

# Importer Security Filing and Additional Carrier Requirements

## “10+2” Program Update

**CBP Trade Symposium - December 2009**

U.S. Customs and  
Border Protection

# 10+2 Interim Final Rule

- **Effective Date**: The interim final rule (IFR) took effect on January 26, 2009 (60 days after the publication date) and allowed for certain “flexibilities”:
  - Timing of transmission for 2 of the 10 elements
  - Range of Responses for 4 of the 10 elements
  - All other requirements in this rule are adopted as a final rule.
- **Compliance (Enforcement) Date**: **January 26, 2010**
  - The IFR “flexibilities” will stay in effect until the structured review is completed and a decision on keeping, modifying or removing them is made by DHS, OMB and other executive branch agencies.

# ISF-10s “By the Numbers”

January 26 – December 6, 2009

---

CBP has received well over:

- **3.65 Million** ISF-10s from over
- **1,950** ISF Filers representing more than
- **103,000** ISF Importers (IOR#'s)
- **95%** acceptance rate

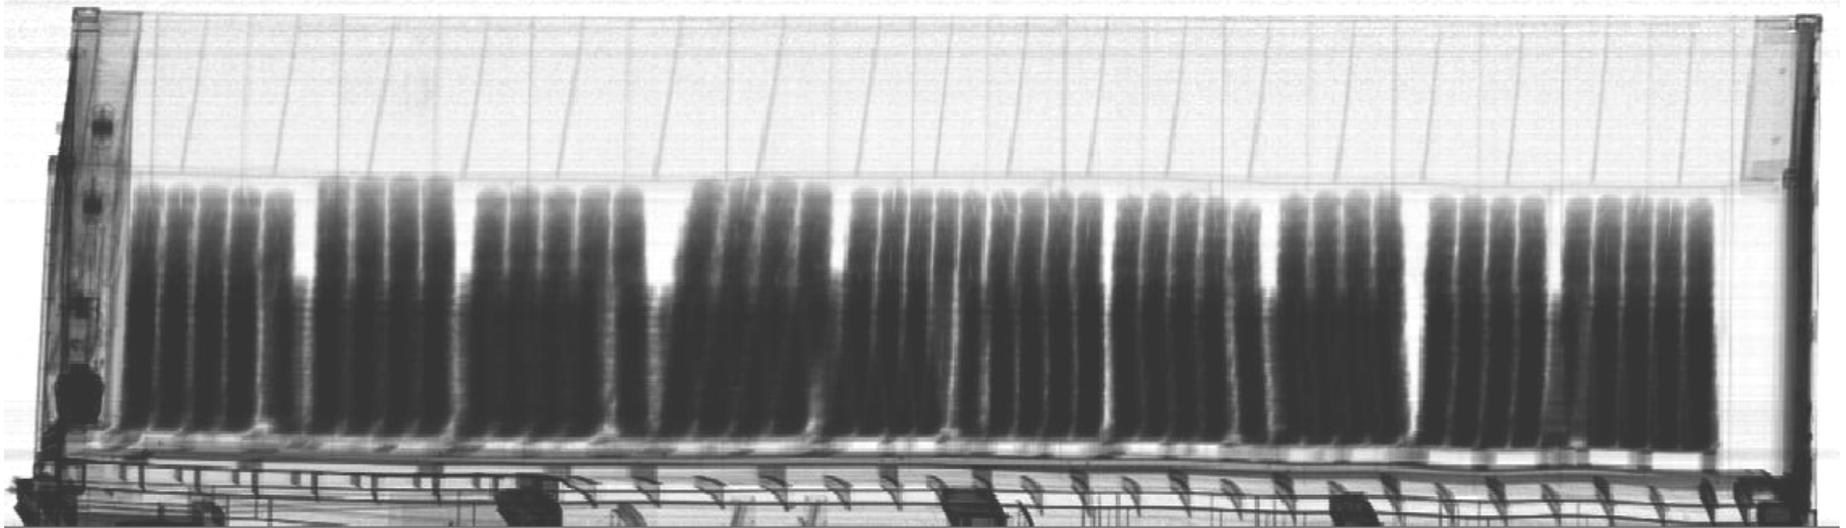

CBP has also received more than:

- **6,475** vessel stow plans and
- **106 Million** container status messages

# ISF Outreach

---

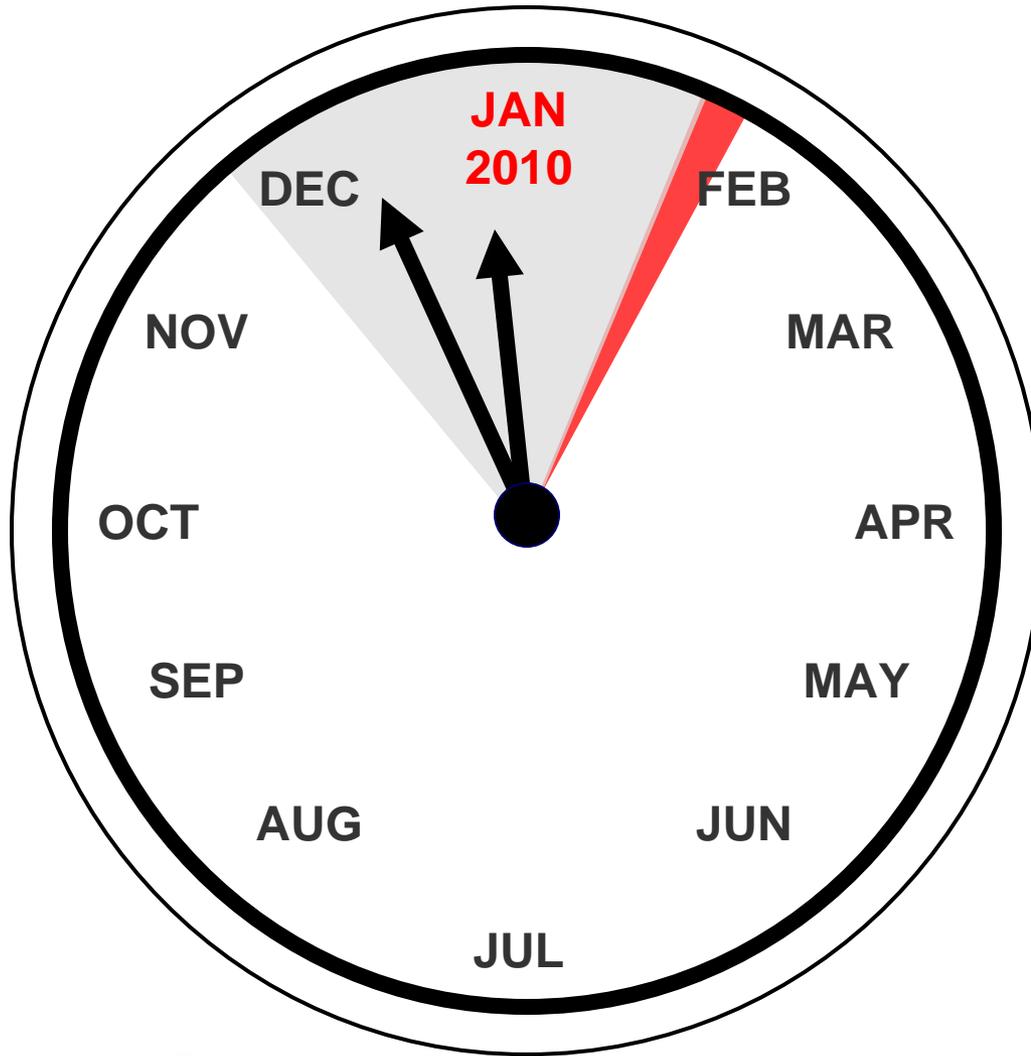

- CBP implemented an extensive trade outreach process which included:
  - System-generated ISF progress reports
  - Published technical guidelines
  - Provided a highly detailed program overview presentation and FAQs on the CBP web site.
- Participated in over 50 webinars, meetings, conferences, and other outreach activities (foreign and domestic) sponsored by the trade since the publication of the interim final rule.
- CBP has met with numerous trade organizations including:
  - American Association of Exporters and Importers (**AAEI**)
  - The Departmental Advisory Committee on Commercial Operations of Customs and Border Protection and Related Homeland Security Functions (**COAC**)
  - National Customs Brokers and Forwarders Association of America (**NCBFAA**)
  - National Association of Manufacturers (**NAM**)
- Overall, CBP reached well over 10,000 participants at these outreach activities.

