Compared to other major airports ...

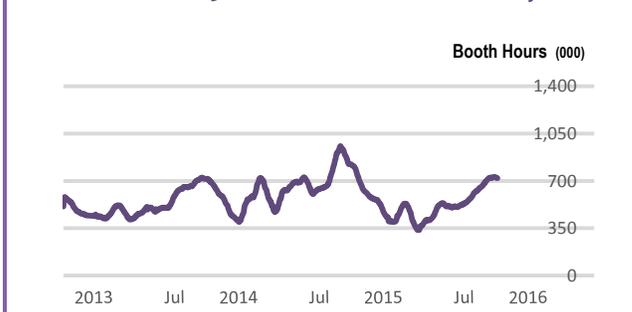

Automated processing slightly decreases average wait time

- **Travel is down significantly at JFK (Terminal 4).** Traveler volume decreased 11% compared to last year, but this decrease in traffic is offset by gains at Terminal 1 and 7.
- **Booth hours down significantly.** Booth hours decreased 23% compared to a year ago, from 700 hours to 541 hours.
- **Slightly decreased waits.** Year to date, average wait is down from 19.7 minutes last year to 19.6 minutes this year. 94% of passengers are being processed in under 60 minutes.
- **Cycle time is 3.7 seconds faster.** Global Entry and APC have combined to reduce the average cycle time. The faster cycle time allows for an additional 2 passengers to be processed per booth, per hour.

Traveler Volume ... seasonal upswing is lower than last year

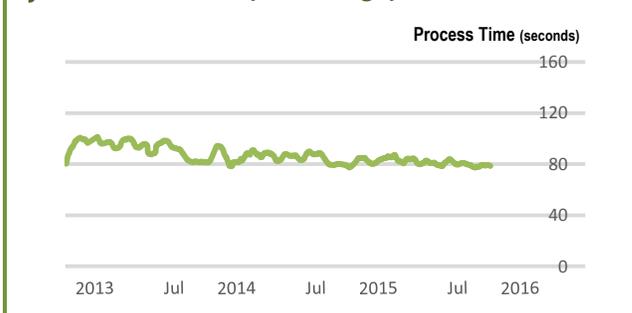

Booth Hours ... 23% fewer booths hours than last year

Wait Time ... increasing slightly since early 2015

Cycle Time ... steadily decreasing cycle times

Best Practice Inventory

JFK-4 Best Practice Assessment: JFK-4 has implemented many of the available best practices such as Global Entry, Automated Passport Control, One Stop, and Express Connect. Today, 44% of passengers are processed by GE and APC kiosks. APC is available at JFK-4 not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

5%	GE Traveler %	The % of travelers pre-processed by each automated method is shown in the assessment circle. Circles are shaded green, yellow, or red based on the potential % for each method.
39%	APC Traveler %	
0%	MPC Traveler %

Legend

	Fully Implemented		Partially Implemented / Not Available		Not Implemented
--	-------------------	--	---------------------------------------	--	-----------------

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A green "assessment circle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

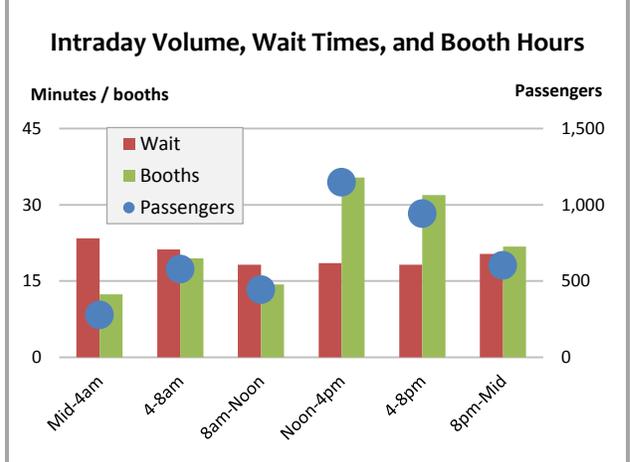

21% of passengers wait more than 30 minutes

Year to date, approximately 7% of JFK Terminal 4 passengers wait more than 1 hour, approximately 21% of passengers wait more than 30 minutes. Between the hours of Midnight to 4am, 27% of passengers wait more than 30 minutes.

