<b>Title:</b>	MMM-HL-067-Mexican State code issues (CBP Officers/Portal)				

## Change Description

<b>Detailed Description:</b>	TT# 326008 -This isn't a portal user issue but it is an officer trying to process an e-Manifest issue. The portal is transmitting 3 character state codes while the officer can only receive and process a 2 character code. If OFO is instructing the trade to use 3 character code to identify the state in which the license plate was issued and requiring this code to be placed on the paper manifest then the officer should be able to either type the 3 letter code and let the system translate to a two letter code or OFO should change the policy for both the trade and they system to require just a two letter code. Enable ACE and ACS/TECS to recognize either the two or three letter code so that it is transparent to CBP officer and the carrier.
