

TTB Pilot

Status and Next Steps

TSN Plenary Session
June 23, 2015

Applicable Ports and Commodities

As TTB does not maintain a port presence, the pilot will simply test the transmission of message set data through ACE in several different import scenarios. The goal is that TTB reliably receive the data with total accuracy. The parameters of the pilot will be:

- All ports that CBP has identified as the initial pilot ports.
- All imported commodities regulated by TTB.

What Processes are Being Piloted?

- Inputting the TTP importer permit number
- Inputting the Certificate of Label Approval ID number
- Certifying that the importer has obtained all necessary certificates
- Inputting the sale price of large cigars, which is the basis for determining excise tax

Status of TTB work

- Trade Filing Instructions
- Federal Register Notice
- Initial Pilot Participants Selection
