APC and more booths help Bradley reduce waits despite more volume

- Travel is up significantly at LAX (Bradley).** Traveler volume at Bradley Terminal (year to date) has increased 16% compared to last year. Bradley may be receiving more passengers (+2,536) at the expense of Terminal 2 (-547) and 7 (-871). 35% of passengers are confirmed with automated solutions like Global Entry and APC, up from 8% last year.
- More booths being staffed to meet demand.** Booth hours at LAX Bradley have increased 7% compared to a year ago, from 596 hours to 640 hours per day.
- Significant decrease in wait times.** Year to date, LAX Bradley's average wait decreased by 2 minutes (9%) to 21.3 minutes. 95% of passengers are being processed in under 60 minutes.
- Faster processing.** LAX (Bradley) has one of the highest average cycle times of any major terminal. However, average cycle time (90.4 seconds) has decreased significantly from 99.1 seconds a year ago.

Traveler Volume ... trending upwards

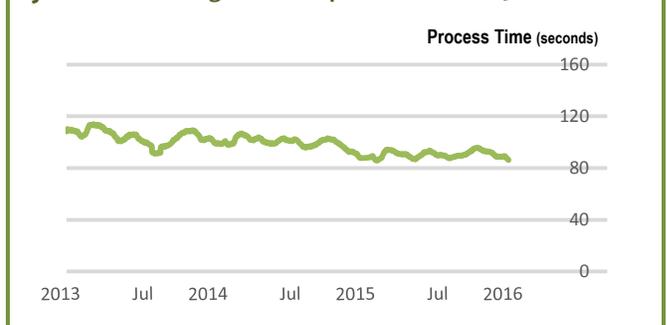

Staffing ... 7% more booths staffed than last year

Wait Time ... recent downturn in wait time

Cycle Time ... significant improvement in 2015

Best Practice Inventory

LAX Bradley Best Practice Assessment: LAX Bradley has implemented many of the available best practices. An increase in utilization of practices such as Global Entry and APC have increased LAX Bradley's efficiency by 35%. APC is available at LAX Bradley not only to US Citizens, but also Canadians, Visa Waiver country travelers, and Lawful Permanent Residents.

Legend

 Fully Implemented	 Partially Implemented / Not Available	 Not Implemented
---	---	---

Many innovative practices, technologies, and programs are available to make international air passenger processing more efficient and reduce congestion at airports. If all practices are implemented, an airport may reduce wait times as much as 50 percent compared to not implementing any best practices. A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

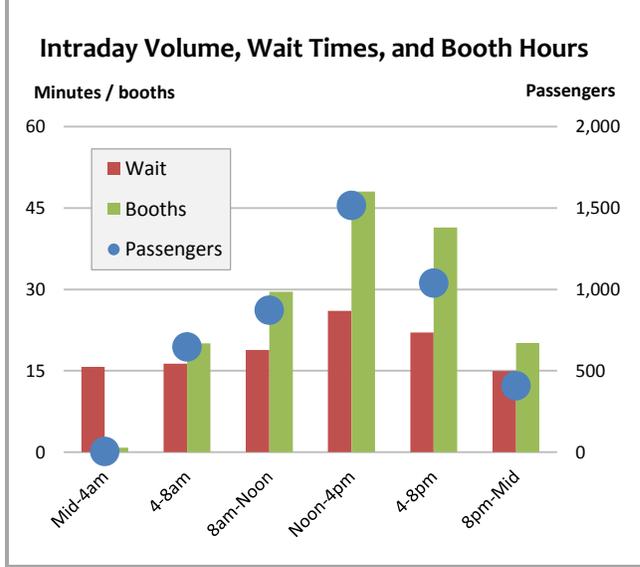

25% of passengers wait more than 30 minutes

Year to date, approximately 6% of Bradley passengers wait more than 1 hour. Between the hours of Noon to 4pm, 34% of passengers wait more than 30 minutes.

