1.1 PGA Message Set Samples for Vehicles and Engines Programs

1.1.1 Vehicles & Engines (V&E) Sample 1

A shipment of Toyota Sedans is imported into the United States. The shipment's Import Code is "A". Trade is required to provide Test Group Name/Engine Family Name and Model Year of the imports. Exhibit **Error! No text of specified style in document.-1** shows the PGA Message Set format for importing Vehicles and Engines.

If the Electronic Image Submitted code is provided, at least one image must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

1.1.4 Vehicles & Engines (V&E) Sample 4

Certified Kubota Engines that have been installed in tractors are imported into the United States. Vehicles and Engines Sample 4 is depicted below, in Exhibit Error! No text of specified style in document.-4.

When creating a PGA Message Set which requires reporting of an engine and the equipment it is installed in, groupings will be used. This grouping of the tractor (Equipment) and the installed engine are considered the product and are reported at the product level under the “PG02P” record. This is completed using a series of PG07 records bookended by the PG50/51 records, which denote grouping. All additional records which pertain to the Product (the combined engine and equipment) will also fall under the PG02P product level. This will include, but is not limited to, the Certification Statement/Form Number, Importer information, Certifying Individual, and equipment characteristics.

As the engine is being certified by EPA, it will additionally be reported as a component of the product and may include Test Group Family Name/Number, exemptions, and any/all applicable records and required data.

Note – Only a single engine (w/Serial Number) must be provide at the Component level, all other similar Engines can be reported via groupings with their equipment at the Product level.

If the Electronic Image Submitted code is provided, at least one image must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

The Certifying Individual signed the Certification Statement on Form 3520-1 on 1/27/2014.

1.2 PGA Message Set Sample for Pesticides Programs

1.2.1 Registered Pesticides Sample

A shipment of the Registered Pesticide Bis-(N-cyclohexyldiazoniumdioxy)-copper (CU-HDO) is imported into the United States for the purpose of creating pressure treated lumber. This product is subject to the Federal Insecticide, Fungicide and Rodenticide Act and must file a 3540-1 Notice of Arrival (NOA) before entry into the USA. Exhibit **Error! No text of specified style in document.-7** shows the PGA Message Set format for importing a Registered Pesticide.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

PG22	<ul style="list-style-type: none"> • Document Identifier [6-12]: 944 = EPA 3540-1, Notice of Arrival for Pesticides and Devices • Entity Role Code [18-20]: CI = Certifying Individual • Declaration Code [21-24]: EP3 = Certification Statement (3540-1) NOA • Declaration Certification [25]: Y = Certified • Date of Signature [26-33]: 02112014 = 02/11/2014 = Certification Date <p>The Certifying Individual signed the NOA certification statement on 02/11/2014.</p>
PG26	<ul style="list-style-type: none"> • Packaging Qualifier [5]: 1 = Largest unit of packaging • Quantity [6-17]: 000000100000 = 1,000 units in shipment • Unit of Measure (packing level) [18-22]: BO = Bottle, No protected, Cylindrical <p>There are 1,000 units (non-protected cylindrical bottles) in the shipment. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 1,000 bottles are represented as 000000100000, with the six leading zeroes as "fill". The quantity of 1,000 has two implied decimal places, so it is actually 1,000.00, represented by the 100000 value in the field.</p>
PG26	<ul style="list-style-type: none"> • Packaging Qualifier [5]: 2 = Second largest unit of packaging • Quantity [6-17]: 000000002840 = 28.40 measurement of smallest units in shipment. • Unit of Measure (packing level) [18-22]: OZ = Unit of Measure of individual units is ounces <p>The bottles in this shipment are 28.4 ounces each. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 28.4 oz. is represented as 000000002840, with the eight leading zeroes as "fill". The quantity of 2840 oz. has two implied decimal places, so it is actually 28.40 oz.</p>
PG29	<ul style="list-style-type: none"> • Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line - net) [8-19]: 000000080656 = Net weight is 806.56 kg <p>The individual unit net weight of the product is 10 ounces and the total net weight is 806.56 kg.</p>

Registered Pesticides Message Set Sample

For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 806.56 kg is represented as 000000080656, with the seven leading zeroes as "fill". The quantity of 806.56 kg has two implied decimal places, so it is represented by the 80656 value in the field.

