Change to CSPO System?	
Change Planned?	Where/When Planned?
Assign to System: ACE/AES	Assign to Release/Delivery: M3

Requirements Description

Business Area:	Export Processing
Request Type:	Business Need
Impacts Trade?	Yes
Description of Change:	<p>TRADE REQUEST:</p> <ol style="list-style-type: none"> 1. The ACE portal should provide the exporter (USPPI) or its authorized filer access to information on export licenses and related export control information on a shipment that falls under the authority of the Nuclear Regulatory Commission (NRC), pertaining to the export of merchandise covered under NRC regulations and statutes. 2. ACE should provide a mechanism whereby the exporter or its authorized filer could communicate with the NRC for information regarding a transaction or shipment concerning export control or licensing requirements or current restrictions on exports to a certain country or entity. 3. ACE should provide a mechanism whereby the NRC could communicate with a particular exporter or its authorized filer for information regarding an export transaction or shipment. 4. ACE should provide for all authorized parties (NRC, Exporters, and their authorized filers) the ability to query license balance (value and/or quantity) and expiration date information. 5. Need to add more detail on specific NRC licensing requirements (General Licenses and Specific Licenses)

Benefit of Change:	<ul style="list-style-type: none"> • Since exporters might have licensed export transactions filed by more than one filer they currently must contact each filer to verify information on the license. Having this data available in ACE will eliminate the need for the exporter to contact multiple filers for this information. • By making license information available to the exporter in ACE will eliminate the need for the exporter to contact NRC to obtain this information. • It will also serve as a database for these agencies in track of license balance and expiration dates.
Impact Assessment:	Unknown at time of entry in tool.

System/Subsystem

System:	Automated Export System (AES)	Cargo Business Area:	Export: Cargo Control & Release (CCR)