Staffing could improve during off-peak

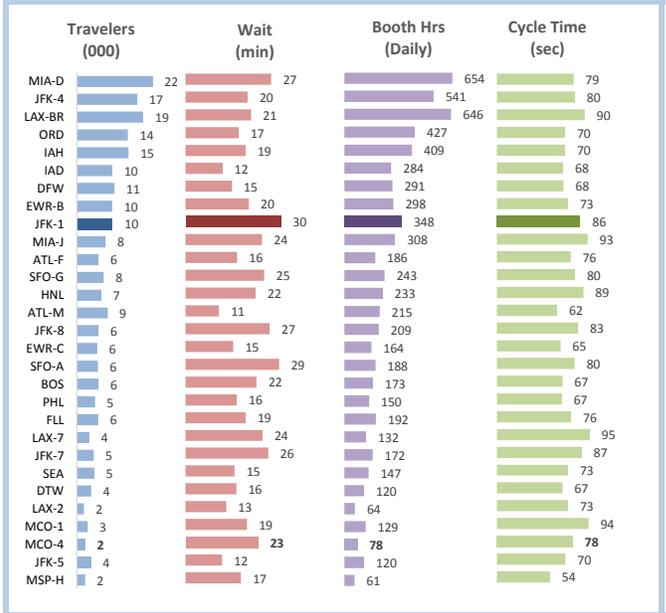

More than 1,140 passengers (on average) arrive every hour between Noon and 4pm, but waits are lower than average. Waits are the highest from Midnight to 4am (fewer than 280 passengers per hour). More staffing could greatly reduce waits during this time period.

Compared to other major airports ...

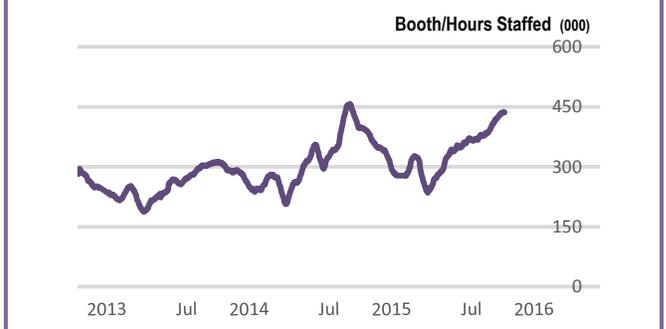

Increased booth hours can't offset increased volume

- **Travel is up significantly at JFK (Terminal 1).** Traveler volume increased 13% compared to last year. 31% of passengers use automated solutions like Global Entry and APC, up from 20% last year.
- **More booths open to meet demand.** Booth hours increased 5% compared to a year ago, but have not kept up with traveler volume (up 13%). However, additional booths may be required during peak hours.
- **Wait times still high, but have been decreasing since 2013.** Year to date, average wait is slightly up from 28.7 minutes to 30 minutes. However, Terminal 1 has the longest average wait time in the country, especially during peak hours. This is likely due to the high proportion of non-immigrant travelers (60%), which is up 1.7% compared to last year.
- **Cycle time is 2.2 seconds faster.** Global Entry and APC growth have combined to reduce average cycle time. Average cycle time is 2.2 seconds faster than last year, allowing for an additional 1 passenger to be processed per hour per booth.

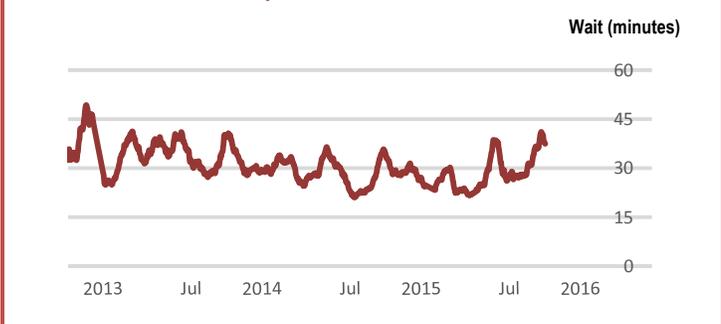

Traveler Volume ... continued strong growth

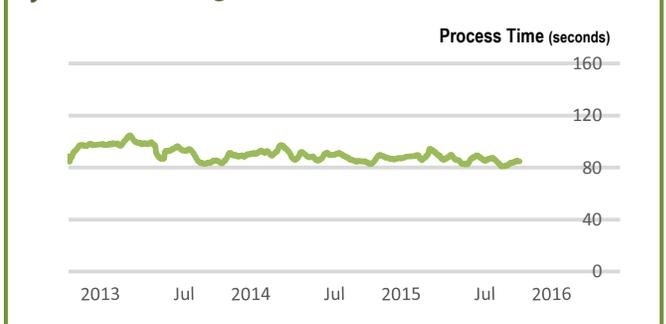

Booth Hours ... trending higher

Wait Time ... recent upward trend

Cycle Time ... slight downward trend

Best Practice Inventory

JFK Terminal 1 Best Practice Assessment: JFK Terminal 1 has implemented many of the available best practices. Most notably, 31% of JFK-1's passengers are now processed by Global Entry and APC, up from 20% last year. APC is available at JFK Terminal 1 not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

