Requirement Summary

GIF #:	CSPO_GIF_295	Status:	REVIEW	Submit Date:	17-AUG-2006
Title:	ENT-GIF-196-A2.3-e214 Data in Importer Portal Account				

Change Description

Detailed Description:	<p>The e214 data should be visible in the Importer Portal in the same way entry summary data is viewable in the Importer Portal today. The e214 data would include the data elements found in the FT application (documentation can be found at http://www.cbp.gov/linkhandler/cgov/import/cargo_control/ftz_trade_req.ctt/ftz_trade_req.doc). The format would be the same as the format used to view e214 data in the FTZ Operator Portal account, and it would appear in a new view in the Importer Portal account. Along with the data contained in the e214 document, operators should be able to view all concurrences that have been transmitted related to each e214 (FZ application), messages produced by CBP concerning the admission (NF application) and the current status of the e214 (approved, docs required, etc.) should be shown with the e214 data. Since the applicants EIN is included in the e214, that identifier could be used to determine if an e214 needs to be displayed in an Importer's Portal account.</p> <p>Upon completion of the e214, the zone admission data will be available in ACS, as entry and entry summary data is available today. An importer, with an Importer Portal Account, could act as an applicant and file an e214. In this case, the importer should be able to view the e214 in his/her Importer Portal Account.</p> <p>Given a layout of the current entry summary display, we can map the e214 data to the appropriate layout. CBP contacts regarding the automation of the 214 include Steve Schorr, Jerry Leuters, and Valarie Neuhart.</p>