1.2.2 Supplemental Distribution of Registered Pesticides Sample

A shipment of Off Mosquito Repellent is imported into the United States. This product is being imported into the United States as a Supplemental Distribution of a Registered Pesticide. The Product Registration Number also includes the Distribution Company Number assigned by EPA. Exhibit **Error! No text of specified style in document.-8** shows the PGA Message Set format for importing a Registered Pesticide as a Supplemental Distribution.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

As in this example, 2.1% is represented as 0021000, with the two leading zeroes as "fill".</p>

1.2.3 Registered Pesticide (Other) – 24c Sample

A shipment of L-Glutathione is imported into the United States by a State Exemption (24c). An Intended Use Code is provided to clarify the intended use of the product. Exhibit **Error! No text of specified style in document.-9** shows the PGA Message Set format for importing a Registered Pesticide as a 24c State Exemption.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

PG22	<ul style="list-style-type: none"> • Document Identifier [6-12]: 944 = EPA 3540-1, Notice of Arrival for Pesticides and Devices • Entity Role Code [18-20]: CI = Certifying Individual • Declaration Code [21-24]: EP3 = Certification Statement (3540-1) NOA • Declaration Certification [25]: Y = Certified • Date of Signature [26-33]: 01272011 = 1/27/2011 = Certification Date <p>The Certifying Individual signed the NOA certification statement on 1/27/2011. Note that the PG22 record, which describes the certification data related to the Certifying Individual, should follow immediately after the data that identifies the individual.</p>
PG26	<ul style="list-style-type: none"> • Packaging Qualifier [5]: 1 = Largest unit of packaging • Quantity [6-17]: 00000000200 = 2 units in shipment. • Unit of Measure (packing level) [18-22]: BO = Bottle <p>There are two units (Bottles) in the shipment. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 2 bottles are represented as 00000000200, with the nine leading zeroes as "fill". The quantity of 2 has two implied decimal places, so it is actually 2.00, represented by the 200 value in the field.</p>
PG26	<ul style="list-style-type: none"> • Packaging Qualifier [5]: 2 = Second largest unit of packaging • Quantity [6-17]: 0000010000= 100 ounces per unit. • Unit of Measure (packing level) [18-22]: OZ = Ounces <p>For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 100 oz. is represented as 000000010000, with the seven leading zeroes as "fill". The quantity of 100oz has two implied decimal places, so it is actually 100.00 oz., represented by the 10000 value in the field.</p>
PG29	<ul style="list-style-type: none"> • Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line) [8-19]: 000000005000 = 50 (kg) <p>The net weight is 50 kg. For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 50 kg is represented as 000000005000, with the eight leading zeroes as "fill". The quantity of 50 kg has two implied decimal places, so it is actually 50.00 kg, represented by the 5000 value in the field.</p>

1.2.4 Registered Pesticide (Other) – Experimental Use Permit

A shipment of Amitrole is imported into the United States by a pesticide producer. The pesticide producer is intending to research new uses for the Amitrole pesticide, and has already applied for and received an Experimental Use Permit. Exhibit **Error! No text of specified style in document.-10** shows the PGA Message Set format for importing a Registered Pesticide with an Experimental Use Permit.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Commodity Net Quantity. As in this example,</p>

Pesticides Device Message Set Sample

112.5 kg is represented as 000000011250, with the nine leading zeroes as "fill". The quantity of 112.5 kg has two implied decimal places, so it is actually 112.50 kg, represented by the 11250 value in the field.

1.2.6 Pesticide – Other Sample 1 (Research and Development)

A shipment of L-Glutathione is imported into the United States for research and development purposes without an Experimental Use Permit. Exhibit **Error! No text of specified style in document.-12** shows the PGA Message Set format for importing a Pesticide for research and development.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

As in this example, .75 kg is represented as 000000000075, with the ten leading zeroes as "fill". The quantity of 75 has two implied decimal places, so it is actually .75 kg, represented by the 75 value in the field.</p>
PG29	<ul style="list-style-type: none"> • Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms • Commodity Net Quantity (PGA line) [8-19]: 000000000150 = 1.5 (kg) <p>The net weight is 1.5 kg.</p> <p>For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled.</p> <p>There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 1.5 kg is represented as 000000000150, with the nine leading zeroes as "fill". The quantity of 150 has two implied decimal places, so it is actually 1.50 kg, represented by the 150 value in the field.</p>