3%	GE Traveler %	The % of travelers pre-processed by each automated method is shown in the assessment circle. Circles are shaded green, yellow, or red based on the potential % for each method.

37% of passengers wait more than 30 minutes

Year to date, approximately 15% of JFK Terminal 1 passengers wait more than 1 hour, approximately 37% of passengers wait more than 30 minutes. Between the hours of Noon to 4pm, 50% of passengers wait more than 30 minutes.

Additional staff needed to reduce wait time

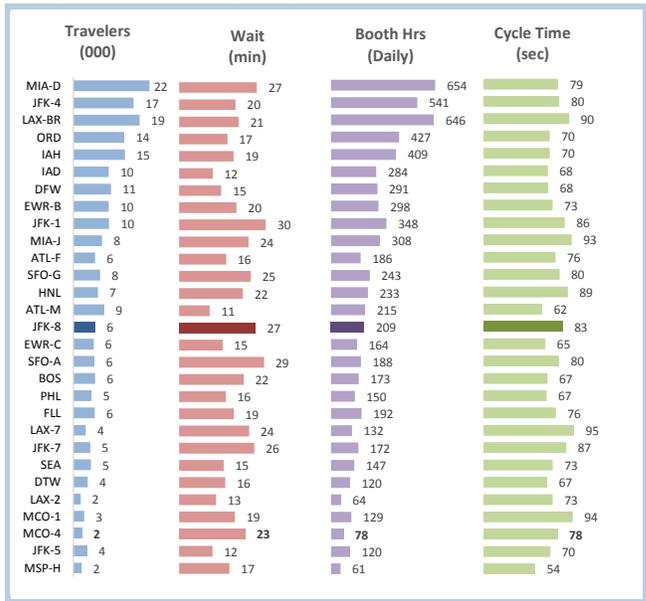

More than 770 passengers (on average) arrive every hour between Noon and 4pm. By opening only 26 booths during this time period, the average wait is 38 minutes. Additional staff may be required from 4am to Noon to reduce average waits leading into peak hours.

Fewer booth hours increased wait times

- **Travel increased slightly.** Traveler volume (year to date) has increased 2% compared to last year. Today, 17% of JFK-8's passengers are confirmed with automated solutions like Global Entry and APC.
- **Booth hours decreased by 5%.** JFK-8 booth hours have decreased 5% from 220 last year to 209 this year. The decrease in booth hours has led to an increase in wait time, despite improvement in cycle time.
- **Cycle time nearly 6 seconds faster.** Cycle time is 6% (5.7 seconds) faster than last year, allowing for an additional 2.8 passengers to be processed per hour, per booth. Although there was a 5.7 second improvement this year, cycle time will further improve as APC
- **Wait times increased 12%.** Wait time at JFK-8 is 2.8 minutes longer compared to last year. Wait times at JFK-8 are some of the highest in the country.

