

CBP and Trade Automated Interface Requirements

Document Image System (DIS) Implementation Guide

October 2015

U.S. Customs and
Border Protection

Be Advised:

A filer who transmits data or information through any electronic means to CBP certifies, by the act of transmitting such data or information, that the data or information transmitted is true and correct to the best of the filer’s knowledge and belief. The filer also declares that all statements in an electronically transmitted entry, entry summary, invoice, claim, other filing, and all other information or data filed with the entry are true and correct to the best of the filer’s knowledge and belief, and that the filer will produce at once any data or information showing that the statements are not true and correct.

Table of Changes

Revision Number	Date of Change	Brief Description of Change
13	October 7, 2015	<ul style="list-style-type: none"> • Corrected Document Label Value for ECO15 • Corrected Document Label Value for CBP87 • Corrected Document Label Value for TTB05 • Added directions for identifying multiple agencies when sending documents via email
12	July 27, 2015	Applied new technical documentation template. No content changes.
11	July 6, 2015	Revised document to follow ACE CATAIR format.
10	April 1, 2014	<p>Changed the DIS destination IP to 173.255.63.75 for sFTP and Web Services. Removed T&E (7512) Number data element from the 'APHIS Transit Permit' document.</p> <p>Added four new forms:</p> <ul style="list-style-type: none"> - CDC Importation Permission Letter - CDC Form 0728 - CDC Import Permit Exemption Letter - TTB Champagne Certificate of Origin.
9	Feb. 22, 2014	Updated this document to reflect the new Message Schema.
8	Feb 23, 2012	Updated the following sections to include the FSIS documents. Added a note indicating that only documents explicitly listed in the Federal Register should be submitted via DIS.
7	Dec. 17, 2011	Updated various sections to include all system-supported documents. Clarified definitions of Document Sender and Document Owner.
6	Sept. 19, 2011	Updated documentation to include APTL documents.
5	Feb. 21, 2011	Highlighted documents supported in current version of DIS
4	Dec. 23, 2010	Updated narrative text
6	Nov. 8, 2010	Updated Schema
2	Oct. 7, 2010	Updated Schema
1	Oct. 1, 2010	Initial Version/Release

Getting Started

This document is not intended to teach XML programming. If unfamiliar with XML programming, please consult an advisor. CBP does not provide specific programming advice.

XML Examples

Full XML transaction examples are available on the last page of this document. Look them over for an initial visual understanding of the XML format. Read this Implementation Guide while using the examples as a visual resource.

XSD Files – XML Schema Definition

XML Schema Definition (.xsd) files are available on the last page of this document. These files should be opened with a valid XML Editor. They should not be viewed with a simple text editor.

XSD files provide data element syntax, definitions, and declaration. The XML programmer can avoid initial errors by importing these data elements rather than typing them by hand.

Data elements in CommonData.xsd appear in all DIS transactions – input and output. Data elements in the other .xsd files are specific to one transaction type.

Transmitters can validate the XML transaction against the schema to check for errors prior to sending the transaction to CBP.

Record Layout Key

The following key describes the columns of the record layout definitions that follow.

Data Element: Contains the name of the reported data field.

Length: Indicates the minimum and maximum, allowed length of the reported data element.

Type: Defines the data type accepted for the data element. The Type definition represents the accepted data types to be used in **all** filing scenarios. Valid data types are as follows:

S = Space ONLY.

A = Alphabetic Data. Consists of characters A through Z (uppercase ONLY). **N** = Numeric Data Only. Consists of numerals 0 through 9.

(S)N = Numeric Data Variation. May contain ‘**Numeric Data Only**’ or may consist of one or more spaces followed by numerals 0 through 9. Must consist of at least one right justified numeral. This variation of numeric class may be used for amounts, rates, and counts (where specified).

AN = Alphanumeric Data. Consists of characters A through Z (uppercase ONLY), numerals 0 through 9, and space.

D = Known Date. Consists of numerals 0 through 9 (format MMDDYY).

X = Special Data. Consists of characters A through Z (uppercase ONLY), numerals 0 through 9, space, and any other character found on a standard keyboard. The following characters are accepted:

! @ # \$ % ^ & * () - _ = + [{] } \ | ; : ‘ “ , < . > / ? ` ~ €

Generally, the numeric data class is reserved for a data element used as an integer. It may also include a data element used as a sequencer (e.g., a line number).

