

Summary of ACE/ITDS Pilot Standard Operating Procedures (SOP): Agricultural Marketing Service (AMS)

Objective: AMS is developing a message set and processes to support the electronic submission of data for AMS’s needs. In order to test the developed message set and processes, CBP and AMS will engage, together with the trade community, in a pilot to test the new system as it is used by both CBP and TTB operations in real time with actual ACE filings in the production environment. AMS has a total of ten messages in its CATAIR document but will only be testing one of the ten during the initial phase of the pilot program. AMS will only have the internal capability to process data for one message, which is replacing the AMS Form FV-357. Eventually, additional messages will be folded into the piloting process as those messages are delivered and tested by AMS.