Traveler Volume ... recent upward trend

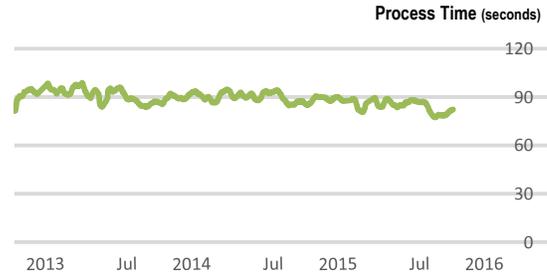

Booth hours ... 5% fewer booths

Wait Time ... recent upward trend

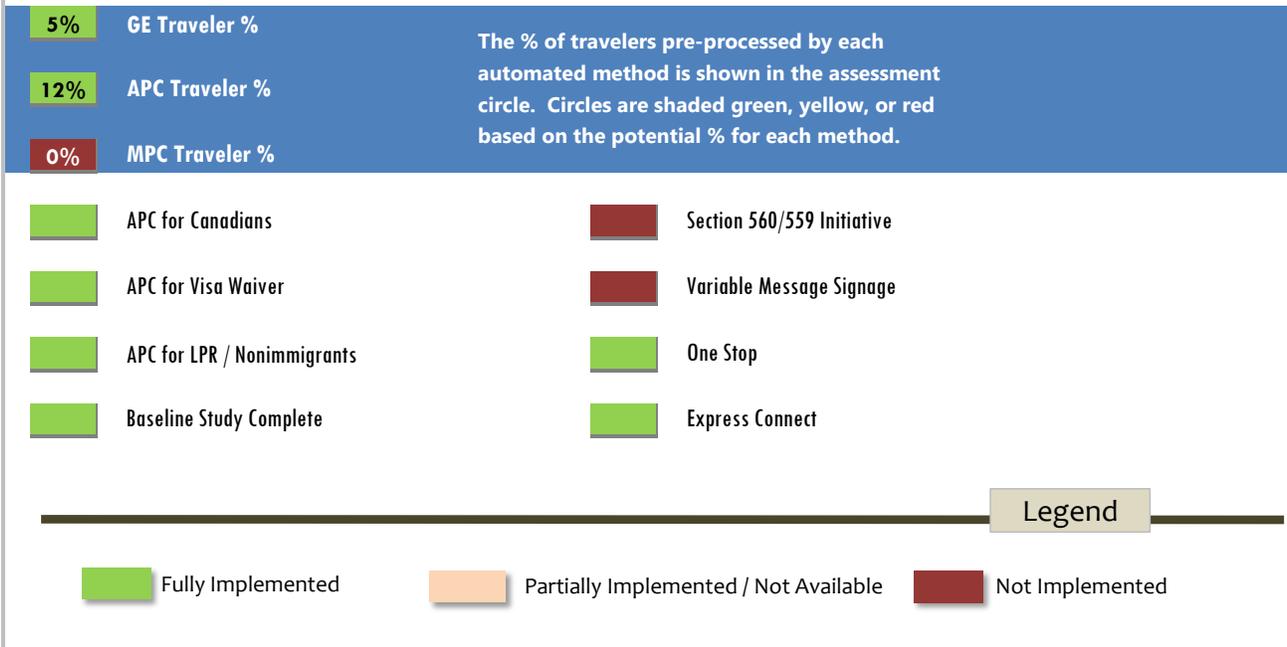

Cycle Time ... recent slight decrease

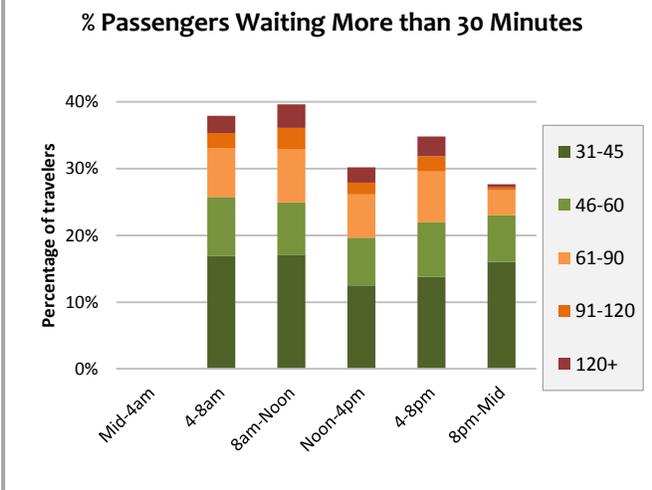

Best Practice Inventory

JFK Best Practice Assessment: JFK-8 has implemented many of the available best practices. 17% of travelers use GE and APC. As more travelers begin to utilize APC, the operation improvement will be showed in the near future. APC is available at JFK Terminal 8 not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

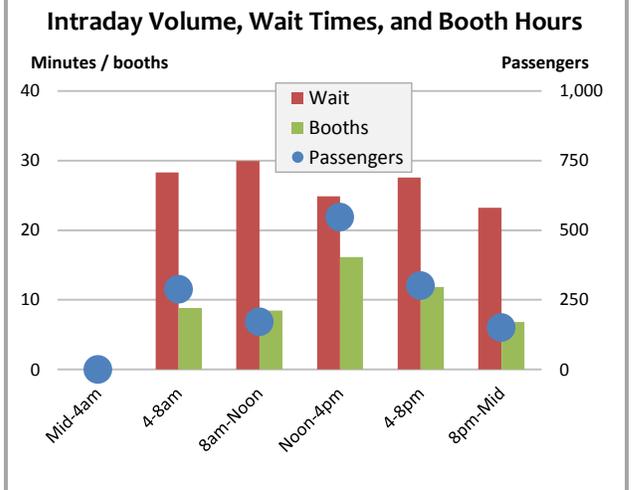

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A green "assessment circle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

