## CSPO Planning

<b>Change to CSPO System?</b>	
<b>Change Planned?</b>	<b>Where/When Planned?</b>
<b>Assign to System:</b>	<b>Assign to Release/Delivery:</b>

## Requirements Description

<b>Business Area:</b>	Revenue/Collection
<b>Request Type:</b>	Business Need
<b>Impacts Trade?</b>	Yes
<b>Description of Change:</b>	<p>Increase the field length of Broker Reference Number to 16 characters in the following places in Automated Broker Interface (ABI) CATAIR: Entry Optional Input (currently Pos. 39-47) in Record Identifier H2; Entry Conditional Output (currently Pos. 19-27) in Record Identifier H6; Entry Summary Optional Input (currently Pos. 40-48) in Record Identifier 20; Entry Summary Conditional Output (currently Pos. 70-78) in record Identifier H1.</p> <p>Brokers/importers use this field for items such as file number and other information that assists in tracking entries. A majority of entry filers have from thousands to hundreds of thousands of entries per year. Many importers use multiple brokers and use this field in systems cross reference to their own import files. The current 9 character field length is not sufficient to accommodate the needs of the broker/importer.</p>
<b>Benefit of Change:</b>	Allows for more efficient cross referencing between entry summary data and an importer's fuller set of import records relating to an import transaction. This will result in better compliance.

<b>Impact Assessment:</b>	Unknown at time of entry in tool.