Generally, any identifier or code is classed as alphanumeric. Note that this would include an identifier or code that may be required to be reported as all numerals.

Designation: Indicates the reporting requirement as follows:

M = Mandatory. A value conforming to the listed class is required in all filing scenarios. **C** = Conditional. A value conforming to the listed class may or may not be required for a particular filing scenario. The usage notes will describe the specific cases in which the data element is required or not allowed to be reported.

O = Optional. A value conforming to the listed class will be conditionally accepted if provided.

An optional data element may be subject to validation, however.

Description: Defines the data element and provides a further description of how it is to be reported. May include a list of acceptable values, an exception or further specification of the data class, and/or various rules regarding format, justification, and truncation.

Introduction

DIS allows participating Trade Partners to submit document Images and associated descriptive data to CBP electronically. Messages are transmitted in XML format using secure web services, FTP or MQ. The documents are securely stored and made available for review by CBP and

Participating Government Agencies (PGAs). Documents submitted via DIS are in lieu of paper documents.

The initial phase provides basic document image submission and management capabilities. Specifically:

- Allow Trade Partners to submit document images and associated descriptive meta data to CBP and PGAs in an automated manner using EDI communication
- Store all submitted documents in a secure centralized CBP data store and maintain associations with related data such as Entry and Bill numbers
- Allow authorized users to retrieve, view, and annotate documents via a web based user interface
- Provide basic security, authorization and auditing
- Offer back-end services that facilitate search and reporting capabilities to trade partners to verify the receipt of documents
- Provide capabilities for CBP Client Representatives to view raw received messages

Subsequent phases will provide new interfaces that allow integration of DIS image management capabilities with other systems in CBP and PGAs. These incremental phases will introduce service integration with other CBP systems and usage of DIS application capabilities by additional CBP and PGA user groups to meet business process requirements during the cargo review and release process.

Note: *Only documents that are explicitly listed at <http://www.cbp.gov/trade/ace/features> for transmission by trade should be submitted to CBP via DIS.*

Interface Description

The DIS interface provides Trade Partners with an interface to submit required documents to CBP electronically. Trade Partners will receive a system response to each submission. The Trade Partner may receive an unsolicited review status response when action is taken on the document by a CBP employee.

Documents submitted via DIS are electronic copies (i.e. images) embedded in an XML message. Multiple document and image formats are supported. The images are embedded in the XML message along with distinct metadata fields that describe the document. All data elements are described in detail in the XML field definitions included in this implementation guide.

Input

The XML message input (payload) containing document images and all associated metadata is the same for all three communication protocols below with one exception. Web Services transactions require a SOAP Envelope. CBP supports three different communication protocols for DIS XML Input:

- Existing EDI MQ Interface
- Secure FTP
- Secure Web Services (Requires SOAP Envelope)

Output

All DIS responses are sent back to Trade in XML format **via existing EDI MQ**. It doesn't matter how the DIS transaction was submitted to CBP.

Communications Options

The XML message can be submitted to the DIS Gateway via three supported three interfaces:

- a. Existing EDI MQ Interface
- b. Secure FTP (sFTP)
- c. Secure Web Services

A. Existing MQ

- Fastest way to get set up because the MQ connection already exists and new Interconnection Security Agreement (ISA) **not** required.
- XML input submitted via MQ and output returned via MQ.
- Common Input queue for inbound messages: [ATS.DIS.MSG.INBOUND](#)
- Specific Output queue for outbound messages: [ATS.DIS.PPPFFF.Outbound](#) (PPPP = Four-digit Port Code. FFF = Three-character Filer Code)
- Max message size: 100 MB

B. Secure FTP (sFTP)

- Setup can require several weeks.

- New Interconnection Security Agreement (ISA) **is** required.
- XML input submitted via sFTP. Output returned via MQ.
- New connection. Requires OneNet Work Request.
- Universal UserID and Password used by all trade partners.
- Max message size: 100 MB.