34% of passengers wait more than 30 minutes
 Year to date, approximately 11% of JFK Terminal 8 passengers wait more than 1 hour, approximately 34% of passengers wait more than 30 minutes. Between the hours of 8am to Noon, 40% of passengers wait more than 30 minutes.

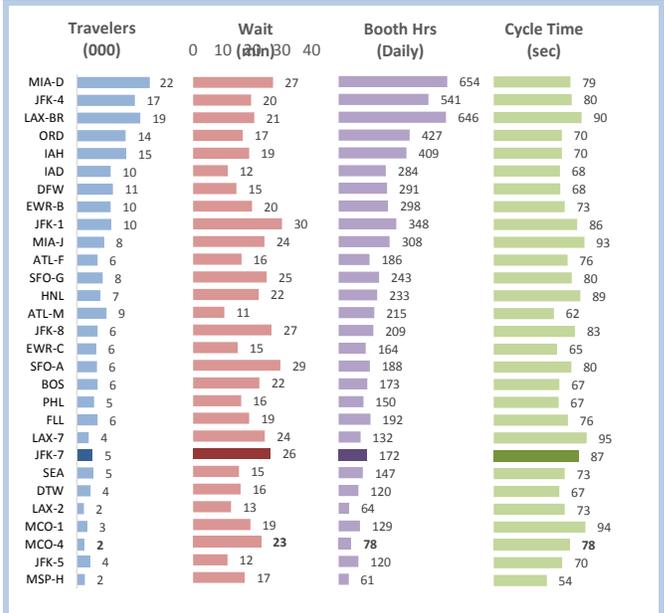

Need more booths during off peak hours
 JFK-8 is busiest between Noon-4pm (more than 540 passengers arrive per hour) and waits are 25 minutes during this time. Wait times during non-peak hours are longer and could be improved by opening more booths, especially between 4am and Noon.

Compared to other major airports ...

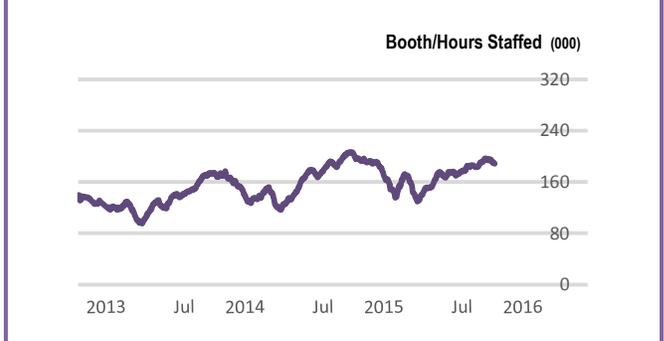

More booths have not been able to offset increased traveler volume

- **Travel is up at JFK-7.** Traveler volume at JFK-7 (year to date) has increased 8% compared to last year. Today, only 4% of JFK-7's passengers are confirmed with Global Entry, up from 3% last year. JFK-7 is yet to introduce APC.
- **More booths open to meet demand.** Booth hours have increased 2% (168 hours last year to 172 hours this year), but have not kept up with traveler volume (up 8%), as shown by 22% longer waits.
- **Faster processing.** Average cycle time and max throughput have improved by 1.9 second (2%) since last year. The increase in nonimmigrant share (66.5% this year) may prevent improvements in cycle time until APC is introduced.
- **Wait times increased by 22%.** Increased average daily travelers and suboptimal staffing to traffic have led to an increase in wait time. The average wait time increased by 22%, from 21.3 minutes last year to 26.1 minutes this year. The percentage of travelers waiting less than 60 minutes decreased to 92%.

