

FY 2001 SUMMARY: ANTIDUMPING/COUNTERVAILING DUTY (AD/CVD)

Antidumping (AD) and countervailing duty (CVD) cases cross all industry sectors. Primary Focus Industry (PFI) cases account for 63% of the total, while Non-PFI cases account for 37%. During Fiscal year 2001, there were 316 AD/CVD cases for which the U.S. Customs Service suspended liquidation. The total entered value of the 239,746 AD/CVD entries was \$4,322,805,893. Total AD/CVD duty deposited was \$678,397,126.

These AD/CVD cases involve products from 38 countries. China (46 cases) and Japan (36 cases) continue to be the countries with the largest number of cases. There are 13 cases involving Mexico and 12 involving Canada. The AD/CVD duty rates range from 0% for various products to 454% for case number A588841 for vector supercomputers (information technology) imported from Japan.

Among commodities, steel products rank first with 133 suspended cases (42.1%) during FY 2001. Harmonized Tariff Schedule (HTS) number 7208: flat hot-rolled steel is the single leading steel product, and accounts for 8.2 % of all the HTS 4-digit-level commodities.

The U.S./Canada Softwood Lumber Agreement expired on March 31, 2001. The sole softwood CVD case (number C122839) deposited \$439,653,058 in AD/CVD duty. This was the largest amount of all 316 AD/CVD cases in FY 2001.

The AD/CVD case breakouts are as follows:

Industry Sector	# of AD/CVD Cases	Percentage
Steel	133	42.1%
Non-PFI	117	37.0%
Agriculture	25	7.9%
Information Technology	20	6.3%
Automotive	9	2.9%
Textiles/Wearing Apparel	7	2.2%
Production Equipment	4	1.3%
Wood	1	0.3%

Country Sector	# of AD/CVD Cases	Percentage
China	46	14.6%
Japan	36	11.4%
Korea	26	8.2%
Mexico & Canada (NAFTA)	25	7.9%
Taiwan	21	6.7%
Germany	20	6.3%
All Others	142	44.9%