C. Secure Web Services

- Setup can require several weeks.
- New Interconnection Security Agreement (ISA) **is** required.
- XML input submitted via Web Services. Output returned via MQ.
- XML message structure requires a SOAP envelope. See IG for example.
- New connection. Requires OneNet Work Request.
- Universal UserID and Password used by all trade partners.
- Max message size: 100 MB.

NOTE:

All asynchronous responses are sent in XML format via EDI MQ regardless of how the messages were submitted.

Web Services will send an additional synchronous response immediately upon document submission.

Inbound Settings

A. MQ Settings

DIS Inbound Queue Name: [ATS.DIS.MSG.INBOUND](#)

NOTE: These are the same settings as with any other application running thru MQ

Interface	IP	Port	Queue Manager
CERT	167.144.89.231	1531	QGC1
PROD	167.144.89.228	1530	QGP2

B. sFTP Settings

Interface	DIS Destination IP	Port	URL / Server Name
CERT	216.81.87.70	2923	fnwg-dp-internet05.cbp.dhs.gov
PROD	216.81.87.65	2023	dp-int-exvip1.cbp.dhs.gov

C. Web Services Settings

NOTE: For Web Services, URL / Server Name is required.

Interface	DIS Destination IP	Port	URL / Server Name
CERT	216.81.87.70	2933	fnwg-dp-internet05.cbp.dhs.gov
PROD	216.81.87.65	2033	dp-int-exvip1.cbp.dhs.gov

Web Services – Additional Information

Additional Guidelines

- DIS Web Services implements SSL, Client IP authentication, login credentials and Security Tokens as layers of security checks.
- DIS Web Services implements the SOAP protocol.
- The DIS XML Message input should be embedded in the SOAP body of the SOAP envelope.
- Certain SOAP headers may be defined to facilitate routing and security.
- The DIS XML Message input within the SOAP envelope should not have the XML instruction `<?xml version="1.0" encoding="utf-8" ?>` since the SOAP envelope is itself an XML construct.
- The xml command line should be the first line of the SOAP message.

Web Services Security Implementation

- HTTPS protocol is used.
- Login and Password authentication: A User ID and Password is provided by CBP.
- Login credentials are used to obtain a valid Security Token with the `getSecurityToken()` function.
- Valid Security Token is used to make subsequent calls to other operations in the Web Service.
- Security Token expires after a certain amount of time and must be re-obtained dynamically from the Web Service.

DIS High Level Process Flow

DIS XML Message Construction

DIS XML message construction consists of four main components:

- MessageEnvelope
- MessageHeader
- MessageBody
- Submission Package (Input); or Response (Output)

Only one submission package may be used in a DIS transaction. Multiple documents may be referenced from within the submission package. Examples of full DIS XML transactions (Input and Output) can be found in the last section of this document entitled **XML Data Files and Message Examples**.

Only one submission package and one response are available for DIS transactions at this time:

- **DocumentSubmissionPackage (Input)**
- **MessageValidationResponse (Output)**

Basic Level Message Construction Example

The example below demonstrates the four main parts of a DIS Submission

```
<DIS:MessageEnvelope xsi:schemaLocation="http://cbp.dhs.gov/DIS ... >  
  <DIS:MessageHeader>  
    ... MessageHeader data elements go here  
  </DIS:MessageHeader>  
  <DIS:MessageBody>  
    <DIS:DocumentSubmissionPackage>  
      ... DocumentSubmissionPackage data elements go here  
    </DIS:DocumentSubmissionPackage >  
  </DIS:MessageBody>  
</DIS:MessageEnvelope>
```

For full XML examples, see last section of this document.

For a full list of documents supported by DIS, see DIS Appendix A.

MessageEnvelope

The MessageEnvelope element is the outermost element. All other XML elements are contained within the Message Envelope as child elements. MessageEnvelope applies to all transaction types.

Designation: Mandatory

Max Occurrences: One

Parent Element: None

Example MessageEnvelope - Input:

```
<DIS:MessageEnvelope xsi:schemaLocation="http://cbp.dhs.gov/DIS
../MessageEnvelope.xsd"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns:DIS="http://cbp.dhs.gov/DIS" xmlns="http://cbp.dhs.gov/DIS">

    ... all other XML Code

</DIS:MessageEnvelope>
```

Example MessageEnvelope - Output:

The MessageEnvelope will always be returned like this regardless of how it is submitted on the input.

```
<MessageEnvelope
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns:DIS="http://cbp.dhs.gov/DIS"
xmlns="http://cbp.dhs.gov/DIS">

    ... all other XML Code

</DIS:MessageEnvelope>
```

MessageHeader

Applies to all transaction types. CBP will create its own MessageHeader on output transaction types.

