TSN PLENARY SESSION
September 27, 2013

Introduction

Food Safety and Inspection Service (FSIS)

- Public health regulatory agency responsible for ensuring domestic and imported meat, poultry and processed egg products are safe, wholesome, and correctly labeled and packaged
 - Federal Meat Inspection Act (FMIA)
 - Poultry Products Inspection Act (PPIA)
 - Egg Products Inspection Act (EPIA)

- Title 9 of the Code of Federal Regulations Part 300-end

Introduction

FSIS Public Health Information System (PHIS)

- ❑ Designed to collect, consolidate, and analyze data
- ❑ Centralized computer database that generates random import inspection tasks and stores inspection results, based on
 - Exporting country, process category, species, performance
- ❑ Interconnected with US Customs and Border Protection's (CBP) Automated Commercial Environment (ACE)
 - GOAL: to streamline the Customs entry process and transition away from paper –based application process for FSIS import inspection

PGA Message Set

- The PGA Message Set is the harmonized set of data collected from Trade by CBP via a “single window”
 - Data are defined and required by FSIS
- PGA Message Set data can be submitted by Trade on ACE Entry
- Initial import capabilities
 - Pilot will allow Trade to voluntarily transmit electronic data to FSIS/PHIS

FSIS Import Application (FSIS Form 9540-1)

- Importers are required to apply for FSIS import inspection for all entries of meat, poultry, and egg products
- A Customs Entry or Entry Summary certified for cargo release in ACE, combined with the PGA Message Set provides the mandatory data elements currently provided on FSIS form 9540-1

Foreign Inspection Certificates

- ❑ FSIS requires all imported meat, poultry and egg products to be properly certified by the competent authority in the exporting foreign country
 - Certificate accompanies each shipment
- ❑ The data needed to complete the electronic import application in PHIS is a combination of information supplied in part from the 9540-1 and from the foreign inspection certificate
 - For shipments certified electronically by the foreign government*, FSIS PHIS will populate the application based on the eCert data based on the inspection certificate number provided in PG14;
- ❑ Filers making entries from countries that do not certify shipments electronically must provide additional PGA records identifying product attributes

***Note:** FSIS receives eCert data from Australia and New Zealand and will continue to develop the electronic inspection certificate data exchange with other foreign governments as warranted

Current Partial Data Feed

- ❑ Electronic import application in PHIS retrieves partial data from IWS
 - PGA Message Set data will complete the data fields missing from the FSIS import application
- ❑ For example:
 - Currently collect broker organization information
 - Does **not** provide local broker first name*, last name*, phone number, * email address* or fax number
- ❑ *Data fields are required in PHIS import application
 - PHIS utilizes information for electronic notifications to trade

FSIS Data Grouping

Two many-to-one data relationships that the PGA Message Set will be accommodated at the onset:

- Many inspection certificates to one entry
 - The PG 50 starts the grouping and PG 51 ends the grouping
 - Multiple PG 14 (inspection certificates) may relate to the PG 13 (the foreign government that issued the certificate)

- Many lots within one inspection certificate
 - The PG 50 starts the grouping and PG 51 ends the grouping
 - Multiple data lines providing specific lot information is related to the PG 14 (inspection certificate)

Trade Participation

❑ **Volunteers for Pilots**

- Importers and Brokers of imported meat, poultry and processed egg product shipments under FSIS jurisdiction
- FSIS *Federal Register* Notice announcing pilot and soliciting volunteers