LAX Bradley staffs well to traffic demand

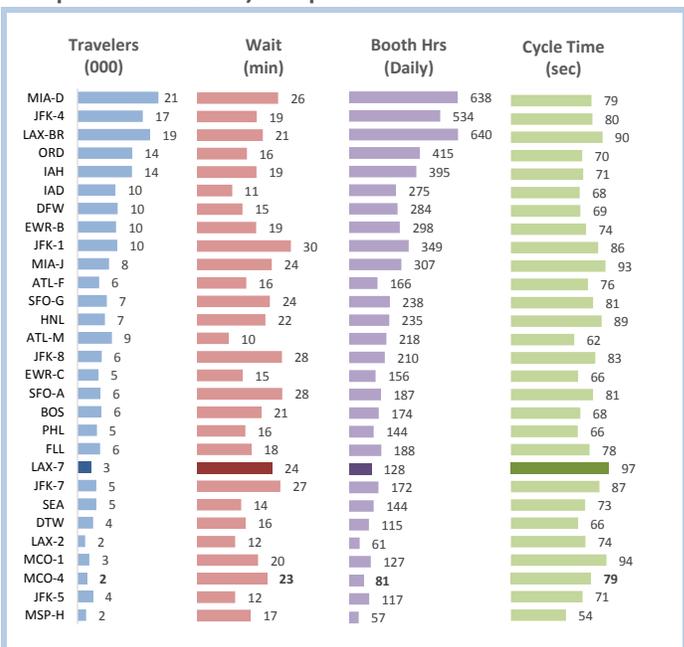

On average, over 1,510 passengers arrive every hour between Noon and 4pm. By staffing 48 booths, average waits (26 minutes) are higher than the average (21.3 minutes). Opening extra booths from 4am to Noon may reduce average waits leading into peak hours.

Compared to other major airports ...

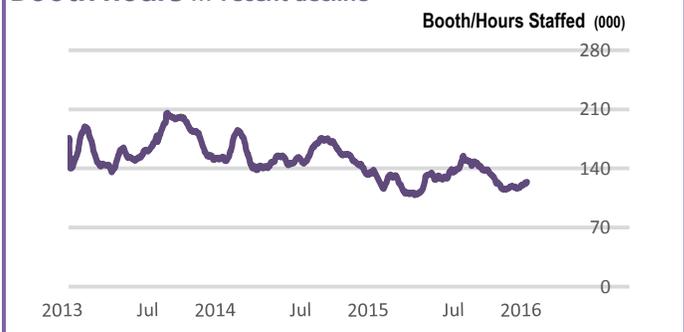

All key metrics are down at LAX-7

- Travel is down significantly at LAX Terminal 7.** Traveler volume (year to date) has decreased 20% compared to last year. The 16% volume increase at Bradley and the decrease at terminal 7 may be the result of LAX flight management decisions. Only 2% of passengers are confirmed with Global Entry today, the same as last year.
- Fewer booths compared to last year.** Booth hours have decreased (-16%) due to lower traveler volume (-20%). However, the booth decrease is too much given the increase in waits (+9%).
- Slower processing.** Average cycle time increased by 8.3 seconds, while max hourly throughput decreased by 3.5 passengers per booth, per hour. Lax-7 is one of the few terminals in the nation with decreasing efficiency.
- Wait times increased by 9%.** Decreased booth hours and longer process times have led to an increase in wait time. The average wait time increased by 9%, from 22.3 minutes last year to 24.4 minutes this year.

Traveler Volume ... recent decline

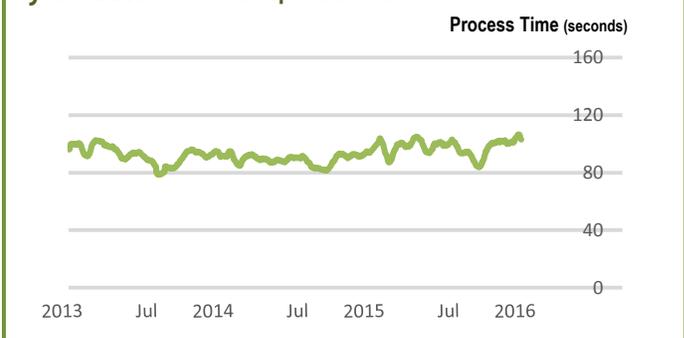

Booth hours ... recent decline

Wait Time ... trending upward

Cycle Time ... recent upward trend

Best Practice Inventory

LAX Best Practice Assessment: LAX-7 has not implemented many of the available best practices. Automated processing such as Global Entry is implemented, however only 2% of travelers are utilizing it. To fulfill its potential, LAX Terminal 7 needs to utilize more best practices, especially APC.

2%	GE Traveler %	The % of travelers pre-processed by each automated method is shown in the assessment rectangle. Rectangles are shaded green, yellow, or red based on the potential % for each method.
0%	APC Traveler %

31% of passengers wait more than 30 minutes

Year to date, approximately 4% of LAX Terminal 7 passengers wait more than 1 hour. Between the hours of 4pm to 8pm, 34% of passengers wait more than 30 minutes.

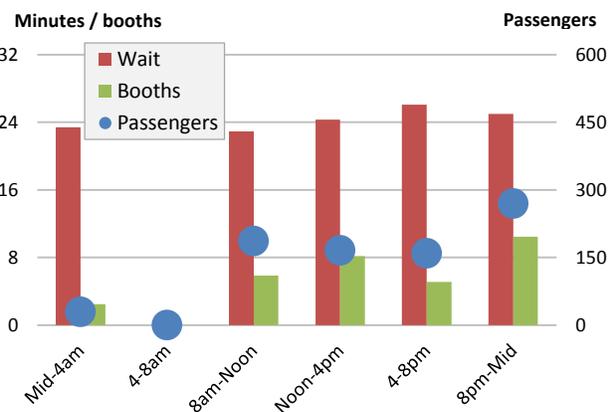

% Passengers Waiting More than 30 Minutes

LAX-7 has high waits throughout the day

The busiest hours are between 8pm and Midnight, when 270 passengers arrive per hour. Wait times during peak hours are 25 minutes, which is slightly higher than the average. By opening more booths from 8am-8pm, LAX-7 may reduce average wait.