MessageHeader from the input transaction will be returned to the transmitter in the ProcessedMessageHeader block. See section entitled MessageValidationResponse

Designation: Mandatory

Max Occurrences: One

Parent Element: MessageEnvelope

The MessageHeader element contains the following child elements:

<i>MessageHeader</i> Data Elements	Length / Type	Desig	Description	Note
MessageID	1-16AN	M	Unique ID generated by transmitter	
MessageType	1-50A	M	Selection from established list of message types. See Note 1	1
SentDateTime	1-30AN	M	Time message is sent by the transmitter in Eastern Time Zone. Must be in UTC Format. See Note 2	2
TransmitterID	3-3AN	M	Three character Filer Code corresponding to the ABI "A" Record Filer Code	
TransmitterSiteCde	4-4N	M	Four digit Port Code corresponding to the ABI "A" Record Port Code	
PreparerID	3-3AN	M	Three character Filer Code corresponding to the ABI "B" Record Filer Code	
PreparerSiteCode	4-4N	M	Four digit Port Code corresponding to the ABI "B" Record Port Code	

Comment	1-100AN	C	Optional for input transactions. CBP will return "CBP" in this field on all output transactions.
---------	---------	---	--

Note 1

For Message Type Options, refer to XSD.

Note 2

UTC Date/Time Formats:

Here are two valid formats for UTC Date/Time;

- 2015-01-28T16:07:57-05:00
- 2015-01-28T16:07:57Z

In the first example, the -05:00 indicates that the time reported in US Eastern time is offset by five hours from UTC time (GMT). The second example provides a way to avoid the offset. There are other valid UTC time formats. More information on UTC date and time can be found by performing an internet search.

MessageHeader Example:

```

<DIS:MessageHeader>
  <DIS:MessageID>1005997</DIS:MessageID>
  <DIS:MessageType>DocumentSubmission</DIS:MessageType>
  <DIS:SentDateTime>2010-07-28T09:30:47-05:00</DIS:SentDateTime>
  <DIS:TransmitterID>ABC</DIS:TransmitterID>
  <DIS:TransmitterSiteCode>3001</DIS:TransmitterSiteCode>
  <DIS:PreparerID>ABC</DIS:PreparerID>
  <DIS:PreparerSiteCode>3001</DIS:PreparerSiteCode>
</DIS:MessageHeader>

```

MessageBody

Designation: Mandatory

Max Occurances: One

Parent Element: MessageEnvelope

The MessageBody element is a child of the MessageEnvelope element. It contains one of the two child elements listed below.

Only one submission package may be used in a DIS transaction. Multiple documents may be referenced from within the submission package. Examples of full DIS XML transactions (Input and Output) can be found in the last section of this DIS IG.

The following input and output child elements are available for DIS transactions:

- DocumentSubmissionPackage (Input)
- MessageValidationResponse (Output)

MessageBody Example:

Input

```
<DIS:MessageBody>  
  <DIS:DocumentSubmissionPackage>  
    ... more XML Code  
  </DIS:DocumentSubmissionPackage>  
</DIS:MessageBody>
```

Output

```
<DIS:MessageBody>  
  <DIS:MessageValidationResponse>  
    ... more XML Code
```

```

</DIS:MessageValidationResponse>
</DIS:MessageBody>

```

DocumentSubmissionPackage – (Input Only)

Designation: Mandatory
Max Occurances: One
Parent Element: MessageBody

The DocumentSubmissionPackage is a child of the MessageBody element. It contains several child and subchild elements providing all of the document specific data. Unless otherwise noted in the description, it is assumed that the maximum occurrence of a data element or data block is one.

