
One of 2 circumstances has occurred (1) a driver’s citizenship has not been reported in the manifest for a one-time driver. Or (2) the error has been generated because citizenship is not recorded in the driver’s ACE account. This will occur even if citizenship is sent with the manifest but doesn’t exist in the driver’s account. If the driver has an account, it must be updated.

535 MAN OR ACCNT MISS CIT CODE

Record Identifier 309 set REF01/02, document code and document cited are not WHT1 certified.
PAXLST DOC0280 C002 1001 document code and document cited are not WHTI certified
One of 2 circumstances has occurred (1) a valid Western Hemisphere Travel Initiative (WHTI) document has not been reported in the manifest for a one-time driver. Or (2) the error has been generated because WHTI document is not recorded in the driver’s ACE account. This will occur even if a WHTI document is sent with the manifest but doesn’t exist in the driver’s account. If the driver has an account, it must be updated.