1.2.7 Pesticide – Other Sample 2 (Emergency Exemption)

EPA has not yet approved Amitrole for use, but there is a dire need to save the Ashe trees in the mid-Atlantic region of the United States. The importer received an Emergency Exemption from EPA due to the extenuating circumstances. Exhibit Error! No text of specified style in document.-13 shows the PGA Message Set format for importing a Pesticide under an Emergency Exemption.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

The quantity of 2 has two implied decimal places, so it is actually 2.00, represented by the 200 value in the field.</p>
PG26	<ul style="list-style-type: none"> Packaging Qualifier [5]: 2 = Second largest unit of packaging Quantity [6-17]: 0000100000 = 1000 ounces per unit. Unit of Measure (packing level) [18-22]: OZ = Ounces <p>For Quantity there are 12 spaces, and if a space is not used, it must be zero filled.</p> <p>There are two implied decimal points when writing the Quantity. As in this example, .1000 oz. is represented as 00000100000, with the six leading zeroes as "fill". The quantity of 1000oz has two implied decimal places, so it is actually 1000.00 oz., represented by the 100000 value in the field.</p>
PG29	<ul style="list-style-type: none"> Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms Commodity Net Quantity (PGA line) [8-19]: 000000005000 = 50 (kg)

Pesticides - Other Message Set Sample (Re-export)

The net weight is 50 kg.

For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled.

There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 50 kg is represented as 000000005000, with the eight leading zeroes as "fill". The quantity of 50 kg has two implied decimal places, so it is actually 50.00 kg, represented by the 5000 value in the field.

1.2.9 Pesticide – Other Sample 4 (Disposal)

A shipment of ammonia trichloroethylene is imported into the United States for Disposal. An Intended Use Code is provided to identify disposal method. Exhibit Error! No text of specified style in document.-15 shows the PGA Message Set format for importing a Pesticide for disposal.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

Unit of Measure (packing level) [18-22]: BO = Bottle <p>There are two units (bottles) in the shipment. For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, 2 bottles are represented as 000000000200, with the nine leading zeroes as "fill". The quantity of 2 has two implied decimal places, so it is actually 2.00, represented by the 200 value in the field.</p>
PG26	<ul style="list-style-type: none"> Packaging Qualifier [5]: 2 = Second largest unit of packaging Quantity [6-17]: 0000010000 = 100 ounces per unit. Unit of Measure (packing level) [18-22]: OZ = Ounces <p>For Quantity there are 12 spaces, and if a space is not used, it must be zero filled. There are two implied decimal points when writing the Quantity. As in this example, .100 oz. is represented as 000000010000, with the seven leading zeroes as "fill". The quantity of 100oz has two implied decimal places, so it is actually 100.00 oz., represented by the 10000 value in the field.</p>
PG29	<ul style="list-style-type: none"> Unit of Measure (PGA Line – net) [5-7]: KG = Unit of Measure is kilograms

Pesticides - Other Message Set Sample (Transfer)

- Commodity Net Quantity (PGA line) [8-19]: 000000005000 = 50 (kg)

The net weight is 50 kg.

For Commodity Net Quantity there are 12 spaces, and if a space is not used, it must be zero filled.

There are two implied decimal points when writing the Commodity Net Quantity. As in this example, 50 kg is represented as 000000005000, with the eight leading zeroes as "fill". The quantity of 50 kg has two implied decimal places, so it is actually 50.00 kg, represented by the 5000 value in the field.

1.2.11 Pesticide – Other Sample 6 (Transfer with different producer)

A shipment of ammonia trichloroethylene is imported into the United States for transferal between registered establishments not operated by the same producer. Both the domestic Producer Establishment Number and Foreign Producer Establishment Number have been provided, as well as the EPA Registration Number of the product being formulated. Exhibit Error! No text of specified style in document.-17 shows the PGA Message Set format for importing a Pesticide for transfer between registered establishments not operated by the same producer.

At least one image, a pesticides label, must be submitted to DIS along with the Entry.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

1.3 PGA Message Set Samples for TSCA and ODS

1.3.1 Toxic Substance Control Act (TSCA) Sample 1

A shipment of Octanoyl Chloride is imported into the United States. Octanoyl Chloride is regulated by TSCA and is listed in the TSCA Chemical Inventory, so the filer must sign a positive TSCA certification. TSCA Sample 1 is depicted below in Exhibit Error! No text of specified style in document.-18.

Note – Red numbers within brackets specify the spaces within the PG record where this data element is reported.

Exhibit Error! No text of specified style in document.-18: TSCA Sample 1 – TSCA Positive Certification