<i>DocumentSubmission Package</i> Data Elements	Length +Type	Desig	Description	Note
SubmittedToPortCode	4N	O	Parent: <i>DocumentSubmissionPackage</i> Four digit port code where the document is being submitted. If the document is related to an entry, this would likely be the Port of Entry	

ActionCode	1-20A	M	Parent: <i>DocumentSubmissionPackage</i> Values are: <ul style="list-style-type: none"> • ADD, • DELETE • REPLACE When using the DELETE Action Code, set the DocPreviouslySubmitted data element to “Y” to avoid having to include the encoded document being deleted.
TradeTransaction	0	M	Parent: <i>DocumentSubmissionPackage</i> Accepts no specific data. Accepts child data elements only
TransactionCategory	1-20A	M	Parent: <i>TradeTransaction</i> Values are: <ul style="list-style-type: none"> • SINGLE_TXN • CONTINUOUS Use SINGLE_TXN when supplying a Filer Code and Entry Number. Otherwise use CONTINUOUS

<i>DocumentSubmission Package Data Elements</i>	Length +Type	Desig	Description	Note
Entry	0	M	Parent: <i>TradeTransaction</i> Accepts no specific data. Accepts child data elements only	
EntryNumber	8N	C	Parent: <i>Entry</i> Required when submitted document supports and entry or entry summary	
Filer	3AN	C	Parent: <i>Entry</i> Required when submitted document supports and entry or entry summary	

CBPRequest	0	M	Parent: <i>TradeTransaction</i> Accepts no specific data. Accepts child data elements only	
CBPRequestID	1-30AN	M	Parent: <i>CBPRequest</i> Supply the Action Identification Number from the UC transaction E2 record. If not available use: • UNSOLICITED	1
CBPRequestType	1-30AN	O	Parent: <i>CBPRequest</i> Future Use: Refer to XSD for definition	
CBPRequestDate	8N	M	Parent: <i>CBPRequest</i> Request Date in YYYYMMDD format	
DocumentData	0	M	Parent: <i>TradeTransaction</i> Accepts no specific data. Accepts child data elements only. This entire block can be repeated multiple times if submitting multiple documents in the same transaction. Repeat entire block once per document.	
DocumentHeader	0	M	Parent: <i>DocumentData</i> Accepts no specific data. Accepts child data elements only.	
DocumentID	1-50AN	M	Parent: <i>DocumentHeader</i> Must be unique and never repeated by the same transmitter	

<i>DocumentSubmission Package Data Elements</i>	Length +Type	Desig	Description	Note
DocumentLabel	1-100AN	M	Parent: <i>DocumentHeader</i> See Note 2 for complete list. Available for import from CommonData.xsd	2
CompleteFileName	1-200AN	M	Parent: <i>DocumentHeader</i> Must be unique and never repeated by the same transmitter	

FileExtensionType	1-4AN	M	Parent: <i>DocumentHeader</i> See Note 3 for acceptable file extension types.	3
DocPreviouslySubmitted	1A	C	Parent: <i>DocumentHeader</i> Must be Y or N.	
DocumentDescription	1-50AN	M	Parent: <i>DocumentHeader</i>	
GovtAgencyList	0	M	Parent: <i>DocumentData</i> Accepts no specific data. Accepts child data elements only	
GovtAgency	1-20AN	M	Parent: <i>GovtAgencyList</i>	4
Comment	1-100AN	O	Parent: <i>DocumentData</i>	
OptionalData	0	O	Parent: <i>DocumentData</i> Accepts no specific data. Accepts child data elements only. All data elements under OptionalData are used to supply optional document specific data at the trade partner's discretion.	
InvoiceData	0	O	Parent: <i>OptionalData</i> Accepts no specific data. Accepts child data elements only	
InvoiceNbr	1-50AN	O	Parent: <i>InvoiceData</i>	
InvoiceType	1-50AN	O	Parent: <i>InvoiceData</i>	
InvoiceLineItemData	0	O	Parent: <i>InvoiceData</i> Accepts no specific data. Accepts child data elements only	
DocumentSubmission Package Data Elements	Length +Type	Desig	Description	Note
InvoiceLineNbr	1-3AN	O	Parent: <i>InvoiceLineItemData</i>	