Compared to other major airports ...

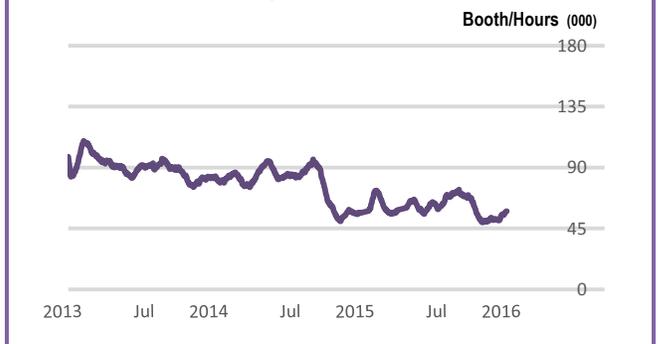

Wait times drop due to decreased traveler volume

- Travel is down at LAX Terminal 2.** Traveler volume (year to date) has decreased 22% compared to last year. The volume decrease at Terminal 2 and the increase at the Bradley Terminal may be a result of airport authority decisions. Today, 7% of LAX-2's passengers are confirmed with Global Entry, the same as last year.
- Reduction in booths hours to match demand.** Booth hours have decreased to match lower traveler volume. Average daily booth hours have decreased 21% from 77 hours last year to 61 hours this year.
- Staff efficiency virtually unchanged.** Average cycle time and max hourly throughput are virtually unchanged from last year.
- Wait times decreased by 7%.** A decrease in traveler volume has led to a decrease in wait time. The average wait time decreased by 7%, from 13.3 minutes last year to 12.4 minutes this year.

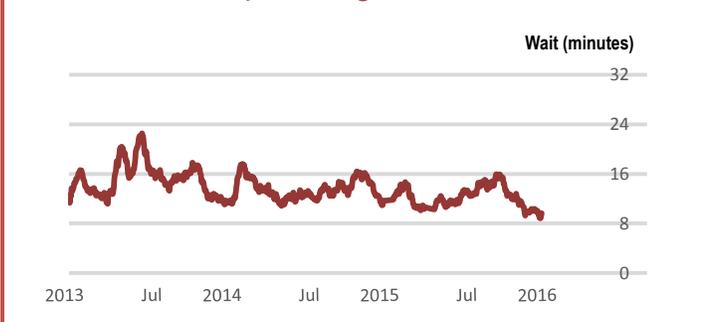

Traveler Volume ... sharp decrease in 2015

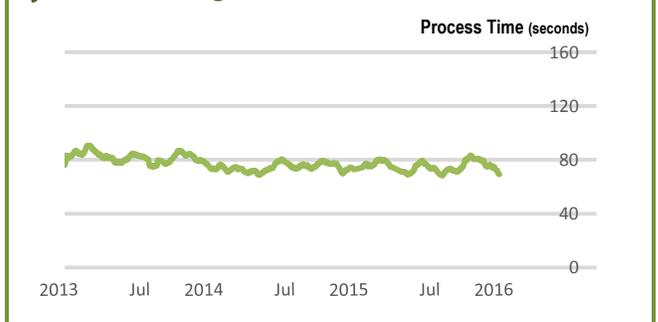

Booth Hours ... sharp decrease recently

Wait Time ... steadily decreasing

Cycle Time ... slight downward trend since 2014

Best Practice Inventory

LAX Best Practice Assessment: LAX has not introduced many of the available best practices. Global Entry has been implemented and 7% of travelers are utilizing it. Other practices such as APC and MPC have not yet been implemented at LAX Terminal 2. To improve cycle times and air passenger processing efficiency LAX Terminal 2 must begin to utilize more of the best available practices.

A Green "assessment rectangle" indicates the practice is properly and fully implemented; Red means the practice is not in place; and Orange indicates implementation is limited and achieves less than intended results.

12% of passengers wait more than 30 minutes

While very few LAX Terminal 2 passengers wait more than 1 hour (about 1%), approximately 12% of passengers wait more than 30 minutes. Between the hours of 8am to Noon, 17% of passengers wait more than 30 minutes.

The highest waits are from 8am to Noon

LAX-2 is busiest between 4pm-8pm, when 198 passengers arrive per hour. An average of 6 booths per hour are staffed during 4pm-8pm, wait times are 8 minutes; An average of 5 booths per hour are staffed during 8am- Noon, wait times are 17 minutes. Opening one extra booth from 8am to Noon could greatly reduce waits.
