Export, Multi-Modal Manifest, ITDS Joint Committee Report (Automated Export (AE) Task Group)

- The Automated Export Task Group held a teleconference with CBP on May 29 to discuss the revalidation of the trade's automated export user requirements. The MMM, ITDS and Export Committees submitted updates to the user requirements for CBP review and follow up. Regular meetings will be held with the Task Group as they work with their individual committees on the revalidation effort.
- Updates to the "Automated User Requirements Spreadsheet" are being made based on the trade's and CBPs review of these user requirements.
- The Task Group will meet in June to further review the status of the user requirements.

Transition Committee

The Transition Committee is working on a review of the missing entry summary edits. The committee is reviewing the edit list to determine if there are validations that the trade feels CBP needs to do before mandating the use of ACE for Entry Types 01, 03, and 11. Many of the edits could be done by the trade software if CBP can provide additional electronic information and a tariff query that can be run daily to get all changes made the previous day. Many in the trade felt that CBP still needs to have the edits that verify the duty calculation and the required/not required status of the fees and taxes.