CommodityData	0	O	Parent: <i>InvoiceLineItemData</i> Accepts no specific data. Accepts child data elements only
HTSNumber	4-10N	O	Parent: <i>CommodityData</i>
CommodityDescription	1-200AN	O	Parent: <i>CommodityData</i>
CountryOfOrigin	1-50AN	O	Parent: <i>CommodityData</i>
PortOfLading	4N	O	Parent: <i>CommodityData</i> Foreign Port of Lading
PortOfEntry	4N	O	Parent: <i>CommodityData</i>
TradeParties	0	O	Parent: <i>CommodityData</i> Accepts no specific data. Accepts child data elements only
TradeParty	0	O	Parent: <i>TradeParties</i> Accepts no specific data. Accepts child data elements only
TradePartyID	100	O	Parent: <i>TradeParty</i> IR Number of Trade Party. Dashes are optional. CBPRequestType
TradePartyType	20AN	O	Parent: <i>TradeParty</i>
DocumentObject	Base-64 encoded binary	C	Parent: <i>DocumentData</i> Used to supply encoded document. Document should be encoded as a base64 string. Do not exceed Max. Message size (noted on Page 6) Do not include DocumentObject when using the DELETE Action Code. Set the DocPreviouslySubmitted data element to "Y" and DocumentObject is not required.

Note 1

CBPRequestID

Use UNSOLICITED when sending documents prior to a receiving a request for documents.

Use UNKNOWN when sending documents and no Action ID was provided in the request for documents.

Note 2

See Appendix A for Values for Document Label

Note 3

Acceptable Values for FileExtensionType

These are the preferred file types for DIS transactions:

- PDF
- GIF
- PNG
- JPG
- JPEG

Other acceptable file types include the following but will make it more difficult for CBP to view the document:

- DOC
- DOCX
- PPT
- BMP

Transmitters should not submit TIF or TIFF file formats. Additionally, CBP will not reject for file formats not on this list. Transmitters should validate the file types when programming their DIS interface and restrict the user from submitting any file types not on this list.

Note 4: See Appendix A for Values for Government Agency Codes

Message Validation Response – (Output Only)

Designation: Mandatory
Max Occurrences: One
Parent Element: MessageBody

The DocumentSubmissionPackage is a child of the MessageBody element. It contains several child and subchild elements providing all of the document specific data.

<i>MessageValidation Response Data Elements</i>	Length +Type	Desig	Description	Note
MessageLevelResult	0	M	Parent: <i>MessageValidationResponse</i> Accepts no specific data. Accepts child data elements only	
ProcessedMessageHeader	0	M	Parent: <i>MessageLevelResult</i> Accepts no specific data. Accepts child data elements only. This block is used to return the MessageHeader and all of its child data elements supplied by the transmitter from the input transaction	
MessageID	1-50AN	M	Parent: <i>ProcessedMessageHeader</i> MessageID supplied by transmitter	
MessageType	1-50AN	M	Parent: <i>ProcessedMessageHeader</i> DocumentSubmission is only supported message type for input at this time.	
SentDateTime	1-50AN	M	Parent: <i>ProcessedMessageHeader</i> SentDateTime supplied by transmitter	
TransmitterID	3AN	M	Parent: <i>ProcessedMessageHeader</i> TransmitterID supplied by transmitter	

TransmitterSiteCode	4N	M	Parent: <i>ProcessedMessageHeader</i> TransmitterSiteCode supplied by transmitter	
PreparerID	3AN	M	Parent: <i>ProcessedMessageHeader</i> PreparerID supplied by transmitter	
MessageValidation Response Data Elements	Length +Type	Desig	Description	Note
PreparerSiteCode	4N	M	Parent: <i>ProcessedMessageHeader</i> PreparerSiteCode supplied by transmitter	
MessageProcessingResult	0	M	Parent: <i>MessageLevelResult</i>	
ProcessingEvent	1-50AN	M	Parent: <i>MessageProcessingResult</i> See Note 1 for possible values	1
ProcessingStatus	1-6AN	M	Parent: <i>MessageProcessingResult</i> Values are: <ul style="list-style-type: none"> • PASSED • FAILED 	
ProcessingStatusSummary Text	1-2000AN	O	Parent: <i>MessageProcessingResult</i>	
ProcessingLogText	1-2000AN	M	Parent: <i>MessageProcessingResult</i> One or more words describing success or failure of the transaction	
DocumentLevelResult	0		Parent: <i>MessageValidationResponse</i> Accepts no specific data. Accepts child data elements only. This block will be repeated if multiple documents were submitted in the same transaction. Repeats one time per document.	