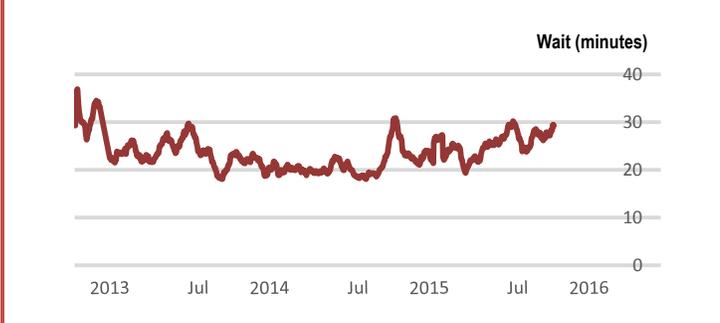

Traveler Volume ... steady upward trend

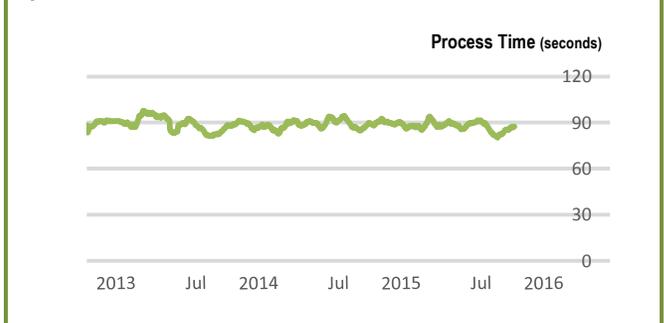

Booth Hours ... trending higher

Wait Time ... steadily increasing since late 2014

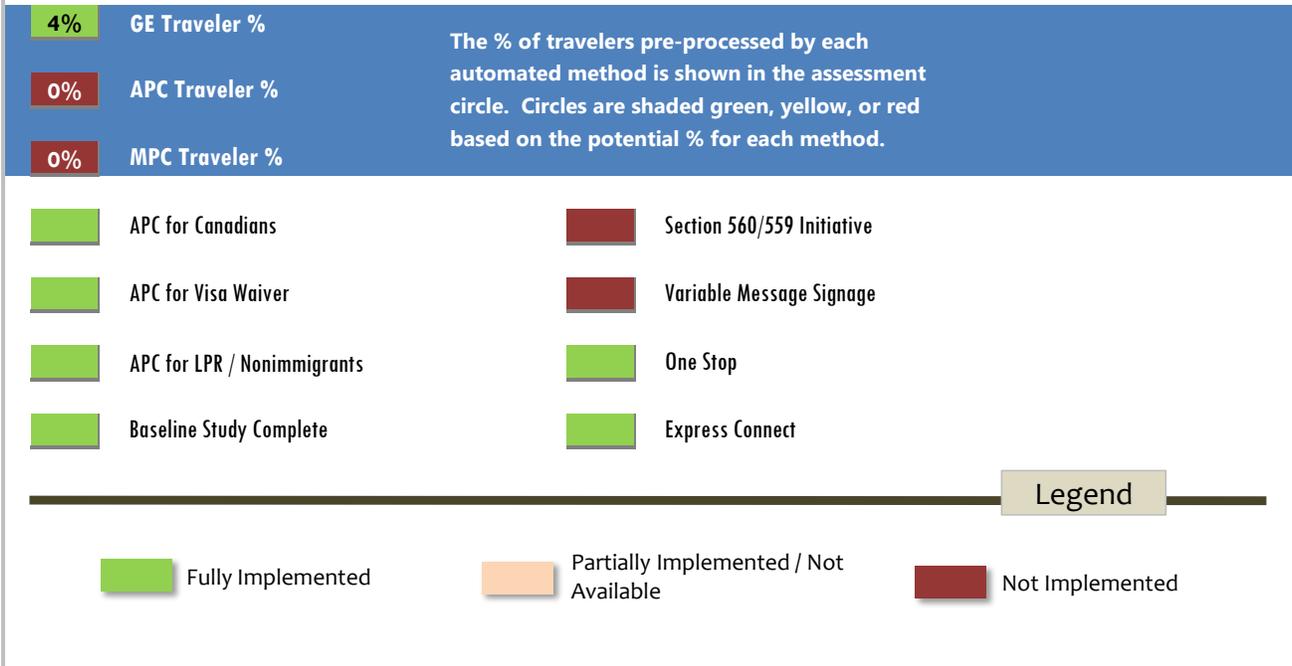

Cycle Time ... holding steady

Best Practice Inventory

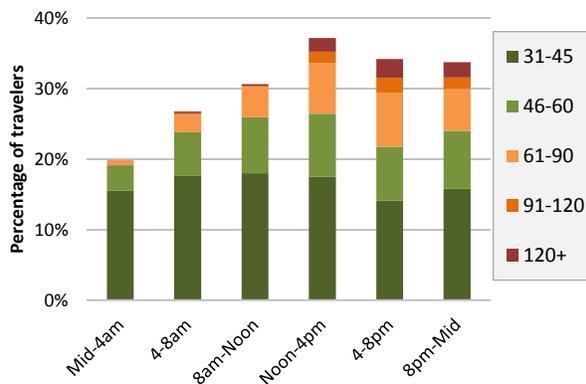

JFK Best Practice Assessment: JFK-7 has yet to implement some of the available best practices. 4% of travelers use GE, and APC has not yet been implemented. These practices need to be applied to reduce cycle times, as seen at other terminals across the country.

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A green "assessment circle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

34% of passengers wait more than 30 minutes
 Year to date, approximately 10% JFK of Terminal 7 passengers wait more than 1 hour. Between the hours of Noon to 4pm, 37% of passengers wait more than 30 minutes.

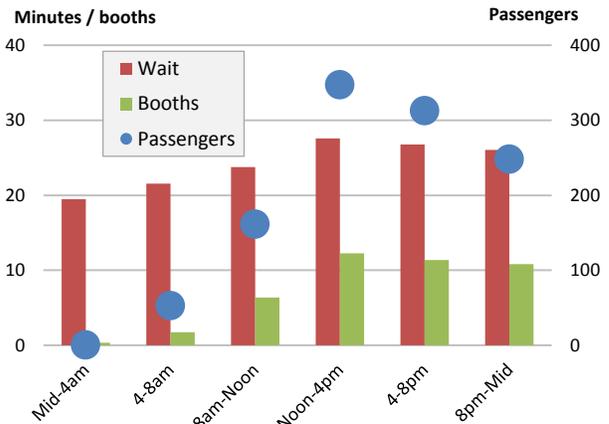

% Passengers Waiting More than 30 Minutes

JFK-7 can improve off-peak staffing

Passenger volume is highest between Noon and 8pm (330 passengers/hour), but with 12 booths open during this time, wait times are not much higher than average waits. Wait times can be improved in off-peak hours (4am-noon) by staffing a couple extra booths.

Automated processing shortens wait times

- **3,950 average daily travelers.** Traveler volume at JFK-5 (year to date) is 3,950. Today, 50% of JFK-5's passengers are confirmed with Global Entry and APC.
- **120 booth hours per day.** JFK-5 staffs an average of 120 booth hours daily to process travelers.
- **Efficient processing.** The average JFK-5 cycle time is 70.4 seconds (51.1 passengers per hour, per booth, with an average utilization per booth of 65%). This makes JFK-5 the most efficient of JFK's terminals.
- **Lowest wait time nationally.** Year to date, JFK-5 wait times are among the lowest in the country (11.6 minutes).

