Entry Committee

The Entry committee met in December to draft a “White Paper” on recordkeeping as it pertains to the data transmitted via ACE entry and entry summary. The committee completed a rough draft and will distribute the draft to the other TSN committees for comment in January 2013.

Automated Export Task Group: Export, Multi-Modal Manifest, ITDS Joint Committees

- The Automated Export Task Group met with CBP (Bill Delansky) on December 20th. Bill briefed the task group on the status of the automated export processing and AES Re-engineering efforts being conducted by CBP. Bill has scheduled another Task Group meeting for January 31st to keep the trade up to date on these efforts. The AES Re-Engineering effort is part of the new AGILE software development methodology and at some point the trade will be asked to participate in the Agile team meetings.
- The trade’s automated export processing user requirement documentation was completed in October 2012. Those user requirements determined to be in scope will be used by CBP in current automated export processing functional development efforts. Those user requirements that are in “pending review” status were submitted to CBP for further internal legal and policy review.