ProcessedDocumentHeader	0		Parent: <i>DocumentLevelResult</i> Accepts no specific data. Accepts child data elements only. This block will return the data from the input transaction's DocumentHeader block	
DocumentID	1-50AN		Parent: <i>ProcessedDocumentHeader</i> Returned from input transaction	
DocumentLabel	1-100AN		Parent: <i>ProcessedDocumentHeader</i> Returned from input transaction	
CompleteFileName	1-100AN		Parent: <i>ProcessedDocumentHeader</i> Returned from input transaction	
FileExtensionType	1-4AN		Parent: <i>ProcessedDocumentHeader</i> Returned from input transaction	
MessageValidation Response Data Elements	Length +Type	Desig	Description	Note
DocumentDescription	1-255AN		Parent: <i>ProcessedDocumentHeader</i> Returned from input transaction	
TradeTransaction	0		Parent: <i>DocumentLevelResult</i> Accepts no specific data. Accepts child data elements only. This block will return the data from the input transaction's TradeTransaction block	
TransactionCategory	1-20AN		Parent: <i>TradeTransaction</i> Returned from input transaction	
Entry	0		Parent: <i>TradeTransaction</i> Accepts no specific data. Accepts child data elements only. This block will return the data from the input transaction's Entry block	
EntryNumber	8N		Parent: <i>Entry</i> Returned from input transaction	
Filer	3AN		Parent: <i>Entry</i> Returned from input transaction	

DocumentProcessingResult	0		Parent: <i>DocumentLevelResult</i> Accepts no specific data. Accepts child data elements only.	
ProcessingEvent	1-50AN		Parent: <i>DocumentProcessingResult</i> See Note 1 for possible values	1
ProcessingStatus	1-2000AN		Parent: <i>DocumentProcessingResult</i> Values are: <ul style="list-style-type: none"> • PASSED • FAILED 	
ProcessingLogText	1-255AN		Parent: <i>DocumentProcessingResult</i> One or more words describing success or failure of the transaction	

Note 1

Values for ProcessingEvent

- INITIAL_VALIDATION (Current Use)
- DETAILED_VALIDATION (Future Use)
- REVIEW (Future Use)
- OTHER (Future Use)

XSD Schema Definition Files

Find the XSD Schema Definition files at <http://www.cbp.gov/trade/ace/catair> in the Supporting Documents tab. For an explanation of the XSD Schema Definition files, see the Getting Started section at the beginning of the document.

XML Example Files

Find the DIS XML examples at <http://www.cbp.gov/trade/ace/catair> in the Supporting Documents tab.

APPENDIX A: Document-Specific Metadata Validations

The purpose of this section is to provide an overview of the data elements that are specific to a particular document. Note that there is no mandatory requirement for the trade to include document-specific elements in a document submission, except for the required XML data elements that are described in the above subsection, XSD Schema and Business Rules and Validations.

Documents that are Submitted to DIS via Secure FTP, Secure Web Services, MQ Queues, or Email

Agency Code	Official Document Name/Description	Document Type	Document Label Value Use to Submit document via XML to DIS “enumDocumentLabel” enumeration value (CommonData.xsd)	DocCode Use to submit document via email to DIS	Metadata/Comments (O = Optional)
Use to submit document via email to DIS					
Agricultural Marketing Service (AMS)					
AMS	Foreign Government Export Certificate (AMS-MO2 (Various Foreign Government Form Numbers))	CERTIFICATE	AMS_FOREIGN_GOVT_EXPORT	AMS01	NO METADATA LISTED
AMS	Request for Inspection, Reinsertion, Appeal Inspection	DOCUMENT	AMS_FV_237_REQ_FOR_INSP	AMS02	ALLOWED FOR NON ABI ENTRY/ENTRY SUMMARY ONLY
AMS	Application for Inspection	DOCUMENT	AMS_FV_356_APPL_FOR_INSP	AMS03	ALLOWED FOR NON ABI ENTRY/ENTRY SUMMARY ONLY
AMS	Importers Exempt Commodity Form	FORM	AMS_FV_6_IMPORTERS_EXEMPT	AMS04	ALLOWED FOR NON ABI ENTRY/ENTRY SUMMARY ONLY
AMS	Notification of Entry	DOCUMENT	AMS_FV_357_NOTIFICATION_OF_ENTRY	AMS05	ALLOWED FOR NON ABI ENTRY/ENTRY SUMMARY ONLY