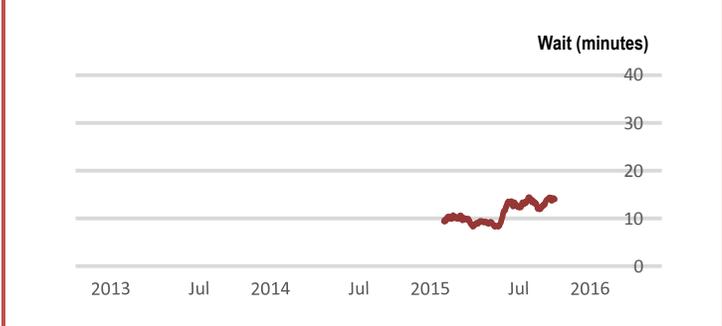

Traveler Volume ... increasing throughout the year

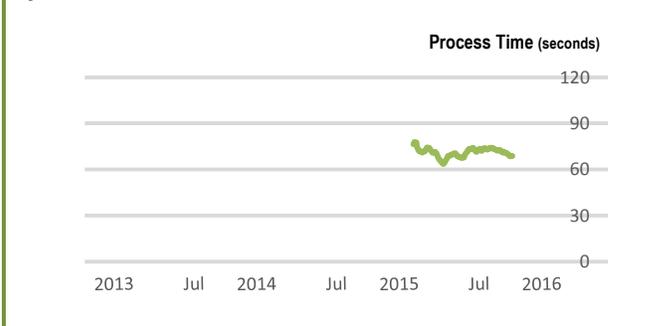

Booth Hours ... increasing throughout the year

Wait Time ... short waits, but increasing

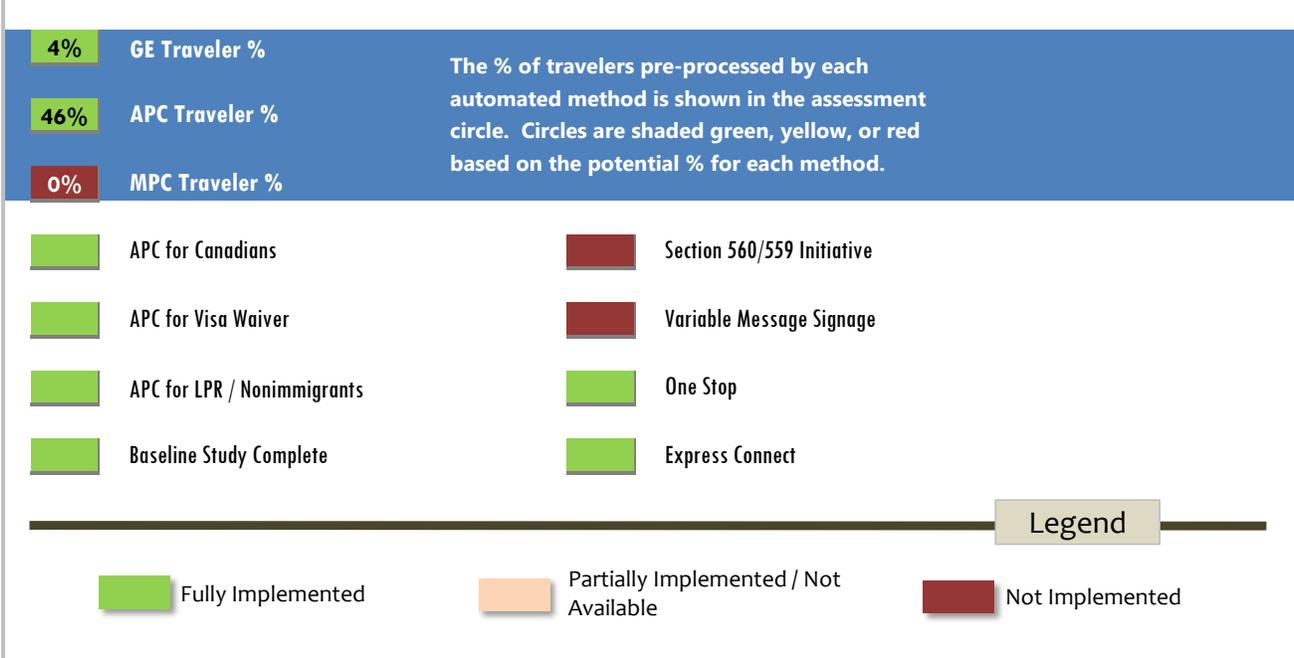

Cycle Time ... fast processing

Best Practice Inventory

JFK Best Practice Assessment: JFK-5 has implemented many of the available best practices. Most notably, 50% of travelers use GE, and APC. APC is available at JFK Terminal 5 not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

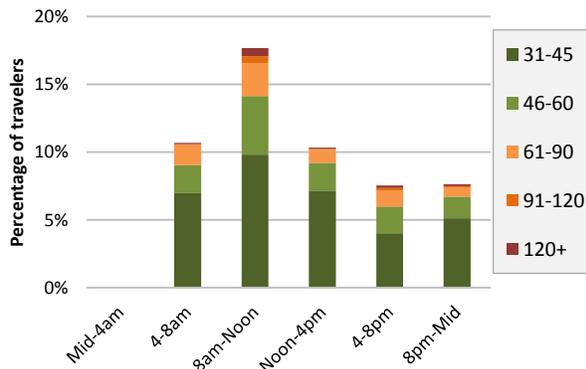

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A green "assessment circle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

10% of passengers wait more than 30 minutes

While very few JFK Terminal 5 passengers wait more than 1 hour (about 2%), approximately 10% of passengers wait more than 30 minutes. Between the hours of 8am to Noon, 18% of passengers wait more than 30 minutes.

% Passengers Waiting More than 30 Minutes

JFK-5 can improve off-peak staffing

Passenger volume is highest between 4pm and 8pm (387 passengers/hour), yet with 10 booths open during this time, wait times are lower than the average. More booths may be needed from 4am to 4pm (off-peak hours) when waits exceed the average.

Intraday Volume, Wait Times, and Booth Hours