# “10+2 Enforcement Clock”

---

U.S. Customs and  
Border Protection

# Mitigation Guidelines

---

- **Liquidated damages cannot be assessed for the failure to file an ISF if no bond is in place.** However, CBP may also withhold the release or transfer of the cargo until CBP receives the required information and has had the opportunity to review the documentation and conduct any necessary examination.

U.S. Customs and  
Border Protection

# Mitigation Guidelines

---

## ■ Mitigating Circumstances

- Evidence of progress in the implementation of the ISF requirement during the flexible enforcement period (i.e., January 26, 2009 through January 26, 2010).
- Small number of violations compared to the number of shipments for which ISFs were required.
- **Tier 2 or Tier 3 C-TPAT member** may receive additional mitigation

## ■ Aggravating Circumstances

- Lack of cooperation with CBP or CBP activity is impeded with regard to the case.
  - Multiple errors on the ISF.
- **No relief will be granted if CBP determines that law enforcement goals were compromised by the violation.**

# ISF Progress Reports

---

- In production since May 10, 2009
- ISF Reports are being routed through the ISF Filers and Tier 3 & Tier 2 C-TPAT Importers
  - Registration is required
  - Over **900 ISF Filers** have been registered and “verified”
  - The ISF Progress Reports cover more than **100,000 ISF Importers**
  - C-TPAT Importer Progress Reports – **390**
  - C-TPAT IORs represented – **1,214**
- Reports are on a monthly cycle.
- CBP has also developed a specific Filer-based summary report

U.S. Customs and  
Border Protection

# ISF Progress Reports

---

- The initial ISF Progress Reports focus on the numbers and types of filings; the status of the filings (e.g., accepted vs. rejected) and the potential timeliness of the filings.
- Each ISF Report is broken down by Filer Code and Importer of Record Number and details three (3) specific areas:
  - **Submission Volume**
    - Numbers, Status (Accepted or Rejected) and Format
  - **Rejection Error Messages**
    - Reasons for the rejections
    - Error codes
  - **Timeliness Performance**
    - As compared to the vessel departure date minus 24 hours (merely used as a proxy indicator of potential timeliness)
    - Amendment and rejected filings are not included

# Top ISF Issues Identified

---

## ■ Bill of Lading Numbers

- Initially, some ocean carriers were not providing the bill numbers timely (i.e., until a vessel had actually sailed). Most of these issues have been resolved.
- Need to identify the lowest AMS bill of lading number (i.e., house or regular/simple bill).
- If dealing with a non-automated FF, provide the ocean carrier's "regular/simple" bill.

## ■ Measurement of ISF "Timeliness"

- Vessel departure date minus 24 hours
- Modeled after the 24 Hour Manifest Rule enforcement paradigm

U.S. Customs and  
Border Protection

# Bill of Lading Number

- Identifier commonly known as the “11<sup>th</sup> Element”.
- Required as part of the ISF Filing. The ISF Importer, or their agent, must obtain this information and provide it to CBP as part of the ISF filing NLT 24 Hours prior to vessel lading for ISF-10 filings.
- Absolutely necessary to properly link the Importer Security Filing (ISF) to the customs manifest data.
- Lowest AMS bill number (house or regular/simple)

U.S. Customs and  
Border Protection

# A Few Notes on Measuring “Timeliness”

---

- CBP began by using the first bill of lading file date as a proxy indicator of ISF timeliness since the bill of lading must also be filed at least 24 hour prior to vessel lading under the current 24 Hour Manifest Rule.
- However, many bills of lading are actually filed several days in advance of actual vessel lading. Therefore, some of the “untimely” ISFs that show up on the older ISF Progress Reports may actually be timely.
- CBP is now using the **Vessel Departure Date** minus 24 hours to better assess ISF timeliness.

U.S. Customs and  
Border Protection

# Top ISF Issues Identified

---

- **Enforcement & Liquidated Damages Concerns**
  - \$5,000 per transmission (\$10,000 max per ISF)
  - Do-not-load (DNL) holds
  - **Use least amount of force to enforce compliance**
    - Domestic Holds
    - Domestic Exams
- **Bonds**
  - **Appendix D bonds will be routinely accepted for ISF filings.**
  - Sufficiency questions are still being addressed.
  - Some coded transaction types are exempt (by policy); for example:
    - Type 03 **HHG/PE**
    - Type 04 **Gov't/Military**
    - Type 05 **Diplomatic**
    - Type 06 **Carnet**
    - Type 09 **International Mail**