Agency Code	Official Document Name/Description	Document Type	Document Label Value Use to Submit document via XML to DIS “enumDocumentLabel” enumeration value (CommonData.xsd)	DocCode Use to submit document via email to DIS	Metadata/Comments (O = Optional)
AMS	Import Request Shell Eggs	DOCUMENT	AMS_LPS_222_IMPORT_REQ_SHELL_EGGS	AMS06	ALLOWED FOR NON ABI ENTRY/ENTRY SUMMARY ONLY

APPENDIX B: Guidelines for Documents Submitted to DIS via Email

(Except for Export Manifest submissions - see <http://www.cbp.gov/trade/ace/export-manifest>)

Send email to: docs@cbp.dhs.gov

Email Subject Line: CAT=GEN; BOL_NBR=123456789100; SCAC=ABCD; ACTION=ADD, DELETE, or REPLACE

OR

CAT=GEN; ENTRY_NBR=12345678; FILER_CD=ABC; ACTION=ADD, DELETE, or REPLACE

NOTE: CAT must always equal GEN (for General) at this time. Additional categories shall be specified in DIS implementations guides as they are published over time.

Attachments: File Naming convention = DocCode-AnyFileName.pdf

NOTE: DocCode is a unique code assigned by CBP for each Document supported in DIS. Please find all document codes in Appendix A of DIS IG. **EXAMPLE:** CBP01-EntryABC12345678Invoice.pdf

Body:

START_DATA

AGENCY_CD=Mandatory (Trade must identify owning agency. If more than one agency needs to review the document(s), identify multiple agencies, separated by semi-colon (ex. ABC;DEF;XYZ). Please find all agency codes at <http://www.cbp.gov/document/guidance/appendix-v-government-agency-codes>).

TRANSMITTER_FILER_CD=Conditional (Required for Filers with valid filer codes)

TRANSMITTER_NAME=Mandatory (Name of company)

CENTER_TEAM=TEAM_ABC Conditional (Required when responding to CEEs)

PORT_CD=(4 digit port code) Conditional (Required when responding to CEEs)

IOR_NBR=Conditional (Required when responding to CEEs)

ACE_ACTION_ID=Conditional (Required at time of Post Release)

LICENSE_OR_PERMIT_NBR=Conditional (Required when submitting a license)

BROKER_REF_NBR=Optional (For future use)

POC_INFO= Optional (Name and Phone Number)

COMMENT=Optional (Any clarification/remark)

RETURN_EMAIL_ADDRESS=Optional (if different than sender email address)

END_DATA

Sender Signature/Company Stationary: (Optional) Company Name, Address, Phone Number

=====

Auto-response from DIS that the sender will receive upon email submission:

U.S. Customs & Border Protection (CBP) has received your e-mail to the Document Imaging System (DIS) Mailbox for Document Submissions. This auto-reply serves as a confirmation of receipt of your email only. It does not indicate acceptance or correctness of the submitted data or documents. Filers are to keep this e-mail to facilitate audit and tracking of submitted data and documents. Please report any issues to CBP if you do not receive this auto-response within an hour for every email submission to the DIS mailbox.

NOTE:

- Total email size including all attachments must not exceed **10MB**.
- For larger documents please breakup into multiple documents and submit multiple emails for the same Entry or Bill (i.e. send the same email subject line with additional documents).
- Photos/Images should be in an open internet format (jpeg, gif, png). Please do not use TIFFs.
- Documents should be of types pdf, doc, or xls (TIF and TIFF are not accepted).
- Separate the Bill number and the SCAC.
- Separate the Entry Number and the Filer Code.
- The file name must begin with 'DocCode-' (where DocCode is a unique code for the document)
- Do not leave a space between the "--(dash) in 'DocCode-' and the rest of the file name.
- Email Responses will be sent to the sender's email address if a return email address is not provided.

- The auto-response message ONLY verifies that the email has been received via the email, it does NOT indicate that email contents including the document attachments are correct/acceptable.
