

ACE SINGLE WINDOW DOCUMENT IMAGE SYSTEM

The Automated Commercial Environment (ACE) will become the Single Window, the one system through which the international trade community submits import and export information and the Government determines admissibility. The Document Image System (DIS) is an ACE feature that eliminates the need to send paper forms to the Government in order to comply with import and export regulations.

HOW DOES DIS WORK?

WHAT FORMS CAN BE SENT VIA DIS?

- General forms not specific to any agency, such as invoices or packing lists
- CBP forms to support Cargo Release/Simplified Entry
- Ocean export manifests
- Specific forms for six initial Partner Government Agencies (PGAs)
