Air Import Manifest Changes with Transition to ACE

What will change when Air Manifest functionality is transitioned from Air AMS to ACE?

- Manifest data submitted to CBP will be subject to increased system validations that ensure compliance with published requirements
- Key data elements that will be subject to increased validation include:
 - Header format must comply with published Implementation Guide in Appendix D of the CAMIR
 - Consignee country codes must be entered and valid
 - Shipment weight values must be numeric and greater than zero
 - Bonds must be on file and valid
- Some system validations will be updated to provide more descriptive language for error codes
- Duplicate In-bond number edit in ACE MMM will cause duplicate 9 digit in-bond numbers to reject in ACE.

A complete list of changes can be found on the CBP website

<http://www.cbp.gov/trade/update-air-manifest-changes-ace-deployment-d-january-release>

ACE Air Import Manifest

- Deployment**
- January 3, 2015 – Air Import Manifest capabilities were deployed in ACE for a testing period of dual processing of air import manifest in both ACE and Air AMS.
-

- Impact**
- There was no trade impact with the deployment on January 3, 2015 as the system of record will remain Air AMS and all messaging back to the filers will be from Air AMS.
-

- Testing**
- The ACE Certification environment will be ready for trade testing in March 2015
 - Once the ACE certification environment is deployed there will be no Air AMS certification region.

ACE Air Import Manifest

Training

- CBP field training on the ACE system will be in March and April 2015 and field User Acceptance Testing (UAT) will occur during this time.

Dual Processing Period (January to May 2015)

- CBP will be monitoring the message processing (input and output) during the dual processing period of January to May 2015 for any discrepancies between Air AMS processing and ACE Air Manifest.
- Any issues with the ACE code discovered will be corrected during this period and any trade-identified issues will be communicated to the trade partner.
- Air QX/WX ABI In-bond processing will be converted to QP/WP processing by May 2015 operational deployment of ACE Air Manifest (updated IGs will be posted December 2014)

Air Import Manifest Information on CBP.gov

The full Air Import Manifest information notice on CBP.gov includes more details on the January 3, 2015 deployment.

Border Protection

Truck Manifest Changes and ACE Portal Changes

- ACE will be transitioning the ACE Truck application from the current legacy application onto the ACE Multi-Modal Manifest (MMM) platform.
- The transition will consist of **three increments** of work of which the first increment has been completed and deployed to production.

First increment	<ul style="list-style-type: none">• Provides the ability for carrier to arrive and export their in-bonds through the ACE portal for ocean, rail and truck carriers.• Air carriers will have this functionality available to them in May 2015
Second increment	<ul style="list-style-type: none">• Provide for ACE MMM to be the system of record for all truck filings.• This increment will resolve remaining in-bond issues and provide for consistent in-bond messaging from ACE.
Third increment	<ul style="list-style-type: none">• Resolve remaining coding and enhancements to truck to allow retirement of the ACE legacy truck application.

Truck Manifest: In-Bond Arrival and Export Enhancement

Background

- The ACE Portal currently provides truck carriers the ability to arrive and export in-bonds through a truck e-manifest shipment submitted via the Portal.
- To reduce in-bond arrival and export processing for ocean rail and truck in-bond transactions CBP has enhanced the in-bond arrival and in-bond export capabilities in the ACE Portal to allow all carriers to arrive, export, and cancel in-bond transactions associated to Bills of Lading (BOL) with the carriers Standard Carrier Alpha Code (SCAC)

Truck Manifest: In-Bond Arrival and Export Enhancement - continued

Inside the “tools” tab of the ACE Portal the “In-Bond arrival” and “In-Bond export” links have been redesigned to allow users to designate an “arrive by” level. The ACE Portal will display four (4) In-Bond action types: 1) In-Bond Arrival; 2) In-Bond Cancel Arrival; 3) In-Bond Export; and 4) In-Bond Cancel Export

The screenshot shows the ACE Portal interface. On the left, the 'Task Selector' menu is expanded to 'Manifest Tools', with 'In-Bond Arrival' highlighted in a red box. Below it, the 'Account Selector List' shows 'View By' options for 'Acct Name' and 'SCAC'. The main content area is titled 'In-Bond Arrival' and contains a search form. The form includes a 'Search In-Bonds' section with a 'Find In-Bonds where' dropdown set to 'In-Bond #', followed by an 'is' dropdown and a text input field. Below this, 'Destination Port is' is set to '3801' with a 'Lookup Port Code' link. 'Filing Date Range is' is set to '08/03/2014' to '08/09/2014' with a '(45 day default)' note. There are 'Search' and 'Clear' buttons. At the bottom, an 'Arrive By:' dropdown is set to 'In-Bond #'.

ACE Export Manifest

Overview

- CBP is building an electronic export manifest process for the various modes of transportation (Air, Ocean, Rail, Truck)
- ACE export manifest will provide the ability for trade to file and CBP to process electronic export manifests.
- These export manifest developments will be rolled out as pilots over the next year pending publication of a final regulation change removing paper filing as an option and allowing for filing electronically by the trade.

Benefits

- Electronic manifest filing will eliminate costly and time consuming paper processes in place today.
- ACE will provide advance validation of the Internal Transaction Number (ITN) that will link the manifest and commodity filings.
- ACE will provide advance notice of holds prior to loading.
- ACE will automate the closing out of the in-bond transaction with one departure message.

ACE Export Manifest

Pilot Strategy

- Air export manifest is currently being coded for a tentative 2015 pilot which will be announced as part of a Federal Register Notice (FRN). Roll out will begin with limited carriers, limited ports.
- Federal Register Notice (FRN) will be published soliciting trade participants for export manifest pilots for all modes.

Pilot Schedule

- Air export manifest pilot – Target: Early 2015
- Ocean export manifest pilot – Target: Early 2015
- Rail export manifest pilot – Target: Early 2015
- Truck export manifest pilot – Target: TBD

PGA Integration

- Export PGA processing under the single window initiative will be mainly on the AES commodity filing by the export.
- The initial list of export PGAs that are working on ACE/AES are: Census, BIS, DDTTC, EPA, AMS, OFAC, DEA, NMFS, FWS, ATF and additional agencies.
- TSA and export manifest automation for carriers

ACE Export Manifest Technical Information

- ACE export manifest has been coded in the industry standard message sets of Cargo-IMP 32nd Edition.
- CBP will code for XML IATA 2nd Edition, AIR CAMIR and for a CBP XML Unified Multi-Modal Manifest version.
- Currently a draft version of a possible Air CAMIR export manifest is published on the website and this will be updated as soon as possible with additional guidance on the additional message sets above (Cargo-IMP, IATA 2 and XML Unified Multi-Modal Manifest Message Set)

Question and Answer Session

The image displays three calendar cards, each representing a mandatory ACE date. The first card is for May 1, 2015, with a red header and footer. The second card is for November 1, 2015, with a blue header and footer. The third card is for October 1, 2016, with a red header and footer. Each card is part of a larger red-bordered box.

Month	Year	Mandatory use of ACE for
MAY	2015	all electronic manifest filings
NOV	2015	all electronic cargo release and related entry summary filings
OCT	2016	all remaining electronic portions of the CBP cargo process
